following a dialogic and interdisciplinary

approach this book highlights changes in the concept and action of disobedience presenting a theoretical framework and applied case studies. Disobedience has traditionally been played out through collective actions and protests which configure and propose alternative social scenarios to the status quo today in a changing socio historical context. Disobedience represents a mode of political participation and a form of an active citizenship attempt to correct authoritarian drifts. Furthermore it often highlights social problems and morally controversial issues. Disobedience is not only a right granted to the individual within democratic systems and or duty imposed in the interest of society in a pro social sense i.e. defense of human rights and a tendency towards equalization but it also became an alternative process often symbolic of construction of reality. The book focuses on reconstructing the concept of social disobedience and the field's state of the art from an innovative contemporary theoretical and conceptual perspective and b analyzing its phenomenology within a specific territorial horizon with the objective of uncovering social and pro social

aspects related to today's forms of disobedience. The book therefore will appeal to students, scholars and researchers of contemporary political theory, political science, democratization studies, social movement studies, criminology, legal theory and moral philosophy.

His assessment of the historical conditions and institutions that protect class and racial privileges makes it clear why people in cities rebel and why social scientists should focus future research on large scale urban transformation.

Drawing on lengthy interviews, historical materials, surveys and his own participation in protests, Jasper offers a systematic overview of the field of social movements. He weaves together accounts of large scale movements with individual biographies placing the movements in cultural perspective and focusing on individuals' experiences.

This book considers the radical effects the emergence of social media and digital politics have had on the way that advocacy organisations mobilise and organise citizens into political participation. It argues that these changes are due not only to

technological advancement but are also underpinned by hybrid media systems and new political narratives and a new networked generation of political actors. The author empirically analyses the emergence and consolidation within advanced democracies of online campaigning organisations such as Moveon, 38 Degrees, Getup and Avaaz. Vromen shows that they have become leading political advocates and influential on both national and international level governance. The book critically engages with this digital disruption of traditional patterns of political mobilisation and organisation and highlights the challenges in embracing new ideas such as entrepreneurialism and issue driven politics. It will be of interest to advanced students and scholars in political participation and citizen politics, interest groups, civil society organisations, government and politics and social media.

A critical assessment of the role that information technologies have come to play in contemporary campaigns.

democracy is startlingly low and many of the civil rights and economic equity initiatives that were instituted in the 1960s and 70s have been abandoned as significant proportions of the populace seem to believe that the civil rights battle has been won however rates of collective engagement like community activism are surprisingly high in resisting citizenship renowned feminist martha ackelsberg argues that community activism may hold important clues to reviving democracy in this time of growing bureaucratization and inequality this book brings together many of ackelsberg s writings over the past 25 years combining her own field work and interviews with cutting edge research and theory on democracy and activism she explores these efforts in order to draw lessons and attempt to incorporate knowledge about current notions of democracy from those who engage in non traditional participation those who have in many respects been relegated to the margins of political life in the united states
