this book shows that democratization in sub saharan africa can be successful even if the government remains dominated by one major political party if an institutionalized and strong opposition party even when too weak to take power challenges the dominant government

party the quality of democracy improves substantially the comparative study demonstrates that competitive opposition parties in dominant party systems are rooted in the historical legacy of political cleavages related to de colonization that precede the third wave of democratization of the 1990s and have survived the instability of post independence political developments to the present day the study covers 19 african countries and 55 elections overall including four in depth case studies of botswana lesotho ghana and mali it offers scholars and practitioners of electoral democracies and competitive authoritarian regimes a novel view on the role of party systems in processes of democratization it makes an important contribution to the general literature on state building intertwined with democratization and representation in old and new democracies

from the Pulitzer Prize winning New York Times bestselling author an alarming account of how autocracies work together to undermine the democratic world and how we should organize to defeat them we think we know what an autocratic state looks like there is an all powerful leader at the top he controls the police the police threaten the people with violence there are evil collaborators and maybe some brave dissidents but in the 21st century that bears little resemblance to reality nowadays autocracies are underpinned not by one dictator but by sophisticated networks composed of kleptocratic financial structures surveillance technologies and professional propagandists all of which operate across multiple regimes from China to Russia to Iran corrupt companies in one country do business with corrupt companies in another the police in one country can arm and train the police in another and propagandists share resources and themes pounding home the same messages about the weakness of democracy and the evil of America international condemnation and economic sanctions cannot move the autocrats even popular opposition movements from Venezuela to Hong Kong to Moscow don't stand a chance the members of Autocracy Inc aren't linked by a unifying ideology like Communism but rather a common desire for power wealth and impunity in this urgent treatise which evokes George Kennan's essay calling for containment of the Soviet Union Anne Applebaum calls for the democracies to fundamentally reorient their policies to fight a new kind of threat

the once acrimonious debate on the existence of African philosophy has come of age yet the need to cultivate a culture of belonging is more demanding now than ever before in many African societies the gargantuan indelible energised chicanery waves of neo colonialism and globalisation and their sweeping effect on Africa demand more concerted action and solutions than cul de sac discourses and magical realism it is in view of this realisation that this book was born this is a vital text for understanding contextual historical trends in the development of African philosophic ideas on the continent and how Africans could possibly navigate the turbulent catadromous waters tangled webs and chasms of destruction and chagrin of struggles that have engrossed Africa since the dawn of slavery and colonial projects on the continent the book aims to generate more insights and influence national continental and global debates in the field of philosophy it is accessible and handy to a wider range of readers ranging from educators and students of African philosophy anthropology African studies cultural studies and all those concerned with the further development of African philosophy and thought systems on the African continent

this volume on muslim life focuses on young male migrants of rural origin who move to build better lives in bougouni a provincial town in southwest mali describing themselves as simply muslims and adventurers these migrants aim to be both prosperous and good muslims drawing upon seventeen months of fieldwork author andré chappatte explores their sense of prosperity and piety as they embark on tunga adventure a customary search for money and more in a tradition that dates back to the colonial period in the context of the current global war on terrorism most studies of muslim life have focused on the politics of piety of reformist movements their leaders and members by contrast in search of tunga takes a perspective from below it opens piety up to simply muslims although the religious elites have always claimed authority and legitimacy over piety is piety an exclusive field of experiences for those who claim to strive for it what does piety involve for the majority of muslims the non elite and unaffiliated muslims this volume democratizes piety by documenting its practice as going beyond sharply defined religious affiliations and islamic scholarship and by showing it is both alive and normative existential and prescriptive as opposed to studies that build on the classic historical connections between the maghreb and the sahel the southbound migration from the sahel documented in this book stresses the overlooked historical connections between the southern shores of the sahara and the lands south of those shores it demonstrates how the malian savanna this former buffer zone between ancient mande kingdoms and thereafter remote areas of french sudan is increasingly becoming central in today s sahel contexts of desiccation and insecurity
