an intimate analysis of the first time nervous inexperienced confused for most losing your virginity is one of life's most significant moments always to be remembered of course experiences vary but Laura Carpenter asks is there an ideal way to lose it what would constitute a positive experience what often compels the big step and further what does going all the way really mean for young gays and lesbians in this first comprehensive study of virginity loss Carpenter teases out

the complexities of all things virgin by drawing on interviews with both young men and women who are straight gay or bisexual virginity lost offers a rare window into one of life's most intimate and significant sexual moments the stories here are frank poignant and fascinating as Carpenter presents an array of experiences that run the gamut from triumphant to devastating importantly Carpenter argues that one's experience of virginity loss can have a powerful impact on one's later sexual experiences especially at a time of increased debate about sexual abstinence versus safe sex education in public schools this important volume will provide essential information about the sex lives of young people

Motivating Humans represents an excellent integration of different motivational constructs the main purpose of Ford's book and his theory motivational systems theory must is to provide an integrative and coherent model of motivation that synthesizes the

various constructs from the different theories into one comprehensive framework it represents an important addition to the knowledge base on motivation and will be generative of much future research moreover the book presents the framework in a scholarly yet readable fashion that makes the book accessible to professional psychologists as well as graduate and undergraduate students Paul R. Pintrich in contemporary psychology why do people do the things they do in motivating humans Ford answers this age-old question and offers the reader a precise and comprehensive description of the basic substance of human motivation what it is how it works and how it impacts what people do and how well they do it he also shows how classic and contemporary motivation theory in education management and psychology can be integrated into a coherent and unified framework called motivational systems theory from which he derives 17 principles for motivating humans different from any

other motivation book motivating humans presents numerous unique features a variety of concrete examples to bridge the gap between abstract theory and the world of practical human affairs an applications chapter that explores such issues as ways to promote social responsibility in youth ways to increase work productivity and job satisfaction and ways to increase learning and school achievement the most up to date coverage of recent studies in motivation and pedagogical devices including summary tables to help the reader digest and remember key information unique comprehensive and accessibly written motivating humans will inspire a wide readership including professors and students in psychology management education developmental psychology and clinical psychology class tested what the students say the chart on the history of motivational theory organized broadly by mst concepts was extremely helpful in providing the reader with a look at the field in a glance first and foremost the fact that this is a

legitimate psychological theory and i can understand it having had very little other exposure to psychology is a very strong aspect of the book is refers to and explains a variety of psychological theories and principles without losing me also any theory that seems to unify a large volume of disparate work is always attractive to mr especially if it does a good enough job surveying its predecessors as i think the book does finally i think that the summary of the lsf in chapter two was integral to the largeness or wide view of the book it helped to tie in and explain the whole person approach to motivational theory i really liked how mst emphasized the role of emotions in motivation and human action where other theories had rationalized them emotions are very powerful and i believe virtually impossible to explain away something that i think psychology does too readily motivational systems theory is the most comprehensive and compelling theory of human motivation which i have seen to date

martin ford has taken an impoverished and muddled field of psychological inquiry and transformed it into a coherent and useful tool for explaining human behavior chapter 6 is especially brilliant it gives an overview of all the major and most of the not so major theories and capitalizes on their similarities rather than their differences most practitioners in schools and business recognize the value of motivating people and do so operating from their gut it is good to know that there is a workable and logical theory to put behind the practice and help refine it chapter 7 is particularly helpful one could read this chapter and none others and still benefit finally a book which will help educators turn their students on to learning it should be required reading for all classroom teachers praise for this volume motivating humans by martin ford presents one of the most complete and comprehensive theories of human motivation yet to be proposed this is a significant work that is essential reading for all interested both in understanding

motivation and in applying motivational principles in the workplace robert j sternberg yale university motivating humans is a well thought out and well organized book that focuses on issues of motivation educators in particular will be interested in this volume it utilizes a combination of logic and existing literature to build its case martin ford s work is creative yet analytic motivating humans will certainly stimulate some serious class discussion gerald r adams college of family and consumer studies university of guelph ontario canada using a broad systems perspective ford has skillfully organized a wide and all too often confusing array of advances in motivation theory and research students researchers and practitioners in education and psychology should find this book most helpful in providing a clear and thought provoking introduction to the field ruth kanfer department of psychology university of minnesota motivating humans contains a wealth of information from theory to application to help educators increase school

learning and achievement twenty five pages of bibliography alone make this book attest to its thoroughness a chapter of theories of motivation can only be regarded as definitive some 31 theories of motivation are described and arranged in a table format ford regards facilitation not control as the guiding idea for motivating people an idea that fits nicely with the growing role of teacher as facilitator wisely he offers no ready formula for facilitating motivation for there are no magic motivational buttons that can be pushed to make people want to learn work hard and act in a responsible manner but ford does offer a comprehensive glimpse into the mechanism of motivation for those who are trying to find their own paths toward inspiring it it deserves the highest praise and the widest reading for its treatment of such a complex subject in such an accessible and thorough manner motivating humans should serve long as the standard source and reference on motivation educational leadership

plato s utopia recast is an illuminating reappraisal of plato s later works which reveals radical changes in his ethical and political theory christopher bobonich argues that in these works plato both rethinks and revises important positions which he held in his better known earlier works such as the republic and the phaedo bobonich analyses plato s shift from a deeply pessimistic view of non philosophers in the republic where he held that only philosophers were capable of virtue and happiness to his far more optimistic position in the laws where he holds that the constitution and laws of his ideal city of magnesia would allow all citizens to achieve a truly good life bobonich sheds light on how this and other highly significant changes in plato s views are grounded in changes in his psychology and epistemology this book will change our understanding of plato his controversial moral and political theory so influential in western thought will henceforth be seen in a new light

in 2001 the council of ministers and the european parliament adopted the so called first railway package comprising three directives this was intended to open up the rail freight market to competition and help to improve rail s share of the overall freight market in 2006 however the commission published a report concluding that the implementation of the package was inadequate and has committed itself to recasting the package in this report recast of the first rail freight package hl paper 90 i the committee looks at which elements of the package need amending and which need clarification

in our everyday lives we struggle with the notions of why we do what we do and the need to assign values to our actions somehow it seems possible through experience and life to gain knowledge and understanding of such matters yet once we start delving deeper into the concepts that underwrite these domains of thought and actions we face a philosophical

disappointment in contrast to the world of facts values and morality seem insecure uncomfortably situated easily influenced by illusion or ideology how can we apply this same objectivity and accuracy to the spheres of value and morality in the essays included in this collection peter railton shows how a fairly sober naturalistically informed view of the world might nonetheless incorporate objective values and moral knowledge this book will be of interest to professionals and students working in philosophy and ethics

education including teachers teaching assistants parents administrators and others grounded in intimate moments of family life in and out of hospitals this book explores the hope that inspires us to try to create lives worth living even when no cure is in sight the paradox of hope focuses on a group of african american families in a multicultural urban environment many of them poor and all of them with children who have been diagnosed with serious chronic medical conditions cheryl mattingly proposes a narrative phenomenology of practice as she explores case stories in this highly readable study depicting the multicultural urban hospital as a border zone where race class and chronic disease intersect this theoretically innovative study illuminates communities of care that span both clinic and family and shows how hope is created as an everyday reality amid trying circumstances educating special children is the definitive guide to evidence based practice and

professionally informed approaches in provision for special children now in its second edition this book outlines ideas of best practice that relate to various disabilities and disorders and helpfully discusses what might constitute effective provision international in its scope it explores issues surrounding communication disorders and autism and asperger s syndrome developmental co ordination disorders reading writing and mathematics disorders disorders of conduct anxiety and depression attention deficit

the art of dying speaks to modern readers with refreshing frankness and wit it covers the subject thoroughly from how to inform relatives of impending death to coping with pain and fear to death rituals to preparing for a possible afterlife or depending on one s viewpoint the end of it all publishers weekly along with our caring presence this book may be the finest gift we can give someone facing the last stage of life rabbi harold kushner author of when bad things happen to good

people dr weenolsen doesn't duck the tough questions m brewster smith phd former president american psychological association this book gives the same things a good support group does compassionate sympathy and practical advice for people sharing pain it will be a godsend rebecca brown author of gifts of the body begins with the day you receive the diagnosis and the sudden realization that never again will you be as you were even if by some miracle you heal it will be only temporary weenolsen takes the panic and paralysis out of such news through wise aggressive no holds barred approaches patricia holt san francisco chronicle a book everyone can benefit from reading nancy pearl author of more book lust also for family and friends of dying persons for professionals in the health care fields and for those who train them hannelore was phd founding editor death studies

this book is a meditation on the experiences of wonder horror and awe and an exploration

of their ontological import it argues that these experiences are not as our culture often presumes merely subjective emotive responses to events that happen in the world rather they are transformative experiences that fracture our ordinary lives and in so doing provide us access to realities of which we would otherwise be oblivious wonder horror and awe like the experiences of love and death to which they are so intimately related are not events that happen in our world but events that happen to it and thus alter our life as a whole miller explores the impact of that transformation its deconstructive effect on our ordinary sense of our selves and the breakthrough to a new understanding of being which it makes possible

understanding risk putting risk in perspective risk charts a way to get perspective judging the benefit of a health intervention not all benefits are equal understand the outcome consider the

downsides do the benefits outweigh the downsides beware of exaggerated importance beware of exaggerated certainty who's behind the numbers

write in style is aimed at all for whom clarity and accuracy of expression are important skills all the main styles and grammatical rules are covered their sense explained and vivid examples given of how not to write plenty of sound and meticulous advice is offered in a friendly and enthusiastic tone and a large part of the book covers specific types of writing from essays and articles to minutes and reportage the many illustrations examples and exercises throughout help the reader put into practice the techniques and skills the book explores

a fresh new approach to tapping into our own creativity using the images and artifacts of our dreams getting inspired is one of the toughest parts of being an artist whether we're a beginner or a seasoned professional but as tom crockett shows us in this new book

finding ideas for our artwork is easier than we think by simply exploring the images of our sleeping and waking dream states we can discover a wealth of ideas and inspiration that are more authentic and powerful because they reveal our underlying spiritual self recognizing the importance of allowing our spiritual side to infuse our art and the fulfillment this can bring tom crockett has created a program to teach us all no matter what level of artistic experience we have how to bring art and spirit into one the four different types of creative expression crockett has identified finding arranging altering and making open up artistic options for everyone even for those of us who cannot yet imagine that we have the ability to create art filled with personal anecdotes from the author s creativity workshops and practical easy to implement advice for tapping into our hidden creativity the artist inside teaches us how to access the dreaming world to heighten creativity that we can create in each piece of artwork a temporary home for

the spirit how creating a spiritual path can energize us and increase our intuitive capacity when the process of making art is guided by the inner vision of our sleeping and waking dream states we connect with something larger than ourselves and rediscover that creativity can be both a spiritual path and an important life tool

the history and bioethics of medical education you ve got to be carefully taught continues the routledge advances in the history of bioethics series by exploring approaches to the teaching of bioethics from disparate disciplines geographies and contexts van renselaer potter coined the phrase global bioethics to define human relationships with

their contexts this and subsequent volumes return to potter s founding vision from historical perspectives and asks how did we get here from then the patient practitioner relationship has come to the fore in bioethics this volume asks is there an ideal bioethical curriculum are the students being carefully taught and in turn are they carefully learning this volume will appeal to those working in both clinical medicine and the medical humanities as vibrant connections are drawn between various ways of knowing

biologists since darwin have been intrigued and confounded by the complex issues involved in the evolution and ecology of the social behavior of insects the self sacrifice of sterile workers in ant colonies has been particularly difficult for evolutionary biologists to explain in this important new book andrew bourke and nigel franks not

only present a detailed overview of the current state of scientific knowledge about social evolution in ants but also show how studies on ants have contributed to an understanding of many fundamental topics in behavioral ecology and evolutionary biology one of the substantial contributions of social evolution in ants is its clear explanation of kin selection theory and sex ratio theory and their applications to social evolution in insects working to dispel lingering skepticism about the validity of kin selection and more broadly of selfish gene theory bourke and franks show how these ideas underpin the evolution of both cooperation and conflict within ant societies in addition using simple algebra they provide detailed explanations of key mathematical models finally the authors discuss two relatively little known topics in ant social biology life history strategy and mating systems this comprehensive up to

date and well referenced work will appeal to all researchers in social insect biology and to scholars and students in the fields of entomology behavioral ecology and evolution
