decades of urban disinvestment and poverty have made educational

attainment for black youth more vital than at any time in recent history yet in their pursuit of quality education many black families are burdened by challenging barriers most notably school punishment

how the historic resistance to racial desegregation in schools led to the over punishment of students today every year millions of public school students are suspended this overused punishment removes students from the classroom but it does not improve their behavior instead suspension disrupts their education harming the students their families and their schools black students suffer most within this broken system experiencing a far greater risk of school punishment and the significant harms that accompany it many activists and scholars have considered how school punishment increases racial inequity but few have thought to ask why why do we punish students the way we do and why have we allowed this harmful practice to impact the lives of our nation s children in suspended education aaron kupchik takes readers to the root of the issue suspensions were not intended as a behavior management tool instead they were designed to remove unwanted students from the classroom through statistical analysis and in depth case studies of schools in massachusetts and delaware kupchik reveals how suspension rates skyrocketed after the 1954 brown v board of education

decision serving as an unofficial means of removing black children from newly desegregated schools his groundbreaking research traces the legacy of these segregationist movements demonstrating that school districts with more desegregation related legal battles from the 1950s onward suspend more black students today combining expert analysis with compelling accessible prose kupchik makes a powerful case for the end of suspension and other exclusionary punishments the result is a revelatory explanation of a pressing problem facing all children parents and educators today

suspended for life takes an empirical look via real experiences at how zero tolerance policies contained in the schools code of conduct disregards the rights of the student especially students with disabilities these policies are failing students everywhere including my residence of syracuse new york statistically these unfair and biased zero tolerance policies have led to very high suspension rates affecting mainly inner city students but overwhelmingly target students with iep's 504 accommodations the untested but suspected ld student and the intellectually gifted student healthcare mental health and medical privacy hippa now play large roles in school especially in decisions to suspend a student however coupled with a school districts code of conduct they

have become a crucial aspect for suspension once you understand the link between a referral to in school suspension is warehousing students or a referral for out of school suspension will push out of students you will realize that in most cases suspension can lead directly to the prison industrial complex for our young women and men stopping this from happening to your student may depend on how well you are prepared to advocate for your child we must not allow suspension to push out our children because ostensibly it may be ensuring them a life sentence of unemployment crime or even death we say it starts at home with the parents so if we can better understand our student's rights and the rights we have as parents we can better prepare ourselves to advocate for our student and to hold the school district accountable for the education of our children

the university of alabama ua is one of the most prominent and fascinating universities in the united states volume one of this series explored ua's 1819 birth its formative years its burning by union soldiers and its subsequent rebirth in 1871 volume two introduces a number of important elements into the ongoing narrative including the university's continual hassle with the radical state government through 1877 a span of only seven years wherein three ua presidents either die in office or in tuscaloosa shortly after resigning creating a

terrible period of psychological mourning that affected everyone associated with the university the strict admission of women students and the effect of this on the faculty administration and the cadets and the establishment of student written works including a journal a newspaper and a yearbook the volume also looks at the history of unofficial student sports dating from the 1870s and the official birth in 1892 of a school sanctioned athletic program for football and baseball the germ of what would eventually be named the crimson tide including the first twelve rocky years of the program it also explores the successful 1900 student rebellion against the military style of student government a rebellion that would rock the very soul of the school involving the state press the legislature the governor the alumni and the citizens of alabama and which witnessed the fall of the commandant and eventually of the president thus wrenching the students out of their fluctuating but often sorrowful psychological state of mind into an ever evolving psychology and experience of success
