this is the first book to examine challenges in the healthcare sector in the six gulf cooperation council gcc countries saudi arabia oman the united arab emirates qatar kuwait and bahrain these countries experienced remarkably swift transformations from small fishing and pearling communities at the beginning of the twentieth century to wealthy petro states today their healthcare systems however are only now beginning to catch up rapid changes to the population and lifestyles of the gcc states have completely changed and challenged the region's health profile and infrastructure while

major successes in combatting infectious diseases and improving standards of primary healthcare are reflected in key health indicators new trends have developed increasingly lifestyle or wealthy country diseases such as diabetes heart disease and cancer have replaced the old maladies to meet these emerging healthcare needs gcc states require highly trained and skilled healthcare workers an environment that supports local training state of the art diagnostic laboratories and hospitals research production and dissemination and knowledge acquisition they face shortages in most if not all of these areas this book provides a

comprehensive study of the rapidly changing health profile of the region the existing conditions of healthcare systems and the challenges posed to healthcare management across the six states of the gcc

this open access book explores the various dimensions of women's empowerment in public policy in the gulf cooperation council gcc region with a particular focus on qatar comparing the country to the other gulf states through its rich compilation of empirical qualitative research the text unpacks the various ways in which women's empowerment materializes in the gcc context providing insights into public policy perspectives in high

income rentier states more broadly the arab world has long been part of the global dialogue on women s economic and political empowerment and the gcc has over the past decade situated women s empowerment amongst their respective national priorities and long term strategies in turn the gulf has seen gradual implementation of policies aimed at women specifically in looking to attract and retain them in the labour market and in the public sector more broadly the collection surveys and evaluates the progress made in recent decades paying close attention to the cultural and policy constraints still limiting women s empowerment in the gulf with a key linkage to sdg5 this book is a timely text addressing the context and drivers behind policies centering on women in the arab region in its analysis of the interplay of international women s empowerment discourse and regional public policy decisions it is relevant to researchers and policy makers focused on women and gender issues in relation to social cultural economic and political empowerment in the gulf specifically but also in the arab world and beyond by virtually any means of measurement postwar iraq has become a more bloodied and embattled settlement than ever envisaged but were the seeds of these problems sown long before military force had been committed this lucid and detailed examination of us foreign policy evaluates the continuity and divergence in the strategies of the bush clinton and bush jr administrations and their efforts to respond to the iraqi threat and how those strategies have bequeathed a legacy of problems to those trying to rebuild a postwar iraq offering the most comprehensive analysis of the dynamics that paved the way for renewed conflict in iraq the book provides a descriptive account of attempts to confront a host of political pressures from the need for international cooperation in postwar iraq to dealing with the influx of foreign fighters and their quest to force

american withdrawal this essential volume provides analysts observers and policy makers with guidelines and prescriptions about the future of postwar iraq and detailed analysis of lessons learned both during and after the military and reconstruction phases

this book explores the determinants of iran s foreign policy towards its gcc neighboring countries she

considers the dimensions of internal and external as well as identity and nationalism al saad aims to identify the strategic importance of iran s nuclear program the agreement with the major powers in 2015 and its impact on iran s foreign policy she then addresses possible future scenarios and implications of iran s foreign policy towards the gcc region upon the us withdrawal from the iranian nuclear deal this book examines the foreign policy of the islamic republic of iran towards the persian gulf states from 1979 to 1998

the gcc is a major player in the post 2011 reordering of the middle east despite the

rise in prominence of individual gulf states especially kuwait qatar saudi arabia and the united arab emirates and the growth of the gcc as a collective entity surprisingly little attention has been paid to the actual mechanics of policy making in the region this book analyses the vital role that institutions are coming to play in shaping policy in the gulf arab states the research coincides with two key developments that have given institutions new importance in the policy process the emergence of a new generation of leaders in the gulf and the era of low oil prices both developments along with dramatic demographic change have compelled state and citizens

to re evaluate the nature of the social contract that binds them together contributors assess the changing relationship between state and citizen and evaluate the role that formal and informal institutions play in mediating such change and informing policy the book shows how academic social and economic institutions are responding to the increasingly complex process of decision making where citizens demand better services and further empowerment and states are obliged to seek wider counsel although wanting to retain ultimate authority with contributions from both academics and practitioners this book will be highly relevant for researchers

and policymakers alike this book examines western foreign policy towards the middle east and the extent to which the promotion of democracy has been in conflict with or supported by other goals geo strategic economic and cultural in the policies of the major actors towards the middle east does the arab spring provide a new opening for cooperation with the region contributions are offered by scholars with research interests in middle eastern politics and by those analysing the policies and interests of external actors against the backdrop of the recent war on terror the comparative and interdisciplinary outlook of the book will offer the opportunity

for much needed intellectual exchanges between political scientists contemporary historians and international relations scholars from europe north america and the middle east since it coincides with and or follows the final phases of us and british withdrawal from iraq and afghanistan this book will be highly relevant to both academics and policy makers in the uk and abroad making a significant contribution not only to the scholarly investigation of western foreign policies but also to the study of the middle east in general this book was originally published as a special issue of the cambridge review of international affairs this book examines gulf

security in a holistic way seeing past the narrow military aspect and also trying to debunk the conventional narratives propagated by regional and external actors in particular the emphasis is be on the historical legacy of gulf security and the fundamental domestic and international vulnerabilities of the various states in the region this approach proves important in light of the recent efforts by gulf states to recast their position in the international arena trying to peddle an image of self assertiveness and autonomy in the security sphere these new diplomatic stances do not seem to be borne out by their current security policies that are marked by apparent continuity

with past practices in particular the new gulf asia nexus and the claims by gulf monarchies that regional confidence building measures are appearing on the horizon are placed under critical scrutiny this is done by a sobering examination of the balance of threat in the region the historical amity enmity patterns and the evolving american stance a shorter modified version of this book was previously published as a special issue of the british journal of middle eastern studies

this book examines the need for a paradigm shift in the area of post secondary education and innovation in the emerging yet relatively understudied mena region

book to examine the military dimensions of these shifts gulf military strategy has prioritised the improvement of local armed forces and the diversification of defence partnerships towards countries such as russia turkey or china however this book shows how this has led to the militarisation of gulf societies the further erosion of multilateral initiatives including the gulf cooperation council and the gulf s perilous involvement in the war in yemen the book also highlights enduring reliance on the west each chapter covers a key aspect of defence policy from governance of armed forces military education and power projection capabilities to

regional security cooperation and lessons from warfighting experiences close attention is paid to saudi arabia the united arab emirates and qatar countries that have enjoyed prominent roles in the region s security affairs during the last ten years the research is based on extensive fieldwork and interviews with major decision makers officials and diplomatic and military representatives it is also uses recently declassified official documents to gain rare insight into what gulf countries intend for their defence policies
