the western media has focused on fundamentalists as the voice of islam and helped to shape a warped stereotype of the vast majority of muslims who are actually moderate in attitudes this volume provides a corrective by explaining how de radicalization programs are being spearheaded by muslims themselves

today no single issue dominates the global political landscape as much as terrorism aware of their unique position in the newly unipolar world terrorist leaders have articulated that economic warfare is a key component of the new terrorist agenda

governments have accentuated the role of economic tools in their counter terrorism policies while maintaining emphasis on the application of military force or hard power even though such tools often prove unnecessarily blunt or even sorely inadequate given the complexity of the global threat posed by modern transnational terrorist groups combating terrorism with a mix of hard and soft power is more important than ever as an invaluable new book in terrorism studies terronomics brings together contributions from renowned international scholars and practitioners to provide a multifaceted view of contemporary financial counterterrorism and terrorist funding efforts it employs key concepts terms case studies and policy recommendations to advance our understanding of the threats and possible courses of action thus enabling us to grasp the critical financial and economic issues while providing potential counterterrorist strategies

a multi level analysis of pakistani human bombs reveals that suicide terrorism is caused by multiple factors with perceived effectiveness vengeance poverty and religious fundamentalism playing a varying role at the individual organizational and environmental levels nationalism and resistance to foreign occupation appear as the least relevant factors behind suicide terrorism in pakistan the findings of this research are based on a multi level analysis of suicide bombings incorporating both primary and secondary data in this study the author also decodes personal demographic economic and marital characteristics of pakistani human bombs on average pakistani suicide bombers are the youngest but the deadliest in the world and more than 71 percent of their victims are civilians earlier concepts of a weak link linking terrorism with poverty and illiteracy do not hold up against the recent data gathered on the post 9 11 generation of fighters in pakistan in suicidal and non suicidal categories as the majority of fighters from a variety of terrorist organizations are economically deprived and semi literate the majority of pakistani human bombs come from rural backgrounds with very few from major urban centres suicide bombings in pakistan remain a male dominated phenomenon with most bombers being single men demographic profiling of pakistani suicide bombers based on a random sample of 80 failed and successful attackers dents the notion that american drone strikes play a primary role in promoting terrorism in all its manifestations the study concludes that previous scholarly attempts to explain suicide bombings are largely based on middle eastern data thus their application in the case of pakistan can be misleading the pakistani case study of suicide terrorism demonstrates unique characteristics hence it needs to be understood and countered

through a context specific and multi level approach

we live in the age of the suicide bomber the suicide bomb itself takes more lives than any other type of explosive weapon moreover in the last 5 years more people have been killed by suicide attacks than at any other time in history how has this descent deep into the heart of terror escalated in such a way what drives people to blow themselves up and what are the consequences more importantly perhaps what can be done to combat the rising spread of this form of violence investigative journalist iain overton addresses the fundamental drivers of modern day suicide attacks in this fascinating and important book showing how the suicide bomber has played a pivotal role in the evolution of some of the most defining forces of the modern age from communism and the cold war to the modern day war on terror interviewing russian anarchists japanese kamikazes hezbollah militants survivors of suicide bombings and countless other sources of valuable information while travelling to places such as iran irak and pakistan overton skilfully combines historical narrative travelogue interviews and testimonies and brings his research alive thanks to potent facts and visceral storytelling the result is a powerful and unforgettable read the first non academic attempt to chart the rise and rise of this weapon

years after the u s invasion of iraq a loosely organized insurgency continues to target american and coalition soldiers as well as iraqi security forces and civilians with devastating results in this sobering account of the ongoing violence ahmed hashim a specialist on middle eastern strategic issues and on irregular warfare reveals the insurgents behind the widespread revolt their motives and their tactics the insurgency he shows is not a united movement directed by a leadership with a single ideological vision instead it involves former regime loyalists iraqis resentful of foreign occupation foreign and domestic islamist extremists and elements of organized crime these groups have cooperated with one another in the past and coordinated their attacks but the alliance between nationalist iraqi insurgents on the one hand and religious extremists has frayed considerably the u s led offensive to retake fallujah in november 2004 and the success of the elections for the iraqi national assembly in january 2005 have led more mainstream insurgent groups to begin thinking of reinforcing the political arm of their opposition movement and to seek political guarantees for the sunni arab community in the new iraq hashim begins by placing the iraqi revolt in its historical context he next profiles the

various insurgent groups detailing their origins aims and operational and tactical modi operandi he concludes with an unusually candid assessment of the successes and failures of the coalition s counter insurgency campaign looking ahead hashim warns that ethnic and sectarian groups may soon be pitted against one another in what will be a fiercely contested fight over who gets what in the new iraq evidence that such a conflict is already developing does not augur well for iraq s future stability both iraq and the united states must work hard to ensure that slow but steady success over the insurgency is not overshadowed by growing ethno sectarian animosities as various groups fight one another for the biggest slice of the political and economic pie in place of sensational headlines official triumphalism and hand wringing insurgency and counter insurgency in iraq offers a clear eyed analysis of the increasingly complex violence that threatens the very future of iraq
