for american teenagers getting a driver's license has long been a watershed moment separating teens from their childish pasts as they accelerate toward the sweet sweet freedom of their futures with driver's license in hand teens are on the road to buying and driving and maybe even crashing their first car a machine which is home to many a teenage ritual being picked up for a first date parking at a scenic overlook or blasting the radio with a gaggle of friends in tow so important is this car ride into adulthood that automobile culture has become a stand in a shortcut to what millions of americans remember about their coming of age machines of youth traces the rise and

more recently the fall of car culture among american teens in this book gary s cross details how an automobile obsession drove teen peer culture from the 1920s to the 1980s seducing budding adults with privacy freedom mobility and spontaneity cross shows how the automobile redefined relationships between parents and teenage children becoming a rite of passage producing new courtship rituals and fueling the growth of numerous car subcultures yet for teenagers today the lure of the automobile as a transition to adulthood is in decline tinkerers are now sidelined by the advent of digital engine technology and premolded body construction while the attention of teenagers has been captured by iphones video games and other digital technology and adults have become less tolerant of teens on the road restricting both cruising and access to drivers licenses cars are certainly not going out of style cross

acknowledges but how upcoming generations use them may be changing he finds that while vibrant enthusiasm for them lives on cars may no longer be at the center of how american youth define themselves but for generations of americans the modern teen experience was inextricably linked to this particularly american icon

this is the compelling story of an eternal city brought low of the terror and hardship of occupation and of the disparate army of partisan fighters displaced aristocrats vatican priests allied pows and ordinary citizens who battled for the liberation of rome in september 1943 following wave upon wave of allied bombing italy announced an armistice with the allies shortly afterwards the german army disarmed italian forces and despite military and partisan resistance quickly overran rome rome city in terror is a comprehensive history of the nine month long german

occupation of the city that followed the gestapo wasted no time enforcing an iron grip on the city once the occupation was in place they swiftly eliminated the carabinieri the italian paramilitary force rounded up thousands of italians to build extensive defensive lines across italy and at 5am one morning arrested more than 1 000 roman jews and sent them to auschwitz resistance however remained strong to aid the thousands of allied pows who escaped after the dissolution of the italian army priests diplomats and escaped ex pows operating out of the vatican formed a nationwide organization called the escape line more than 4 000 allied pows scattered all over italy were sheltered clothed and fed by these courageous italians whose lives were forfeit if their activities were discovered meanwhile as food became scarce and the gestapo began to raid on homes and institutions italian partisan fighters launched attack after

attack on german military units in the city with the threat of execution never far away

a gripping in depth account of the 2011 egyptian revolution through the eyes of its youthful vanguard january 25 2011 was a watershed moment for egypt and a transformative experience for the young men and women who changed the course of their nation's history tahrir's youth tells the story of the organized youth behind the mass uprising that brought about the spectacular collapse of the mubarak regime who were these activists what did they want how did the movement they unleashed shape them as it unfolded and why did it ultimately fall short of its goals rasha latif follows the trajectory of the movement from the perspective of the revolutionary youth coalition ryc a key front forged in tahrir square during the early days of the revolt drawing on firsthand testimonies and her own direct experience she offers

insight into the motives hopes strategies successes failures and disillusionments of the movement's leaders her account details the challenges these activists faced as they attempted to steer the movement they had set in motion and highlights the factors leading to their struggles defeat despite its initial promise tahrir's youth questions the belief that egypt's revolution was spontaneous and leaderless timely and necessary this study not only illuminates the uprising's leadership dynamics but also demonstrates the need for imagining new modes of revolutionary organizing for the twenty first century

today's youth are challenging the older political class around the world and are forming new political generations examples from south africa and elsewhere where peace processes were deemed to be successful show signs of youth disapproval of the current post conflict conditions

moreover the arab spring witnessed numerous youth movements emerge in authoritarian and illiberal contexts this book was prepared in light of these discussions and aims to contribute to these ongoing debates on youth politics by presenting the situation of youth in the kurdistan region of iraq kri as a case study it will be the first book that specifically focuses on the iraqi kurdish youth and their political social and economic participation in kurdistan the contemporary history of the kri is marked by conflict war and ethnic cleansing under saddam hussein and the tyranny of the ba'ath regime significantly affecting the political situation of the kurds in the middle east most of the recent academic literature has focused on the broader picture or in other words the macro politics of the kurdish conundrum within iraq and beyond there is little scholarship about the kurdish population and their

socio economic conditions after 2003 and almost none about the younger generation of kurds who came of age during autonomous kurdish rule this is a generation that unlike their forebears has no direct memory of the decades long campaigns of repression studying and examining the rise of this generation of kurdish young millennials generation 2000 who came of age in the aftermath of the united states invasion of iraq offers a unique approach to understand the dynamics in a region that underwent a substantial socio political transformation after 2003 as well as the impact of these developments on the youth population pursuing different themes and lines of inquiry the contributors of the book analyze the challenges and opportunities for young men and women to fulfil their needs and desires and contribute to the ongoing quest for nationhood and nation

building in this book our aim is to bring together a variety of perspectives from local and foreign academics who have been working on pressing issues in kurdistan and beyond the chapters focus on an array of themes particularly including political participation political situation and change religiosity and extremism taken together the chapters provide us with an introduction to youth politics in kurdistan this book is just the first attempt to open academic and nonacademic debate on this subject at a time when protests around youth related issues are becoming a more prevalent method of political engagement in the region our hope is that more research follows and supplements what has not been addressed in this book especially through the introduction of first hand youth perspectives to the core of this analysis and giving them a voice in nonviolent platforms contents foreword youth in the kurdistan region and

their past and present roles karwan jamal tahir kurdish youth as agents of change political participation looming challenges and future predictions shivan fazil and bahar baser chapter 1 youth political participation and prospects for democratic reform in iraqi kurdistan munir h mohammad chapter 2 social media youth organization and public order in the kurdistan region of iraq megan connelly chapter 3 constructing their own liberation youths reimagining of gender and queer sexuality in iraqi kurdistan hawzhin azeez chapter 4 kurdish youth and civic culture support for democracy among kurdish and non kurdish youth in iraq dastan jasim chapter 5 youth and nationalism in the kurdistan region of iraq sofia barbarani chapter 6 an elitist interpretation of krg governance how self serving kurdish elites govern under the guise of democracy and the subsequent implications for representation and

drawing on fieldwork conducted in moscow and st petersburg among the political opposition s youth group oborona defence this ground breaking work brings forward a multifaceted and colourful image of the life of political opposition activists in a restricted political environment existing studies on youth political activism in russia have mainly dealt with the pro kremlin youth movements such as nashi while youth opposition activism has been studied very little lyttikäinen contributes to this gap by showing how youth are also actively organizing against the current government and how russian oppositional youth activist practices are diverse and constantly evolving theoretically this

book contributes to discussions on activist identities as well as to an understanding of social movements and protest by analysing political protests as social performances the research illustrates how soviet continuities and liberal ideas are entangled in russian political activism to create new post socialist political identities and practices it also questions the idea of russian democratization being tied to its totalitarian past and that of western type liberal democracy being the goal of this process instead the book proposes that russian political culture should be analysed on its own and as an entanglement of various interacting systems of thought

a comprehensive timely and entertaining account of the political cultural and economic dynamics of more than 30 discrete countries of the western hemisphere this book is updated each year providing students with the most recent

information possible the information is presented in an objective balanced non ideological context allowing the readers to formulate their own opinions in addition to examining individual countries the book views latin america as a mosaic region as a whole and emphasizes its growing influence on the world stage besides providing accurate and timely information on the historical and political forces that have shaped each nation it also examines the leading cultural figures and forces from 18th century writers to 20th century composers and singing stars to 21st century filmmakers and actors finally it describes the social and economic challenges that continue to afflict this exciting and emerging region

this book examines how the young in northeast asia engage with the political especially in terms of the production reformulation or contestation of their national identities through case studies covering china japan

south korea north korea and taiwan the contributions provide a study of the online spaces where youth engage with current debates regarding national identities the book also unpacks the distinctive forms of expression and negotiation of national identities favoured by younger generations across northeast asia and asks questions specifically raised by their political mobilisation for example how their public mobilisation for a given cause has forced them to rethink their place in national and global communities this book will be a valuable resource for scholars and students of east asian culture and politics media studies and youth studies the introduction of this book is freely available as a downloadable open access pdf at taylorfrancis.com under a creative commons attribution non commercial no derivatives cc by nc nd 4 0 license
