enacted nearly fifty years ago the civil rights act codified a new vision for american society by

formally ending segregation and banning race and gender discrimination in the workplace but how much change did the legislation actually produce as employers responded to the law did new and more subtle forms of inequality emerge in the workplace in an insightful analysis that combines history with a rigorous empirical analysis of newly available data documenting desegregation offers the most comprehensive account to date of what has happened to equal opportunity in america and what needs to be done in order to achieve a truly integrated workforce weaving strands of history cognitive psychology and demography documenting desegregation provides a compelling exploration of the ways legislation can affect employer behavior and produce change authors kevin stainback and donald tomaskovic devey use a remarkable historical record data from more than six million workplaces collected by the u s equal employment opportunity commission eeoc since 1966 to present a sobering portrait of race and gender in the american workplace progress has been decidedly uneven black men black women and white women have prospered in firms that rely on educational credentials when hiring though white women have advanced more quickly and white men have hardly fallen behind they now hold more managerial positions than they did in 1964 the authors argue that the civil rights act s equal opportunity clauses have been most effective when accompanied by social movements demanding changes eeoc data show that african american men made rapid gains in the 1960s at the height of the civil rights movement similarly white women gained access to more professional and managerial jobs in the 1970s as regulators and policymakers began to enact and enforce gender discrimination laws by the 1980s however racial desegregation had stalled reflecting the dimmed status of the civil rights agenda racial and gender employment segregation remain high today and alarmingly many firms particularly in high wage industries seem to be moving in the wrong direction and have shown signs of resegregating since the 1980s to counter this worrying trend the authors propose new methods to increase diversity by changing industry norms holding human resources managers to account and exerting renewed government pressure on large corporations to make equal employment opportunity a national priority at a time of high unemployment and rising inequality

traditionally narratives of war have been male sharon talley writes in the pages that follow she goes on to disrupt this tradition offering close readings and comparative studies of fourteen women's diaries from the civil war era that illuminate women's experiences in the confederacy

during the war while other works highlighting individual diaries exist and talley notes that there has been a virtual explosion of published primary sources by women in recent years this is the first effort of comprehensive synthesis of women's civil war diaries to attempt to characterize them as a distinct genre deeply informed by autobiographical theory as well as literary and social history talley's presentation of multiple diaries from women of differing backgrounds illuminates complexities and disparities across female wartime experiences rather than perpetuating overgeneralizations gleaned from a single diary or preconceived ideas about what these diaries contain to facilitate this comparative approach talley divides her study into six sections that are organized by location vocation and purpose diaries of elite planter women diaries of women on the texas frontier diaries of women on the confederate border diaries of espionage by women in the south diaries of women nurses near the battlefield and diaries of women missionaries in the port royal experiment when read together these writings illustrate that the female experience in the civil war south was not one but many women's diaries from the civil war south a literary historical reading is an essential text for scholars in women's studies autobiography studies and civil war studies alike presenting an in depth and multifaceted look at how the civil war reshaped women's lives in the south and how their diverse responses shaped the course of the war in return

more than 150 years after its end we still struggle to understand the full extent of the human toll of the civil war and the psychological crisis it created in aberration of mind diane miller sommerville offers the first book length treatment of suicide in the south during the civil war era giving us insight into both white and black communities confederate soldiers and their families as well as the enslaved and newly freed with a thorough examination of the dynamics of both racial and gendered dimensions of psychological distress sommerville reveals how the suffering experienced by southerners living in a war zone generated trauma that in extreme cases led some southerners to contemplate or act on suicidal thoughts sommerville recovers previously hidden stories of individuals exhibiting suicidal activity or aberrant psychological behavior she links to the war and its aftermath this work adds crucial nuance to our

understanding of how personal suffering shaped the way southerners viewed themselves in the civil war era and underscores the full human costs of war
