the four decades of neoliberalism globalisation and financialisation have produced crises financial and pandemic and rising inequality the climate emergency threatens the future of the planet this book explores many dimensions of the background to these crises there is the development of policy agendas to address the climate emergency the rise in inequality is studied in terms of impacts of financialisation and the relationships between growth and inequality the record of the neoliberal experiment in the usa is critically examined the roles of financial institutions including public banks and micro finance are explored as is the need for improved financial oversight in the economic and monetary union the growth of global value chains has been a major aspect of globalisation and the question is examined of whether such chains provide a ladder for development globalisation has also featured trade imbalances and large capital flows and their causes and effects are examined with respect to china and south africa respectively this volume will be of great value to students scholars and professionals interested in political economy economic thought climate change sustainability and business studies the chapters in this book were originally published as a special issue of the journal *international review of applied economics*

the number of elderly and disabled adults who require assistance with day to day activities is expected to double over the next twenty five years as a result direct care workers such as home care aides and certified nursing assistants cnas will become essential to many more families yet these workers tend to be low paid poorly trained and receive little respect is such a workforce capable of addressing the needs of our aging population in who will care for us economist paul osterman assesses the challenges facing the long term care industry he presents an innovative policy agenda that reconceives direct care workers work roles and would improve both the quality of their jobs and the quality of elder care using national surveys administrative data and nearly 120 original interviews with workers employers advocates and policymakers osterman finds that direct care workers are marginalized and often invisible in the health care system while doctors and families alike agree that good home care aides and cnas are crucial to the well being of their patients the workers report poverty level wages erratic schedules exclusion from care teams and frequent incidences of physical injury on the job direct care workers are also highly constrained by policies that specify what they are allowed to do on the job and in some states are even prevented from simple tasks such as administering eye drops osterman concludes that broadening the scope of care workers duties will simultaneously boost the quality of care for patients and lead to better jobs and higher wages he proposes integrating home care aides and cnas into larger medical teams and training them as health coaches who educate patients on concerns such as managing chronic conditions and transitioning out of hospitals

osterman shows that restructuring direct care workers jobs and providing the appropriate training could lower health spending in the long term by reducing unnecessary emergency room and hospital visits limiting the use of nursing homes and lowering the rate of turnover among care workers as the baby boom generation ages who will care for us demonstrates the importance of restructuring the long term care industry and establishing a new relationship between direct care workers patients and the medical system
