a deeply affecting memoir and a unique contribution to our understanding of the palestinian israeli conflict in august 2000 emma williams arrived with her three small children in jerusalem to join her husband and to work as a doctor a month later the second palestinian intifada erupted for the next three years she was to witness an astonishing series of events in which hundreds of thousands of lives including her own were turned upside down williams lived on the very border of east and west jerusalem working with palestinians in ramallah during the day and spending evenings with israelis in tel aviv weaving personal stories and conversations with friends and colleagues into the long and fraught political background williams powerful memoir brings to life the realities of the palestinian israeli conflict she vividly recalls giving birth to her fourth child during the siege of bethlehem and her horror when a suicide bomber blew his own head into the schoolyard where her children played each day understanding in her judgment yet unsparing in her honesty williams exposes the humanity as well as the hypocrisy at the heart of both sides experiences anyone wanting to understand this intractable and complex dispute will find this unique account a refreshing and an illuminating read

presents the history of modern palestine and biographies of important palestinians

click here to read an excerpt from the book i have long tried to understand why the arab israeli conflict has not been resolved despite many attempts at regional and international negotiations since the time of the mandate the conflict has persisted and the palestinians

still do not have a state the continuation of the palestinian question within the more general context of this issue places it at the heart of the conflict and this is the reason why i centered my analysis on the israelis and just the palestinians instead of all the arab states in the region lack of a solution to the arab israeli conflict may thus be associated with absence of a state for the palestinians my case study begins with a brief introduction to trends in negotiations after which i come to my central research question why despite all these attempts at negotiation had the arab israeli conflict not been resolved i had a feeling the problem might have to do with beliefs that is both sides to the conflict held and some still hold maximalist beliefs about having the whole of what was mandated palestine for themselves both sides have made advances toward peace but the conflict continues and the palestinians still do not have a state i assumed that unless both sides changed their beliefs regarding territory there would be no resolution to the conflict in my view change was not a matter of eliminating a belief but changing the priority of one belief over another i e to believe in peace instead of believing in having all the land of palestine before developing some ideas about beliefs in the next section i reviewed some of the literature in international relations that dealt with conflict analysis two of the more popular ones are the realist approach and organizational theory realist theorists hans morgenthau and kenneth waltz examine conflict in terms of maximizing interests in particular power see introduction their approaches can explain situations where interests are clear cut but power cannot always impose itself as is seen by international attempts at negotiation or even israel s efforts to impose a solution on the palestinians organizational theory does not necessarily explain situations where state or government bureaucracies don t exist e g with the palestinians during the time of the mandate i then decided to go ahead and see what beliefs had to offer to conflict analysis in the section following the realist and organization discussion i looked at beliefs from the standpoint of belief system theorists in international relations and from the psychological approaches that influenced them in order to better examine beliefs and be able to use them to explain this conflict and perhaps others later i formulated four questions and then looked at what belief system theorists and psychologists

had to say about them how were beliefs formed were they consistent with behavior could they change and if so how two of the major theories in psychology were looked at attribution and learning see introduction for more on these approaches from these two approaches we can learn much about how beliefs are formed and in so doing how they can change for example in interpreting incoming information individuals tend to attribute causes to explaining event this causation process implies some reasoning ability and facilitates learning one problem with attribution theory is that it indicates what an individual should do but the person is not always so careful in causal analysis still the approach is valuable to understanding beliefs these theories also highlight the importance of experience as the past is so often the source of recurrent behavior for any successful negotiation communicat

since the arab uprisings of 2011 palestinian youth movements have formed unofficial and leaderless networks of political activism using the internet to mobilise and bring together three generations of palestinian activists this book focuses on three key case studies that have marked a turning point in the development of youth organised and grassroots palestinian politics the 15 march movement in gaza the palestinians for dignity movement in the west bank and the praver movement of young palestinians in israel drawing on extensive fieldwork composed of interviews with leading palestinian activists in the west bank and gaza and detailed analysis of social media patterns this book offers a fresh reading of palestinian youth and their central online and offline role in popular protests against both israeli and palestinian power structures

this volume corrects the historical record of anti semitism revealing recent scholarly consensus on the hottest issues of the israel palestine conflict especially human rights

the west bank barrier is expected to be completed in 2010 declared illegal by the united nations international court of justice this network of concrete walls trenches and barbed wire fences could permanently redraw one of the most disputed property lines in the middle east the green line that separates israel and the west bank to israel the security fence is

intended to keep palestinian terrorists from entering its territory but to palestinians the apartheid wall that sliced through orchards and houses and cuts off family members from one another is a land grab in this comprehensive book backmann not only addresses the barrier s impact on ordinary citizens but how it will shape the future of the middle east though it promises security to an israeli population weary of terrorism it also is responsible for the widespread destruction of palestinian homes and farmland with its byzantine checkpoint regulations it has also severely crippled the palestinian economy and most urgent the barrier often deviates from the green line appropriating thousands of acres of land effectively redrawing the boundary between the west bank and israel backmann interviews israeli policy makers politicians and military personnel as well as palestinians living throughout the west bank telling the stories not only of the barrier s architects but also of those who must reckon with it on a day to day basis on the ground with bold brilliant and often impassioned reportage a wall in palestine renders the west bank barrier its purpose its efficacy its consequences as no book before

strongdocuments from the classified papers leaked to al jazeera in january give the clearest account yet of what really goes on in middle east peace talks including revealing off the record remarks made by condoleezza rice tony blair mahmoud abbas and other key players in january 2011 al jazeera television published 1 600 pages of confidential papers and memoranda from the last five years of peace negotiations between israel and the palestinians this book presents complete texts of a number of the most important papers along with an analysis that reveals a complex tortuous and so far unproductive palestine israeli peace process in a rare unfiltered look at a current topic as it unfolds issues discussed include the israeli illegal settlements the hamas rockets the israeli wall the invasion of gaza the rights of palestinian refugees and the move to define israel as an exclusively jewish state for the first time it is possible to compare public utterances such as the settlements must go from palestine and we want the palestinians to have a viable state from israel and the u s with the very different views expressed in confidential meetings and

memoranda

there is a common perception that the muslim conquest of palestine in the seventh century caused a decline in the number and prosperity of settlements throughout the country the role played by archaeology in perpetuating this view claims magness is particularly insidious because it is perceived rightly or wrongly as providing scientific and therefore objective data thus archaeological evidence is frequently cited by scholars as proof or confirmation that palestine declined after the muslim conquest and especially after the rise of the abbasids in the mid eighth century instead magness argues that the archaeological evidence freed insofar as possible of political and or religious biases supports the idea that palestine and syria experienced a tremendous growth in population and prosperity between the mid sixth and mid seventh centuries such a radical shift in the interpretation of the evidence guarantees that this volume will be a benchmark with which future interpretations must reckon the book includes a cd with map and key which provides additional information regarding the sites studied and the area examined

the christian faith has the allegiance of one third of the human race it has succeeded in influencing civilization to such a degree that we now take its existence almost for granted yet it might all have been so different christianity began with the words and deeds of an obscure village carpenter s son who died a shameful criminal s death at the hands of the roman occupiers of his country itself an insignificant outpost of the powerful ruling empire the feverish land of biblical palestine awash with apocalyptic expectations of deliverance from its foreign overlords was hardly short of seers and prophets who claimed to be sent visions from god yet the followers of this man thought he was different so different in fact that some years after his death and asserted resurrection they scandalously insisted not only that he was sent by god but that he was god how a provincial sect with its seemingly outrageous ideas became first the sanctioned religion of the roman empire and then over the course of 2000 years the creed of billions of people is the improbable story that this book tells it is a story of freethinkers friars fanatics and firebrands and of the lay people not just the clerical or the powerful who have made up the great mass of christians over the centuries many introductions to christianity are written by christians for christians this

elegant textbook by contrast shows that the history of the religion while often glorious is not one of unimpeded progress but something still more remarkable flawed and human

theologies of liberation in palestine israel is a challenging collection of essays concerned with the development of contextualized theologies of liberation in palestine and the indigenous palestinian people s struggle for justice and liberation the innovation of the work stems from the inclusion of indigenous perspectives within its remit and the introduction of new concepts such as civil liberation theology the collection offers other ways to look at biblical discourses and their impact on the ongoing conflict ways to live peacefully ways to be ethical when visiting these conflicted lands understandings of resource ethics and even a new way to understand how we approach our understanding of liberation theology contributors includewell known scholars from muslim jewish christian palestinian israeli indian american and british backgrounds this work goes beyond typical academic collections vast in scope it will be informative not only to scholars and students but also to peace activists and policymakers it should be of use not only in academic courses but also for practitioners of conflict resolution peace and reconciliation

a New York Times bestseller the world's leading intellectual offers a probing examination of the waning American century the nature of U.S. policies post 9/11 and the perils of valuing power above democracy and human rights in an incisive thorough analysis of the current international situation Noam Chomsky argues that the United States through its military first policies and its unstinting devotion to maintaining a world spanning empire is both risking catastrophe and wrecking the global commons drawing on a wide range of examples from the expanding drone assassination program to the threat of nuclear warfare as well as the flashpoints of Iraq Iran Afghanistan and Israel Palestine he offers unexpected and nuanced insights into the workings of imperial power on our increasingly chaotic planet in the process Chomsky provides a brilliant anatomy of just how U.S. elites have grown ever more insulated from any democratic constraints on their power while the broader population is lulled into apathy diverted to consumerism or hatred of the vulnerable the corporations and the rich have increasingly been allowed to do as they please fierce unsparing and meticulously documented *Who Rules the World* delivers the indispensable understanding of

the central conflicts and dangers of our time that we have come to expect from chomsky

in this scathing analysis of israel palestine coverage in the us media howard friel and richard falk reveal the persistent ways the new york times has ignored principles of international law in order to shield its readers from israel s lawlessness while the times publishes dozens of front page stories and extensive commentary on the killings of israelis it publishes very few such stories on the killings of palestinians and mostly ignores the extensive documentation of massive violations of palestinian human rights by the government of israel furthermore the times regularly ignores or under reports a multitude of critical legal issues pertaining to israel s policies including israel s expropriation and settlement of palestinian land the two tier system of laws based on national origin evocative of south africa s apartheid regime the demolition of palestinian homes and use of deadly force against palestinians these journalistic practices have not only shielded the extent of

israel's transgressions from the american electorate which is israel's main source of financial and military support it has severely diminished our understanding of the middle east and of us foreign policy in general

founded in 1929 the jewish agency played a central role in the founding of the state of israel throughout the 1920s 30s and 40s many secret meetings took place between the ja

and arab leaders and elites the dominant narrative claims that syrian leaders and elites were not involved in any such meetings however this book reveals for the first time that a multitude of secret meetings and negotiations took place including with the syrian national block the official syrian leadership at the time and the shahbandari opposition and leaders of jabal al druze based mainly on primary sources from israeli archives including documentation of discussions reports and decisions taken by the ja leadership the book tells a new story of a critical period of history the arab revolt of 1936 1939 in palestine mahmoud muhareb argues that the main historic objective of the ja was to reach agreements with arab leaders and arab states behind the back of the palestinians and at their expense and to normalize its relations with the arab states while it continued to deny the national rights of the palestinians the book challenges israeli and syrian official narratives and substantiates the palestinian narrative as well as some israeli new historians who asserted israel refusal to recognize the national rights of the palestinians and affirmed its attempts to reach a comprehensive settlement with the arab states at the expense of the palestinians the book includes arabic and hebrew sources translated into english for readers

the routledge atlas of the arab israeli conflict traces not only the tangled and bitter history of the arab jewish struggle from the early 20th century to the present it also illustrates the move towards finding peace and the efforts to bring the horrors of the fighting to an end through negotiation and proposals for agreed boundaries through 167 maps the complete history of the conflict is revealed including the prelude and background to the conflict from the siting of the palestinian jews before the arab conquest to the attitude of britain to the arabs between 1917 and the present the jewish national home from the zionist plan for palestine in 1919 to the state of the arab world from 1945 to 1962 the intensification of the conflict from the arab response to the un partition plan of 1947 to the first steps towards the independence of israel in 1948 the state of israel from the israeli war of independence and the six day war to the horrific war of yom kippur and the intifada the moves to find peace from camp david to the escalating troubles of the present day including the geneva peace plan and the construction of the security fence with a new index and accompanied by powerful and compelling quotations this clear illuminative and highly informative new edition from martin gilbert is an absolute must for all students of history

professor penkower s latest book decision on palestine deferred offers the first sustained documented account of palestine and the anglo american alliance during the second world war firmly grounded in three decades of archival research his spirited narrative offers a fascinating cast of characters against the backdrop of the larger middle eastern context the latter relates to jewish and arab activities during the war the grave threat of erwin rommel s afrika korps u s interest in saudi arabian oil and the effort to achieve arab unity zionism s shift to viewing the united states as the center of decision making in international affairs

and hence the archimedean point for forging jewry s destiny occurred in these same six years british anxieties about imperial security while administering the palestine mandate by means of a stringent immigration quota jostled with the first american steps taken to formulate a stance vis □ vis palestine and the region as a whole the differing approaches of churchill and roosevelt to the palestine imbroglio are also explored as are the varied avenues that were then championed within the jewish camp the impact of the holocaust with both governments breathing the very spirit of defeatism and despair surfaces throughout

operation protective edge launched on july 8 2014 saw heavy fighting between the israel defense forces and hamas in gaza throughout the war us government media spokespersons confirmed israels right to self defense against rockets and tunnels and condemned hamas for initiating the conflict and its use of human shields but there is an important difference between confirmation and pro active demonstration at the highest political level the longstanding alliance between the united states and israel has always been subject to the administration and president of the day in this case the obama administrations support for israels right to self defense was qualified and as a result the israeli political leadership felt constrained in its ability to defeat hamas militarily without risking criticism from the united states that would impact negatively on the special relationship in its role as ally the united states was careful not to apply direct political pressure on israel however us government public criticisms relating to gazan civilian loss of life damaged israel on the international stage via harrowing media coverage surrounding the conflict the federal aviation administration order to airlines to stop flying to israel enhanced hamas claim that it had inflicted a strategic defeat to the zionist state for the last 70 years israel has recognized that the united states is its primary strategic ally a principle initiated by israels first prime minister and defense minister david ben gurion political and military policies have to be directed to prevent a rift but the protective edge experience has brought to the fore that in

times of crisis israel cannot rely on a special relationship to secure its safety and must of necessity possess the political will and military ability to defend itself and to take actions that may result in a strained relationship
