born in 1945 the United Nations came to life in the Arab world it was there that the UN dealt with early diplomatic challenges that helped shape its institutions such as peacekeeping and political mediation it was also there that the UN found itself trapped in and sometimes part of tensions in key international conflicts in the cold war and post cold war periods

such as hostilities between Palestine and Iraq and between Libya and Syria much has changed over the past seven decades but what has not changed is the central role played by the UN this book's claim is that the UN is a constant site of struggle in the Arab world and equally that the Arab world serves as a location for the UN to define itself against the shifting politics of its age looking at the UN from the standpoint of the Arab world this volume collects some of the finest scholars and practitioners writing about the potential and the problems of a UN that is framed by both the promises of its charter and the contradictions of its member states this is a landmark book a close and informed study of the UN in the region that taught the organization how to do its many jobs

this comprehensive history of the U.S. Agency for International Development the U.S. government's official bilateral foreign aid agency deserves to be read by all students of U.S. foreign policy foreign affairs U.S. foreign aid is one of the most important functions of our federal government consuming less than 1% of the federal government budget it has nonetheless played an outsized role in political debate at the center of this confusion misunderstanding has been the U.S. Agency for International Development or AID the government agency created during the Kennedy administration to administer America's foreign assistance

programs an often conflicted behemoth with a presence spanning the globe in this book journalist and foreign policy expert john norris provides a compelling and rich story of aid warts and all there have been moments of enormous triumph the eradication of smallpox the green revolution efforts to bring family planning to millions of women for the first time there have also been florid headline grabbing failures in places like vietnam and iraq missteps born out of i g ethnocentrism and money that flowed into the coffers of despots like president mobutu in zaire in totality the work of aid has touched millions and millions of lives in ways that have been truly profound both good and bad on the eve of aid s 60th anniversary norris shares history on an almost epic scale that remains largely untold a concise and powerful account of how the great

recession happened and what should be done to avoid another one well argued and consistently informative wall street journal the great american recession of 2007 2009 resulted in the loss of eight million jobs and the loss of four million homes to foreclosures is it a coincidence that the united states witnessed a dramatic rise in household debt in the years before the recession that the total amount of debt for a m e r doubled between 2000 and 2007 to 14 trillion definitely not armed with clear and powerful evidence atif mian and amir sufi reveal in house of debt how the great recession and great depression as well as less dramatic periods of economic malaise were caused by a large run up in household debt followed by a significantly large drop in household spending though the banking crisis captured the public s attention mian and sufi argue strongly with actual data that current

policy is too heavily biased toward protecting banks and creditors increasing the flow of credit they show is disastrously counterproductive when the fundamental problem is too much debt as their research shows excessive household debt leads to foreclosures causing individuals to spend less and save more less spending means less demand for goods followed by declines in production and huge job losses how do we end such a cycle with a direct attack on debt n say mian and sufi we can n be rid of painful bubble and bust episodes only if the financial system moves away from its reliance on inflexible debt contracts as an example they propose new mortgage contracts that are built on the principle of risk sharing a concept that would have prevented the housing bubble from emerging in the first place thoroughly grounded in compelling economic evidence house of debt offers convincing answers to some of the

most important questions facing today's economy why do severe recessions happen could we have prevented the great recession and its consequences and what actions are needed to prevent such crises going forward

depending on their
incentives and context
because such institutions
are neither inherently good
nor inherently bad joireman
develops a set of
measurement criteria to
assess which types of
property regimes and
enforcement
are helpful and which are
harmful to social welfare by
focusing on the varieties of
property rights enforcement
in ghana kenya and uganda
joireman moves beyond
simply evaluating the
effectiveness of official
property rights laws
provocatively she also

challenges the premise that
changes in property law will
lead to changes in property
rights on the ground indeed
states that change their
property laws face
challenges in
implementation when they
do not control the authority
structures in local
communities
original research on the
competitors to state power
in sub saharan africa and
the challenges of providing
secure and defensible
property rights where there
is no government is a
sharp analysis of one of the
most daunting challenges
facing the african
subcontinent today
urban and regional policy
and its effects the third in
a series sets out to inform
policy makers
and scholars about the
effectiveness of select
policy approaches reforms
and experiments in
addressing key social and
economic problems facing
cities suburbs and
metropolitan areas the
chapters analyze responses

to five key policy challenges
that most metropolitan
areas and local communities
face creating quality
neighborhoods for families
growing the middle class
enlarging a competitive
economy through industry
based strategies managing
the spatial pattern of
metropolitan growth and
development each chapter
discusses a specific topic
under one of these
challenges the authors
present the essence of
what is known as well as
its likely applications and
identify the knowledge gaps
that need to be filled for
the successful formulation
and implementation of
urban and regional policy
