this book analyzes the civil war in yemen and how intervening external actors have shaped the trajectory of the conflict the work examines the conflict in yemen as a

testing ground for expectations about the autonomy and control of proxies by external patrons and the direct consequences for civilian victimization and duration of war like other proxy wars the international dimensions of the war made the conflict in yemen subject to the geopolitical interests of intervening powers the longstanding power rivalry between saudi arabia and iran over middle east supremacy resulted in a competitive intervention in yemen where the initial belligerents of the civil war the houthi and the hadi regime were used as proxies by tehran and the gulf coalition led by riadh respectively their intervention ultimately translated into a prolonged and destructive conflict the often contradictory and self interested patronage strategies by the coalition s two central patrons saudi arabia and the united arab emirates undermined their broader goal of containing iran however iran s support for the

houthis enabled them to bait and bleed the gulf coalition lastly in an effort to balance against iran the united states underwrote the military campaign of the gulf states with military hardware and personnel thereby further prolonging the conflict and humanitarian disaster this book concludes that intervention by external patrons both protracted the civil war and made it far more destructive for the civilian population this book will be of much interest to students of proxy wars middle eastern conflict and security studies in general

yemen land ownership and agriculture laws handbook

the significance of the persian gulf to international peace and security and to the global energy market cannot be overstated events such as the attacks of september 11 and the rise in energy demand and prices have only highlighted the importance of stability in the gulf to the

health of the global economy this book demonstrates that the nature of military and political threats in the gulf states bahrain saudi arabia iran iraq qatar yemen and the uae has shifted during the past three years although the threat from saddam hussein s iraq which produced three recent major conventional wars iran iraq 1980 88 persian gulf 1990 and iraq 2003 has largely disappeared it has been replaced by concerns over the asymmetric warfare conducted by terrorist organizations and over the proliferation of wmds by both states and terrorists these developments are affecting the defense planning and strategic posture of each country and this book analyzes developments in the force structures of the gulf states and their ability to deal with this shift in the nature of the threat the military and security forces of the gulf states must evolve to adapt to the changing nature of the threat and take into account

the risk of the iraq insurgency and the uncertainty surrounding iraq s future the key areas covered in this book include the internal terrorist threat to saudi arabia and the gulf states the impact of iran s nuclear program and the risk it poses to energy and internal security in the gulf area and border disputes within the region that could develop into conflict in addition the book studies the impact of the iraq war on regional security and the fear of the insurgency spilling over into neighboring states cordesman and al rodhan demonstrate a shift toward using internal security services to deal with the threat of extremism and asymmetric warfare they also suggest that high energy prices and export revenues provide the gulf countries the opportunity to upgrade their military forces and deal with their undercapitalization as a result of low oil prices in the 1990s moreover they insist that the future of iraq the

strategic and nuclear posture of iran and the terrorist threat will remain major risks and uncertainties in the short to medium run

proxy warfare is a growing international phenomenon although states have used proxies in armed conflicts for centuries evolving regional and global security architecture is now forcing states to radically change the way contemporary conflicts are fought based on ten case studies this reassesses exactly how these changing global and systemic factors are shaping the ways in which states use non state actors as proxies in their armed conflicts examining the use of proxy warfare worldwide focusing on the last decade s conflicts this volume brings together contributions from scholars of international relations and global security studies in order to explore cases of armed conflict of particular regional and global significance these include recent developments

in the conflict in israel and palestine the central african republic libya mali central asia syria ukraine nagorno karabakh brazil and yemen by drawing on both theory and practise it offers a re evaluation of contemporary understanding of outsourced warfare with policy implications for how we understand and negotiate with states using proxy warfare in the future

what threat does al qaeda pose to the united states as it continues to evolve in the wake of the arab spring and what are the group s evolving strategies for growth and survival internationally this book provides answers ideal for both students of terrorism and general readers wanting to better understand modern terrorism this book provides an in depth look at al qaeda including its origins evolution doctrines structure and terrorist operations the authors examine al qaeda s operational transitions over

the last two decades and consider these changes in terms of the impact of the internet the viciousness of the violence employed the leverage of colonial past and the subsequent international implications particular attention is paid to al qaeda s changing strategies for growth and survival across the middle east and africa as well as the threats that it poses to the united states as it continues to evolve in the wake of the arab spring the work addresses why al qaeda now both a professional force and a network of so called lone wolves must remain a primary focus of the united states and other western states while also recognizing that the threat of terrorism goes beyond al qaeda

yemen is in the grip of its most severe crisis in years the civil war between the huthi rebels and the western and arab supporters of the regime has resulted in thousands killed and three million

displaced those who remain suffer severe food shortages and a collapsed economy the struggle for power in the arab world s poorest but strategically vital nation has serious implications for the region and beyond while egypt and saudi arabia fear that a huthi takeover would threaten free passage of oil through the bab al mandab strait western governments fear a rise of attacks from al qa ida and is as the country becomes more unstable in this invaluable analysis helen lackner uncovers the social and political conflicts that threaten the very survival of the state and its people she reveals the corruption of the country s us backed autocratic regime and how it failed to address national impoverishment and to plan an equitable economy for yemen s growing population

based on more than two years of fieldwork conducted in a yemeni community in southeastern michigan this unique study examines yemeni american girls attempts to construct and make sense of their identities as yemenis muslims americans daughters of immigrants teenagers and high school students all american yemeni girls contributes substantially to our understanding of the impact of religion on students attending public schools and the

intersecting roles school and religion play in the lives of yemeni students and their families providing a valuable background on the history of yemen and the migration of yemeni people to the united states this is an eye opening account of a group of people we hear about every day but about whom we know very little through a series of intensive interviews and field observations loukia k sarroub discovered that the young muslim women shared moments of optimism and desperation and struggled to reconcile the america they experienced at school with the yemeni lives they knew at home most significant sarroub found that they often perceived themselves as failing at being both american and yemeni offering a distinctive analysis of the ways ethnicity culture gender and socioeconomic status complicate lives sarroub examines how these students view their roles within american and yemeni

societies between institutions such as the school and the family between ethnic and islamic visions of success in the united states sarroub argues that public schools serve as a site of liberation and reservoir of contested hope for students and teachers questioning competing religious and cultural pressures the final chapter offers a rich and important discussion of how conditions in the united states encourage the rise of extremism and allow it to flourish raising pressing questions about the role of public education in the post september 11 world all american yemeni girls offers a fine grained and compelling portrait of these young muslim women and their endeavors to succeed in american society and it brings us closer to understanding an oft cited but little researched population

the quest for global hegemony starts there the region that pumps the heart of the cold war 1941 1960 birthing revolution a genealogy of the 1962 coup wrong from the start modernization and development and the violence they spun making yemen dance the regime and the politics of chaos plundering yemen and its post spring hiatus coda yemen s relevance to the larger world

this study examines the nature of changes to yemen s power structures political dynamics and institutions since the intention to democratize was announced

in 1990 paying particular attention to the role of yemeni president ali abdullah saleh

the emerging consensus that institutions shape political and economic outcomes has produced few theories of institutional change and no defensible theory of institutional origination kiren aziz chaudhry shows how state and market institutions are created and transformed in saudi arabia and yemen two countries that typify labor and oil exporters in the developing worlds in a world where the international economy dramatically affects domestic developments the question of where institutions come from becomes at once more urgent and more complex in both saudi arabia and yemen fundamental state and market institutions forged during a period of isolation at the end of world war i were destroyed and reshaped not once but three times in response to exogenous shocks comparing boom bust

cycles chaudhry exposes the alternating social and organizational origins of institutions arguing that both broad changes in the international economy and specific forms of international integration shape institutional outcomes labor and oil exporters thus experience identical economic cycles but generate radically different state market and financial institutions in response to different resource flows chaudhry supplemented years of field work in saudi arabia and yemen with extensive analysis of previously unavailable materials in the saudi national archives

alternative forms of government and statehood exist in the middle east and north african regions the chapters in this volume demonstrate this and explore the notion of power from a non statist perspective highlighting the limits of states and their governance using empirical evidence from syria

libya lebanon tunisia iraq yemen and mali the authors explore non standard cases where power may be retained by a state but must be shared with a number of local actors resulting in limited statehood and hybrid governance which leads to competition and sharing of symbolic and political power within a state this book is intended to prompt a critical reflection on the meaning of governance it will illuminate informal structures which deserve attention when studying governance and power dynamics within a state or a region this book was originally published as a special issue of small wars insurgencies

this book goes beyond the headlines to explore the broad dimensions of islam looking at the vitality of the main elements of the faith across the centuries and finding the basis of today s islamic resurgence in the continuing interaction of varying styles of islam fundamentalist

this volume provides a comprehensive and interdisciplinary examination of the multilateral non proliferation export control system and the national and international context within which it functions key features

this is the first joint report on arms export controls since the present government took office in may 2010 as in previous years the report reviews the government s policy on arms exports its administration and enforcement and the adequacy or otherwise of current legislation this year the committees have paid particular attention to the government s policy of intensifying the promotion of arms exports the policy has come under scrutiny following the uprisings and demonstrations in recent weeks in north africa and the wider middle east and the

armed response made to them since january 2011 the government has been vigorously backpedalling on a number of arms export licence approvals to authoritarian regimes across the region the mps conclude that both the present government and its predecessor misjudged the risk that arms approved for export to certain authoritarian countries in north africa and the middle east might be used for internal repression the committees welcome the revocation of a number of arms export licences to bahrain egypt libya and tunisia and recommend that the government extends immediately its review of uk arms export licences for countries in north africa and the wider middle east to authoritarian regimes worldwide the government should also set out how it intends to reconcile the potential conflict of interest between increased emphasis on promoting arms exports with the staunch upholding of

human rights this book provides rich and provocative comparative studies of south and southeast asian domestic workers who migrate to other parts of asia these studies range from hong kong macau and singapore to yemen israel jordan and the uae conceptually and methodologically this book challenges us to move beyond established regional divides and proposes new ways of mapping inter asian connections the authors view migrant workers within a wider spatial context of intersecting groups and trajectories through time keenly attentive to the importance of migrants of diverse nationalities who have labored in multiple regions this book examines intimate connections and distant divides in the social lives and politics of migrant workers across time and space collectively the authors propose new themes new comparative frameworks and

new methodologies for considering vastly different degrees of social support structures and political activism and the varied meanings of citizenship and state responsibility in sending and receiving countries they highlight the importance of formal institutions that shape and promote migratory labor advocacy for workers or curtail workers rights as well as the social identities and cultural practices and beliefs that may be linked to new inter ethnic social and political affiliations that traverse and also transform inter asian spaces and pathways to mobility this book was published as a special issue of critical asian studies

south yemen has come to be seen as a potential al qaeda stronghold and at the heart of a separatist movement threatening to rip apart southern arabia how has this country of forbidding mountains and arid deserts gone from british colony to

communist state and then to terrorist base in just half a century in yemen divided author and middle east expert noel brehony tells for the first time comprehensive history of the people s democratic republic of yemen pdry he explains the power politics that came to form a communist republic a few hundred miles from the holiest site in islam and the process and conflicts that led to yemeni unification in 1990 the impact of pdry is still felt today as unrest continues to escalate across the south yemen divided is an important book for anyone wanting to understand why yemen sensitive neighbour of saudi arabia and strategically vital to middle east security has veered towards massive instability

armed non state actors ansas often have economic aims that international law needs to respond to this book looks at the aim of islamic state to create an effective

government with an economically independent regime which focused on key oilfields in syria and iraq having addressed islamic state s quest for energy resources in iraq and syria the book explores the lawfulness of the war with islamic state from a variety of legal aspects it has been attempted to make inroads into the most controversial aspects of contradictions in the application of jus ad bellum and jus in bello particularly when discussing the use of extraterritorial armed force against ansas and the obligation to protect civilian objects including the natural environment the question is whether the targeting of energy resources should be regarded as a violation of the laws of armed conflict even though the war with islamic state being classified as a non international armed conflict ambitious in scope the study argues that legal theory and state practice are still problematic as to how and

under what conditions states can justify resorting to military force in foreign territory and to what extent they can target natural resources as being part of state property furthermore it goes on to examine the differences between international and non international armed conflicts to establish whether there is any difference in the targeting of energy resources as part of the war sustaining capabilities of either party through an examination of the islamic state case the book offers a comprehensive study to close the gaps in jus in bello by contextualising the questions of civilian protection victimisation and state responsibility by evaluating the us s war sustaining theory as a justification for the destruction of a territorial state s natural resources that are occupied by ansas

this book examines novel and nonmainstream aspects of

international terrorism in africa the middle east and europe it explores issues that are not really explored in the mainstream literature such as the environmental message of terror groups the issue of female jihadists and the social media strategy of terror groups whilst old issues remain and deserves a dissident perspective like the iran nuclear deal newer issues like the impact of the abrahamic accord on the middle east comes to the fore at the same time policy makers need to be bold in responding to terror threat including pooling sovereignty when confronting a truly global threat taken together this study reflects the most up to date volume on recent development in terrorism globally

volume one of the new cambridge history of islam which surveys the political and cultural history of islam from its late antique origins until the eleventh century brings

together contributions from leading scholars in the field the book is divided into four parts the first provides an overview of the physical and political geography of the late antique middle east the second charts the rise of islam and the emergence of the islamic political order under the umayyad and the abbasid caliphs of the seventh eighth and ninth centuries followed by the dissolution of the empire in the tenth and eleventh regionalism the overlapping histories of the empire s provinces is the focus of part three while part four provides a cutting edge discussion of the sources and controversies of early islamic history including a survey of numismatics archaeology and material culture

zarathustra was one of the greatest historical personalities known to us and he forever shifted the course of civilization nevertheless publications about him are

fragmented and written for specialized academics only making them incomprehensible to the general public this book for the first time presents an easy and reader friendly view for the educated general public it examines its subject from the scientific perspective and is interested in the historical beginnings of today s monotheistic religions for the understanding of modern monotheism the one god religions we know today as judaism christianity and islam knowledge of zarathustra and his message in a larger historical context is absolutely essential zarathustra was the first prophet all other prophets came after him the greek philosophers such as plato and aristoteles spoke with great respect for him for he stands with his civility and ethics at the beginning of human civilization and friedrich nietzsche said of him the invention of morality by zarathustra was the greatest philosophical error in human
