the first book of its kind to chronicle the reasons behind iraq s descent into guerilla war warlord rule criminality and anarchy no end in sight is a shocking story of wholesale incompetence recklessness and venality culled from over 200 hours of footage collected for the film the book provides a candid and alarming retelling of the events following the fall of baghdad in 2003 by high ranking officials iraqi civilians american soldiers and prominent analysts together these voices reveal the principal errors of u s policy that largely created the insurgency and

chaos that engulf iraq today and what we could and should do about them now no end in sight marks the first time americans will be allowed inside the white house pentagon and baghdad s green zone to understand for themselves the disintegration of iraq and how arrogance and ignorance turned a military victory into a seemingly endless and deepening nightmare of a war

this volume discusses the practice of transformative military occupation from the perspective of public international law through the prism of the occupation of iraq and other cases of historical significance it seeks to assess how international law should respond to measures undertaken in the pursuit of a given transformative project whether or not supported by the security council a monographic study tackling the bulk of the international law issues that emerge during and as a result of a transformative occupation based on a comprehensive analysis of historical cases applicable norms and relevant facts with this thorough and thought provoking study andrea carcano has put us all in his debt from the foreword by georges abi saab emeritus professor graduate institute of international studies and development

rape and other forms of sexual violence have always been a feature of war yet it is only fairly recently that researchers have

identified rape as a deliberate tool of war making rather than simply an inevitable side effect of armed conflict much of the emerging literature has suggested that the underlying causes of rape stem from a single motivation whether individual symbolic or strategic leading to disagreement in the field about how we can understand and respond to the causes and consequences of sexual violence in war in rape loot pillage sara meger argues that sexual violence is a form of gender based political violence perpetrated against both men and women and a manifestation of unequal gender relations that are exacerbated by the social political and economic conditions of war she looks at trends in the form and function of sexual violence in recent and ongoing conflicts to contend that in different contexts sexual violence takes different forms and is used in pursuit of different objectives for this reason no single framework for addressing conflict related sexual violence will be sufficient taking a political economy perspective meger maintains that these variations can be explained by broader struggles over territory assets and other productive resources that motivate contemporary armed conflicts sexual violence is a reflection of global political economic struggles and can't be addressed only at the local level it must be addressed through regional and international policy she concludes by providing some initial ideas about how this can be

done via the un and national governments

whether the product of passion or of a cool headed decision to use ideas to rationalize excess the decimation of the world s libraries occurred throughout the 20th century and there is no end in sight cultural destruction is therefore of increasing concern in her previous book *libricide* rebecca knuth focused on book destruction by authoritarian regimes nazis serbs in bosnia iraqis in kuwait maoists during the cultural revolution in china and the chinese communists in tibet but authoritarian governments are not the only perpetrators extremists of all

stripes through terrorism war ethnic cleansing genocide and other forms of mass violence are also responsible for widespread cultural destruction as she demonstrates in this new book *burning books and leveling libraries* is structured in three parts part i is devoted to struggles by extremists over voice and power at the local level where destruction of books and libraries is employed as a tactic of political or ethnic protest part ii discusses the aftermath of power struggles in germany afghanistan and cambodia where the winners were utopians who purged libraries in efforts to purify their societies and maintain power part iii examines the fate of libraries when there is war and a resulting power vacuum the book concludes with a discussion of the events in iraq in 2003 and the responsibility of american war strategists for the widespread pillaging that ensued after the toppling of saddam hussein this case poignantly demonstrates the ease with which an oppressed people given the collapse of civil restraints may claim freedom as license for anarchy construing it as the right to prevail while ignoring its implicit mandate of social responsibility using military might to enforce ideals in this case democracy and freedom is futile knuth argues if insufficient consideration is given to humanitarian security and cultural concerns

this book explores the thirty year border conflict between

armenia and azerbaijan specifically around the former autonomous republic of nagorno karabakh and shows how russia is the only winner in this conflict fighting on both sides supplying arms to both sides and acting as the arbiter between the two sides the author looks at armenia azerbaijan and the separatists from military political economic and diplomatic perspectives and offers insights on how the fighting has influenced society and vice versa the book provides an update to the history of the war to include major fighting in 2020 and examines how russia obtained three military bases and most economic assets in armenia while becoming azerbaijan s major weapons supplier to the tune of six billion dollars it shows how russia has tried to sideline the internationally supported minsk negotiations in favor of russia assuming the sole role of arbiter and argues that even though russia has submitted a number of ceasefire proposals it does little to encourage the sides to implement them the book includes a discussion of international law united nations resolutions and rulings by the european court of human rights

more than 20 years have passed since iraq was invaded in an illegal war justified on the basis of falsified evidence operation iraqi freedom led to untold human suffering and massive destruction the ruinous consequences of which persist to this

rebel groups exhibit significant variation in their treatment of civilians with profound humanitarian consequences this dissertation proposes a new theory of rebel behavior and cohesion based on the internal dynamics of rebel groups rebel leaders have incentives to provide security but are often unable to prevent group members from abusing civilians leaders exert effective control over their troops when they can offer cash payments and credible future rewards to their top commanders leaders who cannot offer these incentives allow their forces to loot locals in exchange for a minimal level of loyalty the leader's ability to offer incentives that allow local security to prevail depends on partnerships with external actors such as diaspora communities and foreign governments when these patrons have a stake in the group's success they are motivated to supply financial resources to qualified trusted leaders other patrons have goals that conflict with those of the rebel client these

patrons exert leverage over the rebels by supporting low quality leaders and withholding resources that could strengthen leader control resulting in more abusive faction prone groups the type of partnership available depends on factors beyond the group's control the dissertation formalizes this theory and tests the implications in various ways using an original cross national dataset of rebel groups 1980 2003 as well as a micro level dataset of crop area during liberia's war derived through remote sensing the dissertation also traces the model's logic through a detailed analysis of liberia's rebel groups based on fourteen months of fieldwork and interviews with nearly all surviving rebel leaders and top commanders who participated in liberia's war 1989 2003

and introduction recommendations the context of insecurity the security situation immediately after the fall of basra six weeks later continuing criminality in basra legal obligation of coalition forces to provide security in iraq coalition attempts at reconstituting security in southern iraq acknowledgements

the use of international human rights machinery to protect refugees has acquired an important dimension in recent years this is true of both the united nations treaty body system and the african european and inter american regional systems of of

human rights the result is a dynamic international invigoration of traditional refugee law that in contradistinction tends to be applied at the level of national courts and tribunals yet the precise role of human rights in the protection of refugees is sometimes viewed with suspicion and uncertainty this commentary provides a valuable insight into the use of human rights in the protection of refugees through the prism of the african human rights system

a riveting documentary anthology that examines a deeply disturbing question is the united states guilty of war crimes in iraq until recently the possibility that the united states was responsible for war crimes seemed unthinkable to most americans but as previously suppressed information has started to emerge photographs from abu ghraib accounts of u s attacks on iraqi hospitals mosques and residential neighborhoods secret government reports defending unilateral aggression americans have begun an agonizing reappraisal of the iraq war and the way in which their government has conducted it drawing on a wide range of documents from the protocols of the geneva convention to fbi e mails about prisoners held in guant namo bay to executive branch papers justifying the circumvention of international law in the name of democracy examines the legality of the iraq war and the occupation that followed included in this

powerful investigation are eyewitness accounts victim testimonials statements by soldiers turned resisters and whistle blowers interviews with intelligence insiders and contributions by mark danner and seymour hersh the result is a controversial chilling anthology that explores the culpability of officials as well as the responsibilities of ordinary citizens and for the first time squarely confronts the matter of american impunity

there exists a dominant narrative that essentially defines the us relationship with genocide through what the us has failed to do to stop or prevent genocide rather than through how its actions have contributed to the commission of genocide this narrative acts to conceal the true nature of the us relationship with many of the governments that have committed genocide since the holocaust as well as the us own actions in response this book challenges the dominant narrative through a comprehensive analysis of the us relationship with genocide the analysis is situated within the broader genocide studies literature while emphasizing the role of state responsibility for the commission of genocide and the crime s ancillary acts the book addresses how a culture of impunity contributes to the resiliency of the dominant narrative in the face of considerable evidence that challenges it bachman s narrative presents a far darker relationship between the us and genocide one that has developed from the start of

the genocide convention's negotiations and has extended all the way to present day as can be seen in the relationships the US maintains with potentially genocidal regimes from Saudi Arabia to Myanmar. This book will be of interest to scholars, postgraduates and students of genocide studies, US foreign policy and human rights. A secondary readership may be found in those who study international law and international relations.

Nigeria is a bellwether in an enormous continent endowed with natural resources and human capital whose development and greatness have been marred by political instability since gaining home rule from Britain in 1960. The contemporary political, economic and social quandaries that have stultified Nigeria's growth project flows from difficulties in cultivating patriotic leaders with pluck to enact efficacious policies that will catapult the country to greater heights. Developmentally, Nigeria in the fourth republic confronting the contemporary political, economic and social dilemmas. Edited by E. Ike Udogu, examines some of the vital issues responsible for the current political malaise and recommends strategies for exculpating the country from her current political quagmires. The contributors to this book argue, inter alia, for the avoidance of false starts reminiscent of the military interventions that aborted the democracy project and advocates the enactment of effective policies to supersede

decision dictated by politics. This volume proposes national healthcare strategies to address the country's healthcare needs and for dialogue to extinguish combustible inter-religious conflicts. The book recommends ways to assuage police highway malfeasance and explains why human rights observance is critical to further national cohesion while creating space for the subalterns to have their voices heard in discourses on how to advance peaceful coexistence.

How McGehee and Associates prevented war in Ukraine by Russian invasion is a what-if. What would the world be like if Ukraine and the United States stopped Russia in its tracks with courage and determination before the Great Bear decimated Ukraine? What if President Sybil Norcroft Daniels had said no and meant it? What if she got every asset of the US and 47 other nations, McGehee and his partners and the best of the best special ops and cyber warriors involved before day one? What if she determined to bring down the Russian dictator who still in his atrophied heart was a shrewd and soulless communist apparatchik? The author can imagine such an outcome in vivid and gripping realism.

three weeks after lyndon johnson signed the civil rights act of 1964 a new york city police officer shot and killed a fifteen year old black youth inciting the first of almost a decade of black and latino riots throughout the united states in october 2005 french police chased three black and arab teenagers into an electrical substation outside paris culminating in the fatal electrocution of two of them fires blazed in parisian suburbs and housing projects throughout france for three consecutive weeks cathy lisa schneider explores the political legal and economic conditions that led to violent confrontations in neighborhoods on opposite sides of the atlantic half a century apart police power and race riots traces the history of urban upheaval in new york and greater paris focusing on the interaction between police and

minority youth schneider shows that riots erupted when elites activated racial boundaries police engaged in racialized violence and racial minorities lacked alternative avenues of redress she also demonstrates how local activists who cut their teeth on the american race riots painstakingly constructed social movement organizations with standard nonviolent repertoires for dealing with police violence these efforts along with the opening of access to courts of law for ethnic and racial minorities have made riots a far less common response to police violence in the united states today rich in historical and ethnographic detail police power and race riots offers a compelling account of the processes that fan the flames of urban unrest and the dynamics that subsequently quell the fires

in this powerful and passionate critique of the war on terror in afghanistan and its extensions into palestine and iraq derek gregory traces the long history of british and american

involvements in the middle east and shows how colonial power continues to cast long shadows over our own present argues the attacks on the world trade center and the pentagon on september 11 activated a series of political and cultural responses that were profoundly colonial in nature the first analysis of the war on terror to connect events in afghanistan palestine and iraq traces the connections between geopolitics and the lives of ordinary people richly illustrated and packed with empirical detail

the war in ethiopia s northern region of tigray began in november 2020 it inflicted more casualties than any other contemporary conflict in the world it has also been among the least understood the fighting and accompanying blockade led to an estimated 600 000 deaths more than the number who died in the 1984 5 famine international journalists were banned as the region was sealed off from the outside world by ethiopian and eritrean governments prosecuting a strategy designed to crush

tigray at almost any cost hatred of tigrayans was stoked by senior advisers to ethiopia s prime minister abiy ahmed they have called tigrayans weeds who must be uprooted their place in history extinguished their language was reminiscent of that which preceded the genocide in rwanda the war was also orchestrated by eritrea s president isaias afwerki who came to wield increasing influence over ethiopian affairs it drew in somali troops as well as eritrean forces peace agreements signed in november 2022 ended the worst of the violence but without resolving the war s underlying drivers which continue to feed a tense and uncertain situation this book provides the first clear explanation of the factors that led to the conflict unravelling their roots in ethiopia s long and complex history it describes the battles that were fought at such terrible cost and the immense suffering particularly of women who were brutally abused

this book is intended to be a permanent public archive of the communal violence in gujarat in early 2002 drawing upon eyewitness reports from the english hindi and regional media citizens and official articles by leading public figures and intellectuals it provides an account of how and why the state was allowed to burn

we find ourselves in a world that reflects a tension between the

totalizing discourses of global corporate capitalism and representative democracy on the one hand and the contingent fragmentary nature of post colonial life on the other how indeed whether this dialectic will be reconciled in the new millennium is not merely a question for academic consideration but has real implications for the lives of people in the developing world who are caught at the interstices of these conflicting forces what a comparative critical sociological perspective can provide is a window into the souls of people struggling for self determination equality and justice it is in this spirit that we present this work focusing on the study of injustice and inequality in the world system

this volume examines the protection of internally displaced persons idps through an interdisciplinary lens with a focus on idps in africa the novelty of this book resonates from the fact that it explores national perspectives on internal displacement with the aim of providing a well grounded engagement on the subject of internal displacement for which very little exists the chapter authors are drawn from various disciplines and institutional backgrounds and provide context based analysis and examine the situation in countries with significant population displacement the work is a timely engagement as the issue of internal displacement has emerged as a pertinent concern in africa each

of the chapters in this book draw on significant context based knowledge and on issues for which there is a need for pertinent attention across the african countries this book will be a significant reference point for researchers professors practitioners judges policy makers international organizations regional bodies lawyers and scholars in the field of migration forced migration and regional institutions

oil diamonds timber food aid just some of the suggestions put forward as explanations for african wars in the past decade another set of suggestions focuses on ethnic and clan considerations these economic and ethnic or clan explanations contend that wars are specifically not fought by states for political interests with mainly conventional military means as originally suggested by carl von clausewitz in the 19th century this study shows how alternative social organizations to the state can be viewed as political actors using war as a political instrument

the general theme of this volume of the yearbook of international humanitarian law is armed groups and the challenges arising from the participation of such groups in contemporary armed conflicts it is elaborated upon in several chapters addressing the organisation criterion respect for and compliance with

international humanitarian law and international human rights law targeted sanctions and accountability issues among other things besides these chapters that can be connected to the general theme the book also contains a chapter dedicated to the knock on the roof practice a year in review describing the most important events and legal developments that took place in 2016 as well as the final report from the ILA study group the conduct of hostilities under international humanitarian law challenges of 21st century warfare the yearbook of international humanitarian law is the world's only annual publication devoted to the study of the laws governing armed conflict it provides a truly international forum for high quality peer reviewed academic articles focusing on this crucial branch of international law distinguished by contemporary relevance the yearbook of international humanitarian law bridges the gap between theory and practice and serves as a useful reference tool for scholars practitioners military personnel civil servants diplomats human rights workers and students
