many associate terrorism with irrational behavior and believe only lunatics could perpetuate such horrific acts global alert debunks this myth by anatomizing the rationale behind modern terrorism it draws a distinct picture of its root and instrumental causes and plots the different stages of a terrorist attack from indoctrination and recruitment to planning preparation and launch global alert also exposes the measured exploitation of democratic institutions by terrorists to further their goals despite its

strong capabilities and extensive resources the modern liberal democratic state is nevertheless subject to the rules of war which partially restrict the state's ability to operate and maneuver boaz ganor shows how terrorist organizations exploit these values to paralyze or neutralize the states they oppose in outlining this new hybrid terrorist organization and its activity in both the military terrorist arena and the political welfare arena ganor advances an international doctrine for governing military operations between state and nonstate actors as part of a new type of armed conflict termed multidimensional warfare

this book comprises contributions by leading experts in the field of international humanitarian law on the subject of the categorisation or classification of armed conflict it is divided into two sections the first aims to provide the reader with a sound understanding of the legal questions surrounding the classification of hostilities and its consequences the second includes ten case studies that examine practice in respect of classification understanding how classification operates in theory and practice is a precursor to identifying the relevant rules that govern parties to hostilities with changing forms of armed conflict which may involve multi national operations transnational armed groups and organized criminal gangs the need for clarity of the law is all important the case studies selected

for analysis are northern ireland drc colombia afghanistan from 2001 gaza south ossetia iraq from 2003 lebanon 2006 the so called war against al qaeda and future trends the studies explore the legal consequences of classification particularly in respect of the use of force detention in armed conflict and the relationship between human rights law and international humanitarian law the practice identified in the case studies allows the final chapter to draw conclusions as to the state of the law on classification
