this book looks at how international treaties can be used to establish successful national programmes it is concerned specifically with national mine action programmes focusing on the capacity of the national governments also referred to as the state to implement the convention on the prohibition of the use stockpiling production and transfer of anti personnel mines and on their destruction the convention which is also referred to as the mine ban treaty mbt or treaty was finalised on september 18 1997 in oslo ten years after its creation the treaty has proven a successful tool to address the humanitarian disaster caused by landmines yet most of the

mine affected country signatories to the mbt have not been able to meet their clearance deadline this book examines the underlying reasons for the discrepancy between the terms of the treaty and the reality of its implementation exploring its successes and shortcomings in doing so the book sets out to answer the research question considering the disparate levels of success among countries committed to implementing the mine ban treaty what are the key functions of governments and governance structures in ensuring the successful implementation of the treaty

how do security communities transform into security regimes this book compares the construction of cross border security regimes across five regions of the world to illustrate how trust emerges from the day to day relations of coordination cooperation or collaboration patterns in border security regional comparisons studies the way borderland communities develop implement and align border policy to enhance their sense of security borders have been evolving rapidly in direct response to the multifaceted challenges brought on by

globalization which has had a nuanced impact on the way borders are governed and border security is managed taking a methodical comparative regional approach this book identifies and contrasts determinants of nascent ascendant and mature border security regimes which the book documents in seven regional case studies from across the globe the findings identify conditions that give rise to cross border and trans governmental coordination cooperation or collaboration specifically pluralistic forms of communication and interactions sometimes far from the actual borderline emerge as key determinants of friendly and trustful relations among both contiguous and non contiguous regions this is a significant innovation in the study of borders in particular in the way borders mediate security for six decades international security studies had posited culture as the bedrock of security communities by contrast the book identifies conditions a method and a model for adequate and effective cross border relations but whose outcome is not contingent on culture the chapters in this book were originally published as a special issue of commonwealth and comparative politics with a

2019 national jewish book award finalist a fascinating biography a masterly portrait of a titanic yet unfulfilled man this is a gripping study of power and the loneliness of power the economist as the founder of israel david ben gurion long ago secured his reputation as a leading figure of the twentieth century determined from an early age to create a jewish state he thereupon took control of the zionist movement declared israel s independence and navigated his country through wars controversies and remarkable achievements and yet ben

gurion remains an enigma he could be driven and imperious or quizzical and confounding in this definitive biography israel's leading journalist historian tom segev uses large amounts of previously unreleased archival material to give an original nuanced account transcending the myths and legends that have accreted around the man segev's probing biography ranges from the villages of poland to manhattan libraries london hotels and the hills of palestine and shows us ben gurion's relentless activity across six decades along the way segev reveals for the first time ben gurion's secret negotiations with the british on the eve of israel's independence his willingness to countenance the forced transfer of arab neighbors his relative indifference to jerusalem and his occasional nutty moments from ufo sightings to plans for israel to acquire territory in south america segev also reveals that ben gurion first heard about the holocaust from a palestinian arab acquaintance and explores his tempestuous private life including the testimony of four former lovers the result is a full and startling portrait of a man who sought a state at any cost at times through risk taking violence and unpredictability and at other times through

compromise moderation and reason segev's ben gurion is neither a saint nor a villain but rather a historical actor who belongs in the company of lenin or churchill a twentieth century leader whose iron will and complex temperament left a complex and contentious legacy that we still reckon with today

incurred and some built factories in iraq that weren't needed or that never worked at all even un secretary general kofi annan was tainted by it but the whole story has never been told in one place
