the battle of the north atlantic was the longest continuous military campaign of world war ii running from 1939 until the defeat of nazi germany in 1945 though it reached its peak from mid 1940 through the end of 1943 the battle of the north atlantic pitted german u boats and other warships of the german navy against allied merchant shipping initially convoys of merchant ships were protected for the most part by the british and canadian

navies and air forces starting in the early fall of 1941 before pearl harbor these forces were aided by ships and aircraft of the united states the battle for the north atlantic began on the first day of the european war and lasted for six years involving thousands of ships and stretching over hundreds of miles of the vast ocean and seas in a succession of more than a hundred convoy battles and as many as a thousand single ship encounters tactical advantage switched back and forth over the six years as new weapons tactics and countermeasures were developed by both sides the allies gradually gained the upper hand driving the german surface raiders from the ocean by the end of 1942 and decisively defeating the u boats in a series of convoy battles between march and may 1943

every war has at least one a unit so different so daring that it becomes the stuff of which legends are made and

heroes are born among the south african forces fighting in angola from 1975 to 1989 that unit was 32 battalion founded in utmost secrecy from the vanquished remnants of a foreign rebel movement undefeated in 12 years of front line battle feared by enemies that included both conventional cuban armies and namibian guerrilla fighters the buffalo soldiers became the south african army s best combat unit since world war ii with no fewer than 13 members winning the highest decoration for bravery under fire but when peace broke out in southern africa the victors of savate became the victims of sophistry their fate and future determined by politicians who understood little and cared less about this truly unique fraternity 32 battalion ceased to exist in 1993 its short history and long list of battle honours known only to those whose enemies called them os terriveis the terrible ones now for the first time the

story of 32 battalion can be told in full with neither adornment nor apology by one of its longest serving members the book draws from top secret documents revealing information that has never been made public before also included are rare photographs that evoke the colourful and often controversial history of 32 battalion as well as detailed maps depicting specific operations and deployments

this volume had its origin in a symposium on the reproduction and development of cartilaginous fishes that was held at the annual meetings of the american elasmobranch society and the american society of ichthyologists and herpetologists in charleston south carolina in 1990 the cartilaginous fishes class chondrichthyes are a large and diverse group of fishes that include approximately 900 to 1100 living species of sharks skates rays and

ratfishes throughout their history which dates back at least 400 million years they have been a successful major component of the marine ecosystem the chondrichthyan fishes occupy a pivotal position in comparative and evolutionary studies of vertebrate reproduction and development they are the oldest surviving group of jawed vertebrates and they possess both the adult vertebrate bauplan and the vertebrate program of embryonic development the major features of the female reproductive system including its embryonic origin structure physiological function and biochemistry apparently were established early in vertebrate evolution and are fully developed in chondrichthyan fishes these features of the female reproductive system have been retained during the evolution of the other classes of vertebrates much the same can be said for the male reproductive system moreover

viviparity placental nourishment of developing embryos and the hormonal regulation of these events made an initial appearance in this group the 22 articles presented in this volume bring together a wide variety of complementary research by investigators from seven countries allowing us to broaden the scope and implications of our studies while identifying opportunities for future research the appearance of a volume on the reproduction and development of cartilaginous fishes is quite opportune the continued existence of these fishes which survived the great extinction events of earth's history is now threatened by overexploitation unless immediate steps for their conservation are undertaken knowledge of their reproduction and development not only is an end in itself but is of critical importance in devising successful conservation and resource management strategies

there is no available about the book information as of the moment

my interest in colonel john singleton
mosby began in 1950 however it wasn't
until 2002 that it led to extensive
research on the subject centered upon

newspaper reports on the man begun
during the civil war and continued
throughout and even after his life and
while i rejected virgil carrington jones
s observation on mosby contained in
the preface of this work i did not
contemplate writing this book until an
even more disparaging observation
came to my attention during my
research the comment was contained
in an article in the ponchatoula times
of may 26 1963 as part of a six article
series written by bernard vincent
mcmahon entitled the gray ghost of
the confederacy mr mcmahon in turn
based his comment upon general omar
bradley s judgment of what might
have been the postwar life of general
george patton now substitute mosby
for general patton in the book a
general s life by omar bradley i
believe it was better for general patton
mosby and his professional reputation
that he died when he did he would
have gone into retirement hungering
for the old limelight beyond doubt

indiscreetly sounding off on any subject anytime any place in time he would have become a boring parody of himself a decrepit bitter pitiful figure unwittingly debasing the legend emphasis mine mcMahon however only proffered in his writings the widely accepted view of John Mosby held by many if not most however like General Ulysses S. Grant I have come to know Colonel Mosby rather more intimately through the testimony of countless witnesses over a span of 150 years and I believe that it is time for those who deeply respect John Mosby the soldier to now also respect John Mosby the man a century ago the book of John Singleton Mosby's life closed it is my hope that this book will validate the claim he made during that life that he would be vindicated by time v p Hughes

since the start of the Anglo-Boer War today 120 years ago thousands of publications written or typed reports and other creations have been produced to narrate the war events

express opinions on its origins causes course results and legacy and on participants in the struggle this process is ongoing since the debate amongst both professional historians and interested amateurs on exactly what happened and why is still raging and new information on the war still crops up the history of the Anglo-Boer War is truly a never-ending discourse as the author of a number of books on the war I have consulted hundreds of both published and unpublished sources some were of limited value but a small percentage of the published books were of such high value that they formed part of a small stack of books that found a permanent home on my desktop while I was in the writing process Pieter Cloete's *The Anglo-Boer War: A Chronology* both the original English version and the enlarged Afrikaans version published in 2010 was always part of that stack it is to me a privilege to write a foreword for the user friendly and

meticulously researched book it not only contains a wealth of information but a detailed source list and an extensive index there are few if any more helpful reference books on the war and thus represents an essential resource to anyone with a more than superficial interest in the anglo boer war dr jackie grobler historian and author recently retired after 40 years at the department of historical and heritage studies the university of pretoria

once again the soldiers officers and commanders tell the story in this third volume of kevin campbell s comprehensive work on the gettysburg campaign journey to armageddon the hardships comradery short rations and the dance with the enemy s bullets and shells are all here blistering sun drenching rains chocking dust sticky mud played out horses and men and the high level often inharmoniousness communications between army

commanders and their governments are presented in these pages fortunately not all is despair and doom included are the sometimes humorous interactions with the civilians met along their journey and the acrimony that frequently filled encounters between hungry soldiers and the administrators of the villages and towns they passed through the tales told by these hardy men about the events of their existence are significant elements within the story of the gettysburg campaign which author kevin campbell tells in a clear and concise prose most historians who write of the great crusade gloss over these events in favor of the more prominent proceedings in and around gettysburg these often ignored events and much more are incorporated into his complete treatment of the union and confederate armies on their journey to armageddon

historically the management of public lands from a multiple use perspective has led to a system that emphasizes those habitat components or faunal elements that primarily resulted in some sort of definable economic value while this often benefitted other species that were not even considered in the original prescriptions it also negatively impacted others we no longer can afford to take this simplistic view of ecosystem management we need to use a more

holistic approach where ecological landscapes are considered as units and land management practices incorporate all elements into an integrated policy this includes examining the impacts of proposed land uses on amphibian reptile and small mammal populations

this book addresses one of the most important issues in international relations how wars are ended the volume draws on the direct experience of both soldiers and academics who in each case have also been advisers on fighting and ending wars unlike more theoretical works the book draws on first hand experiences in the case studies which include the wars in iraq afghanistan sierra leone and indonesia among others the volume is constructed around a series of themes the first theme is why wars start and how they can be understood based on the assumption that knowing how and why wars start is fundamental to understanding how they might end the

second is what sustains wars and what makes them difficult to end again once wars start understanding what keeps them going is critical to how to end them the third focuses on the role of external intervention in ending wars including as a belligerent partner in war as a peacemaking or peacekeeping force and as a mediator between warring parties the fourth addresses the issue of ripeness and the right conditions for ending wars the fifth addresses the modalities for ending wars and creating peace with the sixth theme being focused on transitions to peace and what is required to help make those transitions successful the book will be of interest to students of military strategic and security studies peace studies and international relations
