the real facts on the ground goliath is an unprecedented and compelling work of journalism

a great deal of political and academic responses to the israel palestine conflict have construed the palestinians as an object of western and israeli discourses rather than their own palestinian discourse this has hindered understanding of the internal mechanisms involved in the production of the palestinian conditions palestinian political discourse presents an in depth examination of palestinian political discourse since an nakba in 1948 and stitches together the underlying mechanisms and rules that have shaped palestinian politics in turn synthesizing interpreting and scrutinizing these rules studying the question of palestine discursively offers new ways to rethink political agency structures identity institutions and power relations while interpreting palestinian actions this book adds new understanding to palestinian political agency by explaining how political actions were constructed discourse analysis methodology underlies the critical examination of the genealogy of concepts and frames that have oriented palestinian political thought contrary to established views that ascribe shifts in palestinian politics primarily to external factors and international changes this book demonstrates how transformation has been a continuing inbuilt feature within the discursive regime and that dramatic shifts were only effects of much deeper slowly evolving changes examining discourse and thus language offers an exceptional possibility to see from the palestinian perspective as such this book provides material vital to the deeper interpretation of the palestinian question it will be a valuable resource for students and scholars of israel palestine studies middle east studies and discourse analysis

this is a book about palestine today it is neither apologetic nor romanticized but a powerful and brilliantly realized scream of a book scorching and tender from a journalist whose anger and empathy burn through every word over the past three years ben ehrenreich has shared the laughter fury and sorrow of people in cities and villages across the west bank young and old people men and women he has witnessed the extremes to which they are pushed the daily deprivation and oppression that they face the strategies they construct to survive it stoicism resignation rebellion humour and a stubborn defiant joy in the way to the spring he describes the cruel mechanics of the israeli occupation and the endless absurdities and tragedies it engenders the complex and humiliating machinery of the checkpoints walls courts and prisons the steady

strangling loss of lands that have been passed down for generations the constant ebb and flow of deadly violence blending political and historical context with the personal stories of the people ehrenreich meets the way to the spring is a testimony a provocation and a vital document written with grace and power it breathes fresh life and urgency to a place and a conflict that too easily disappears in the shouting this is a necessary book an unflinching act of witnessing

is it legal to kill or capture and confine someone in war is this relevant or wise to ask in the reality of war what does legal actually mean in the labyrinth of overlapping international laws this volume explores the meaning relevance and wisdom of questioning the legality of the use of force against individuals in war by reconnecting legal thought with the social world weaving together law social theories and actual practices the book presents an interdisciplinary study of the laws regulating warfare the use of force against individuals in war under international law uncovers different conceptions of legality that generate tensions among different international laws regulating warfare and highlights the limits of legal techniques in addressing these tensions accepting these tensions serves not to denigrate the law itself but to invite a deeper level of engagement with it through the lens of social theories drawing on the insight that every social action results from an interaction between human agency and social structures this publication argues that in regulating warfare one distinct body of international law the law of armed conflicts accommodates the diminished agency of human beings operating in highly structured conditions while other bodies of international law harbour the potential to transform these very structured conditions thus assimilating these laws whether in court or real world practices fundamentally conflates their underlying social ontologies

the palestinian national movement gestated in the early decades of the twentieth century but it was born in the great revolt of 1936 39 a period of sustained arab protest against british policy in the palestine mandate in the crime of nationalism matthew kraig kelly makes the unique case that the key to understanding the great revolt lies in what he calls the crimino national domain the overlap between the criminological and the nationalist dimensions of british imperial discourse and the primary terrain upon which the war of 1936 39 was fought kelly s analysis amounts to a new history of one of the major anticolonial insurgencies of the interwar period and a critical moment in the lead up to israel s founding the crime of nationalism offers crucial lessons for the scholarly understanding of nationalism and insurgency more broadly

wars have dominated politics since history began in the modern era most of what the media reports on foreign conflicts

from ukraine to afghanistan and beyond occupations and exit dilemmas permeate contemporary geopolitics however the existing literature on territorial conflict rarely scrutinizes a pivotal related question what makes a state withdraw from an occupied territory or entrench itself within it in understanding territorial withdrawal rob geist pinfeld addresses this research gap he focuses primarily on israel a unique but important milieu that offers pertinent lessons for other states facing similar policy problems as pinfeld demonstrates occupiers choose to either perpetuate or abandon an occupation because of three factors their relations with the occupied interactions with third parties and the occupier s domestic politics he argues that each withdrawal is the culmination of a gradual process of policy re assessment critically it is a combination of local violence and international pressure that causes popular and elite opinion within the occupier to endorse an exit rather than perpetuate the status quo to affirm this pattern pinfeld constructs a generalizable framework for understanding territorial withdrawal he then applies this framework to multiple case studies which include israel s withdrawal from the

sinai peninsula between 1974 1982 its unilateral withdrawal from southern lebanon in 2000 and its unilateral disengagement from the gaza strip in 2005 as well as israel s non withdrawals from the west bank and golan heights overall understanding territorial withdrawal delineates commonalities that manifested in each exit yet were absent in the cases of occupation without exit a powerful analysis of a central concern for the study of international security territorial conflict and the arab israel conflict alike this book provides a critical intervention that identifies why occupiers either retain or leave occupied territory

defending the holy land is the most comprehensive analysis to date of israel s national security and foreign policy from the inception of the state of israel to the present author zeev maoz s unique double perspective as both an expert on the israeli security establishment and esteemed scholar of mideast politics enables him to describe in harrowing detail the tragic recklessness and self made traps that pervade the history of israeli security operations and foreign policy most of the wars in which israel was involved maoz shows were entirely avoidable the result of deliberate israeli aggression flawed decision making and misguided conflict management strategies none with the possible exception of the 1948 war of independence were what israelis call wars of necessity they were all wars of choice or worse folly demonstrating that israel s national security policy rested on the shaky pairing of a trigger happy approach to the use of force with a hesitant and reactive peace diplomacy defending the holy land recounts in minute by minute detail how the ascendancy of israel s security establishment over its foreign policy apparatus led to unnecessary wars and missed opportunities for peace a scathing and brilliant revisionist history defending the holy land calls for sweeping reform of israel s foreign policy and national security establishments this book will fundamentally transform the way readers think about israel s troubled history zeev maoz is professor of political science at the university of california davis he is the former head of the graduate school of government and policy and of the jaffee center for strategic studies at tel aviv university as well as the former academic director of the m a program at the israeli defense forces national defense college cover photograph israel jerusalem western wall and the dome of the rock courtesy of corbis

how did the israeli military learn to cope with the ubiquity of media technologies that routinely document their power abuses why did they re appropriate these to tighten their grip on palestinian civilians this book explains why a high tech

nation with advanced military technologies came to rely on the everyday media habits performed by soldiers and civilians daniel mann argues that the intensification of the security regime in palestine and the increasingly personal use of media technologies by both soldiers and civilians are deeply entangled the book traces how beginning in the 1990s the integration of media into the lives of civilians and israeli soldiers enabled israel to transfer responsibilities to individual users who in turn became legally and ethically liable for state abuses of power drawing on declassified documents found footage and social media mann shows how both media and warfare have been remodelled around the figure of the defensive isolated and insular individual mann suggests that the focus on representations and their close visual analysis paradoxically hinders our ability to understand media instead of zooming into fine details we must step back to reveal the assemblage of images users and infrastructure that together serve to maintain the racial legal and aesthetic divide between israel and palestine

the wrong story lays bare the flaws in the way large media organizations present the palestine israel issue it points out major fallacies in the fundamental conceptions that underpin their coverage namely that palestinians and israelis are both victims to comparable extents and are equally responsible for the failure to find a solution that the problem is extremists often religiously motivated ones who need to be sidelined in favour of moderates and that israel s uses of force are typically justifiable acts of self defense weaving together the existing literature with new insights shupak offers an up to date and tightly focused guide that exposes the distorted way these issues are presented and why each is misguided
