This informative and exciting volume brings together accomplished sociologists and scholars to offer an introduction to ways of studying and understanding global social change. The essays in *Global Social Change* explore globalization from a world systems perspective, untangling its many contested meanings. This perspective offers insights into globalization's gradual and uneven growth throughout the course of human social evolution. In this informative and exciting volume, Christopher Chase-Dunn and Salvatore J. Babones bring together accomplished senior sociologists and outstanding younger scholars with a mix of interests, expertise, and methodologies to offer an introduction to

ways of studying and understanding global social change. In both newly written essays and previously published articles from the *Journal of World Systems Research*, the contributors employ historical and comparative social science to examine the development of institutions of global governance, the rise and fall of hegemonic core states, transnational social movements, and global environmental challenges. They compare post-World War II globalization with the great wave of economic integration that occurred in the late nineteenth century, analyze the rise of the political ideology of the globalization project—Reaganism, Thatcherism, and discuss issues of gender and global inequalities.

for most of the twentieth century Britain possessed both the world's largest merchant fleet and its most extensive overseas territories. It is not surprising therefore that the Royal Navy always showed a particular interest in the cruiser, a multi-purpose warship needed in large numbers to defend trade routes and police the empire above all other types. The cruiser's competing demands of quality and quantity placed a heavy burden on designers and for most of the inter-war years Britain sought to square this circle through international treaties restricting both size and numbers. In the process she virtually invented the heavy cruiser and inspired the large 6in armed cruiser, neither of which ironically served her best interests. For the first time this book seeks to comprehend the full policy background from which a different and entirely

original picture emerges of British cruiser development after the war. The cruiser's role was reconsidered and the final chapters of the book cover modernisations of the plans for missile-armed ships and the convoluted process that turned the through-deck cruiser into the invincible class light carriers, with detailed appendices of ship data and illustrated in depth with photos and a d Baker's specially commissioned plans. British cruisers truly matches the lofty standards set by Friedman's previous books on British destroyers.
