examining iranian foreign policy with a focus on the years since 2001 this book analyses the defining feature of iran s international and regional posture its strategic loneliness and the implications of this for the islamic republic s foreign policy iranian foreign policy since 2001 offers an in depth analysis of the key drivers behind iran s foreign policy power strategic culture and ideology in addition the authors examine iran s relations with key countries and regions including its often tenuous relations with china russia and america as well as its bilateral relations with non state actors such as hezbollah the common thread running throughout the volume is that iran is alone in the world regardless of its political manoeuvrings the islamic republic s regional and international posture is largely one of strategic loneliness assimilating contributions from the us canada europe and iran this book provides an international perspective both at the theoretical and practical levels and is essential reading for those with an interest in middle eastern politics international relations and political science more broadly

since 2001 afghanistan has allowed new delhi an opportunity to underscore its role as a regional power india has growing stakes in peace and stability in afghanistan and the 2011 india afghan strategic partnership agreement underlines india s commitment to ensure that a positive momentum in delhi kabul ties is maintained the changing trajectory of indian policy towards afghanistan since 2001 is examined and it is argued that new delhi has been responding to a strategic environment shaped by other actors in the region u s led north atlantic treaty organization forces are preparing to leave afghanistan in 2014 and india stands at a crossroads as it remains keen to preserve its interests in afghanistan the ever evolving indian policy in afghanistan is examined in three phases before implications of this change for the region and the united states are drawn there has been a broader maturing of the u s india defense ties and afghanistan is likely to be a beneficiary of this trend

this book offers an empirical comparison of chinese and indian international strategic behavior it is the first study of its kind filling an important gap in the literature on rising indian and chinese power and american interests in asia the book creates a framework for the systematic and objective assessment of chinese and indian strategic behavior in four areas 1 strategic culture 2 foreign policy and use of force 3 military modernization including defense spending military doctrine and force modernization and 4 economic strategies including international trade and energy competition the utility of democratic peace theory in predicting chinese and indian behavior is also examined the findings challenge many assumptions underpinning western expectations of china and india

the book discusses india s evolving deterrent force posturing in south asia under the conceptual essentials of nuclear revolution when it comes to various combinations of conventional and nuclear forces development and the strategic implications it intentionally or unintentionally poses for the south asian region the book talks about how the

contemporary restructuring of india's deterrent force posture affects india's nuclear strategy in general and how this in turn could affect the policies of its adversaries china and pakistan in particular authors discuss the motivations of such posturing that broadly covers india's restructuring of its nuclear draft doctrine and the ballistic missile development program including that of its ballistic missile defence bmd system and the possibility of conflicts between china india and india pakistan given their transforming strategic force postures and their recurring adversarial behavior against each other in the southern asian region

this handbook offers a comprehensive overview of south asian foreign policy examining the complex history and present state of south asian foreign policy the foreign policy of the countries of the region as well as their relationships with their neighbors and key external players such as china and the united states in an effort to understand south asia's place in the world order it illustrates the future trajectory of foreign policy in the region and analyses future of regional arrangements like saarc south asian association for regional cooperation and bimstec the handbook is structured in five parts each representing a focused area of enquiry foreign policy relations within south asia relations within indo pacific relations with china europe and the united states security a carefully selected collection of 26 chapters written by experts on south asian foreign economic and security policy this handbook provides an objective yet accessible overview of the history and current state of foreign policy of each country and the region it is an authoritative reference work for academics and students as well as international think tanks research institutes and non governmental organizations working on south asian politics asian politics foreign politics international affairs world history and international relations

while ports are traditionally considered national infrastructure sites that connect states to global markets special economic zones and past free ports are portrayed as threats to national sovereignty this book calls these narratives into question as it explores the history of planning mumbai's ports and free zones during periods of global and regional transition from the british raj to national independence to economic liberalization the book opens with a study of an unsuccessful plan hatched by merchants in 1833 to make bombay a free port to deal with an emerging british india and the advent of free trade the book ends with how india's current special economic zones and emphasis on port expansion are part of broader goals to reposition india in transregional asian trade to connect mumbai with northern india and to enact local plans for a global city that threaten the very port that first connected mumbai to the world to understand the functionality of these port and zone projects beyond typical policy prescriptions this book proposes portals of globalization as a spatial format that fosters processes of reterritorialization

the united states faces major challenges in dealing with iran the threat of terrorism and the tide of political instability in the arabian peninsula the presence of some of the world's largest reserves of oil and natural gas vital shipping lanes and shia populations throughout the region have made the peninsula the focal point of us and iranian strategic competition moreover large youth populations high unemployment rates and political systems with highly centralized power bases have posed other economic political and security challenges that the gulf states must address and that the united states must take into consideration when forming strategy and policy

in managing national security how realist is india in terms of cultivating and using power and especially military power a conventional view of india is that it has been uncomfortable with realism or power politics as a guide to policy this volume shows that it has been more realist than is generally recognized and that it has increasingly become

comfortable with power in the service of its interests the essays in this volume examine the different aspects and types of realism in india s national security policy include a range of perspectives from academics as well as former military officers and diplomats focus on india s military and foreign policy in dealing with china pakistan the united states southeast asia and west asia this key volume will be indispensable to scholars and researchers of politics and international relations defence and strategic studies and south asian studies and to government officials journalists and general readers interested in the external dimensions of india s national security

the first book by a former indian naval intelligence officer on sino india relations india s maritime strategy provides a unique insight into the indian navy tracing its post independence growth and discussing its transformation and future in the 21st century in the context of the rise of china s maritime power in the indian ocean this book provides a nuanced view of the extent and scope of india s maritime reach and the effect of this on sino indian competition challenging the view that by developing a favourable environment alone india could seek to maintain its balance of power with china it is argued that despite durable bilateral security ties with most regional states india s maritime aspirations to be the primary net security provider for the region are unsustainable in the long term this book presents a comprehensive coverage of india s bilateral maritime security engagements with all the indian ocean regional states as well as the us france uk and russia as such it will be useful to students and scholars of indian and south asian politics international relations and maritime security

the routledge handbook of the political economy of sanctions examines the core issues and debates surrounding this controversial topic introducing readers to essential concepts and terms it communicates the evolving character of international sanctions from diverse perspectives with a particular emphasis on questions of efficacy legality and legitimacy of sanctions as well as the mechanisms by which they are applied this interdisciplinary book explores the international political economy of sanctions in the constantly changing context of geopolitical rivalry the authors investigate various theoretical and historical approaches to sanctions and apply these to specific case studies such as the african union china cuba india russia turkey and the united states the book gives a voice to sanctioned states and considers the impact of secondary sanctions it analyses sanctions with reference to wider political debates such as national security state sovereignty economic warfare and sustainability this handbook will be of immense interest to students researchers and scholars in the fields of political economy international sanctions political science international relations and foreign policy it will also be useful for all those employed by political institutions businesses and nongovernmental organisations when assessing current sanctions regimes

gulf stability is coming to play a larger role in the foreign policy calculus of many states but the evolving role of asian powers is largely under represented in the international relations literature this volume addresses this gap with a set of empirically rich theory driven case studies written by academics from or based in the countries in question the underlying assumption is not that asian powers have already become important security actors in the gulf but rather that they perceive the gulf as a region of increasing strategic relevance how will leaders in these countries adjust to an evolving regional framework will there be coordinated efforts to establish an asian centered approach to gulf stability or will asian rivalries make the region a theater of competition will us china tensions force alignment choices among asian powers will asian states balance bandwagon hedge or adopt some other approach to their gulf relationships these questions become even more important as the western boundaries of asia increasingly come to incorporate the middle east the book will appeal to scholars and students in the fields of international relations security studies and international political economy as well as area specialists on the gulf

and those working on foreign policy issues on each of the asian countries included professionals in government and non government agencies will also find it very useful the open access version of this book available at taylorfrancis com has been made available under a creative commons attribution non commercial no derivatives 4 0 license
