qureshi promotes a moderate and inclusive view of contemporary islam with the intellectual underpinnings to support it booklist starred review accessible introduction to islam and the qur an that explains how muslims live and avoids the extremes of orthodoxy and islamophobia the truths of every religion are typically challenged and re written serving as potent grounds for some of history s most enduring debates and conflicts perhaps no other religious tradition suffers as much from the dualistic fallacy of good and evil than does islam what does it mean to be muslim today orthodoxy s interpretation is idyllic and omniscient simplistic to a fault

islamophobes at the opposite end of the spectrum cultivating damaging stereotypes that present a religion that most muslims cannot relate to in being muslim today reclaiming the faith from orthodoxy and islamophobia bestselling author dr saqib qureshi silences the noise that obscures the message of islam he provides a compelling and accurate presentation of the faith s beginnings its evolution throughout the last 1400 years and its relevance for today being muslim today simplifies complicated academic debates and reveals the heart and soul of a growing faith tradition that claims more than two billion adherents chapters include lucid discussions of the origins of islam the prophet muhammed and the rise of islam through the ages qureshi also describes the twin perils of orthodoxy and islamophobia both of which he contends badly misinterpret the true message of the faith in a final chapter qureshi confronts the stereotype of islam as an inherently violent religion asking the west to hold a mirror to its own voracious appetite for conflict and colonization throughout qureshi encourages muslims to reject pious certitude the faithful must acknowledge the diversity of approaches and principals in the islamic tradition he writes and adopt an attitude of theological humility some things are simply unknowable

in november of 2002 the justice and development party swept to victory in the turkish parliamentary elections because of the party s islamic roots its electoral triumph has sparked a host of questions both in turkey and in the west does the party harbor a secret islamist agenda will the new government seek to overturn nearly a century of secularization stemming from kemal atatürk s early twentieth century reforms most fundamentally is islam compatible with democracy in this penetrating work m hakan yavuz seeks to answer these questions and to provide a comprehensive analysis of islamic political identity in turkey he begins in the early twentieth century when kemal atatürk led turkey through a process of rapid secularization and crushed islamic opposition to his authoritarian rule yavuz argues that since atatürk s death in 1938 however turkey has been gradually moving away from his militant secularism and experiencing a quiet muslim reformation islamic political identity is not homogeneous says yavuz but can be modern and progressive as well as conservative and potentially authoritarian while the west has traditionally seen kemalism as an engine for reform against reactionary political islam in fact the kemalist establishment has traditionally used the islamic threat as an excuse to avoid democratization and thus hold on to power yavuz offers an account of the soft coup of

1997 in which the kemalist military bureaucratic establishment overthrew the democratically elected coalition government which was led by the pro islamic refah party he argues that the soft coup plunged turkey into a renewed legitimacy crisis which can only be resolved by the liberalization of the political system the book ends with a discussion of the most recent election and its implications for turkey and the muslim world yavuz argues that islamic social movements can be important agents for promoting a democratic and pluralistic society and that the turkish example holds long term promise for the rest of the muslim world based on extensive fieldwork and interviews this work offers a sophisticated new understanding of the role of political islam in one of the world s most strategically important countries

a look at the developing conflicts in christian muslim relations during late antiquity and the early islamic era how did the medieval middle east transform from a majority christian world to a majority muslim world and what role did violence play in this process christian martyrs under islam explains how christians across the early islamic caliphate slowly converted to the faith of the arab conquerors and how small groups of individuals rejected this faith through dramatic acts of resistance including apostasy and blasphemy using previously untapped sources in a range of middle eastern languages christian sahner introduces an unknown group of martyrs who were executed at the hands of muslim officials between the seventh and ninth centuries ce found in places as diverse as syria spain egypt

and armenia they include an alleged descendant of muhammad who converted to christianity high ranking christian secretaries of the muslim state who viciously insulted the prophet and the children of mixed marriages between muslims and christians sahner argues that christians never experienced systematic persecution under the early caliphs and indeed they remained the largest portion of the population in the greater middle east for centuries after the arab conquest still episodes of ferocious violence contributed to the spread of islam within christian societies and memories of this bloodshed played a key role in shaping christian identity in the new islamic empire christian martyrs under islam examines how violence against christians ended the age of porous religious boundaries and laid the foundations for more antagonistic muslim christian relations in the centuries to come

radical islam is a major affliction of the contemporary world each year radical islamists carry out terrorist attacks that result in a massive death toll almost all involving noncombatants and innocents estimates of how many muslims could be considered followers of radical islam vary widely and there are few guides to help determine moderates versus radicals observers often sit at the extremes either seeing all muslims as open or closeted jihadis or recoiling from any attempt to link islam with international terror both positions are overly simplistic and the lack of rational principles to absolve the innocent and identify the accomplices of terror has led to governments and individuals

mistakenly accepting jihadis as moderate what is moderate islam brings together an array of scholars muslims and non muslims to provide this missing insight this wide ranging collection examines the relationship among islam civil society and the state the contributors including both muslims and non muslims investigate how radical islamists can be distinguished from moderate muslims analyze the potential for moderate islamic governance and challenge monolithic conceptions of islam

philanthropy plays an essential role in muslim practice around the world using a new framing philanthropy in the muslim world contributes to the literature by adding muslim majority countries that have not been previously included in cross national philanthropy volumes as well as countries that have important muslim minority communities

this volume reflects the huge upsurge of

interest in the near east and early islam currently taking place among historians of late antiquity at the same time islamicists and qur anic scholars are also increasingly seeking to place the life of muhammad and the qur an in a late antique background averil cameron herself one of the leading scholars of late antiquity and byzantium has chosen eleven key articles that together give a rounded picture of the most important trends in late antique scholarship over the last decades and provide a coherent context for the emergence of the new religion a substantial introduction with a detailed bibliography surveys the present state of the field as well as discussing some recent themes in qur anic and early islamic scholarship from the point of view of a late antique historian the volume also provides an invaluable introduction to recent scholarship making clear the ferment of religious change that was taking place across the near east before during and after the lifetime of muhammad it will be essential reading for islamicists and late antique students and scholars alike

dhimmitude is thus discussed from the perspective of muslim theory and also in regard to divergent christian attitudes to jews and zionism book jacket

since 9 11 01 misunderstandings and stereotypical judgments between the west and the arab states have become increasingly evident this clear useful book blends economics politics and history to provide insights into different perspectives of western

and arab cultures regarding globalization presenting a spectrum of opinions and beliefs on each side with particular attention to the psychology of arab decision makers too many people hold uninformed opinions without understanding the expectations the fears and the concerns of the stakeholders the threat of globalization to arab islamic culture will bring about a more defined comprehension of the issues involved with globalization product description

in contrast to the gradual formation of the high cultures of most of the world the process by which islamic civilisation emerged and took on its classical form between the 7th and 9th centuries was unusually sudden the studies collected here are concerned with aspects of this remarkable development their topics are varied including the emergence of dialectical theology the origins of accounts of pharaonic history current in medieval egypt the sources of muslim dietary law the islamic background of karaism and max weber s views on islamic sects other articles look at early syrian eschatology and its connections with late antiquity and byzantium at the relevance of eschatology to debates about the dating of traditions and at the attitudes of the early traditionists to the writing down of tradition the final items examine reports about the textual affiliations of a long lost koranic codex and discussions of adultery among the baboons of yemen a recurring theme is the relationship between early muslim ideas and those of non muslim cultures sometimes very ancient ones

what does it mean to be a muslim in this world in this deeply transformative time hamid dabashi suggests that the transition to a changed post western world requires the crafting of a new language of critical conversation with islam and its cosmopolitan heritage a language that is tuned to the emerging not the disappearing world

since its publication in 1992 an array of commentators have criticised francis fukuyama s optimism in the end of history and the last man for supposing that liberal democracy is the one political model with sufficient moral and practical resilience to endure through the vicissitudes of future historical events in hindsight it seems fukuyama underestimated liberal democracy s ethno religious rivals and religious

fundamentalism s powerfully resistant bulwark against liberal democracy this book offers a trenchant analysis of the post millennial cultural shift away from the defining liberal social values of the post war and post colonial global revolutionary movements it dissects the incoherent reasoning by which the liberal values of racial equality tolerance diversity feminism and gender have been evacuated of their past meanings and put into the service of a reactionary politics that uses superficially plausible bait to sell the same regressive ideology that religious social conservatives have been peddling for decades

presents the first ethnographic study of al muhajiroun an outlawed activist network that survived british counter terrorism efforts and sent fighters to the islamic state
