recent legal history in the united states reveals a hardening tendency to treat religious freedom and sexual and reproductive freedom as competing even opposing claims on public life they are united though by the fact that both are rooted in our culture s understanding of privacy faith in exposure shows how over the course of the nineteenth century privacy came to encompass such contradictions both underpinning the right to sexual and reproductive rights but also undermining them in the name of religious freedom drawing on the interdisciplinary field of secular studies faith in exposure brings a postsecular orientation to the historical emergence of

modern privacy the book explains this emergence through two interlocking stories the first examines the legal and cultural connection of religion with the private sphere showing how privacy became a moral concept that informs how we debate the right to be shielded from state interference as well as who will be afforded or denied this protection this conflation of religion with privacy gave rise the book argues to a secular sensibility that was especially invested in authenticity and the exposure of hypocrisy in others the second story examines the development of this secular sensibility of privacy through nineteenth century novels the preoccupation of the novel form with private life and especially its dependence on revelations of private desire and sexual secrets made it the perfect vehicle for suggesting that exposure might be synonymous with morality itself each chapter places key authors into wider contexts of popular fiction and periodical press debates from fears over religious infidelity to controversies over what constituted a modern marriage and conspiracy theories about abolitionists these were the contests

justine s murison argues that helped privacy emerge as both a sensibility and a right in modern secular america

critiquing postmodernism in contemporary discourses of race challenges the critical emphasis on otherness in treatments of race in literary and cultural studies sue j kim deftly argues that this treatment not only perpetuates narrow identity politics but obscures the political and economic structures that shape issues of race in literary studies kim s revelatory book shows how reading authors through their identity ends up neglecting both complex historical contexts and aesthetic forms this comparative study calls for a reconsideration of the bases for critical engagement and a reading ethics that melds the best of historicist and formalist approaches to literature

compared to rival ideologies liberalism has fared rather poorly in modern iran this is all the more remarkable given the essentially liberal substance of various social and political struggles for liberal legality individual rights and freedoms and pluralism in the

century long period since the demise of the qajar dynasty and the subsequent transformation of the country into a modern nation state the deeply felt but largely invisible purchase of liberal political ideas in iran challenges us to think more expansively about the trajectory of various intellectual developments since the emergence of a movement for reform and constitutionalism in the late nineteenth century it complicates parsimonious accounts of shi ism secularism socialism nationalism and royalism as defining or representative ideologies of particular eras hidden liberalism offers a critical examination of the reasons behind liberalism s invisible yet influential status and its attendant ethical quandaries in iranian political and intellectual discourses

the chapters in this latest edition of china briefing reflect broadly on china s transformation in the twentieth century the authors not only examine developments in china over the 1997 1999 period but also place these events in a wider historical perspective by addressing the following questions

where has china traveled over the course of the century to what extent has it been transformed and how what are the enduring themes or points of continuity even during a century of great change and transformation and what are china s prospects for the future

all cultures make and break images striking images iconoclasms past and present explores how and why people have made and modified images and other cultural material from pre history into the 21st century with its impressive chronological sweep and disciplinary breadth this is the first book about iconoclasm the breaking of images and the transformation of broader sets of signs that includes contributions from archaeologists curators and museum conservators as well as historians of art literature and religious studies the chapters examine themes critical to the study of iconoclasm violence punishment memory intentionality ruins and relics and their survival the conclusion shows how cross disciplinary debate amongst the contributors informed

tate britain s art under attack exhibition 2013 and addresses the challenges iconoclasm presents to the modern museum by juxtaposing objects and places usually considered in isolation striking images raises provocative questions about our understandings of cross cultural differences and the value of representational objects from the broken swords of pre historical bog graves to the bamiyan buddhas and contemporary art are any such objects ever finished or are they simply subject to constant transformation in dialogue with each other the essays consider this question and expand the field of iconoclasm and cultural studies

india australia and south africa are the three major regional powers in the indian ocean region while australia is a developed country with a very high level of economic affluence the south african society s problems are mainly drawn along racial lines blacks in south africa have an overwhelming majority in numbers and yet most of the black people in south africa face serious problems of unemployment and poverty the whites in south africa have on the other hand always enjoyed comfortable standards of living india provides the classic example of a developing country that is burdened with overpopulation communal divisions gender inequalities rural poverty

illiteracy and yet it is a country that has the potential to emerge as a great global power in the course of the 21st century the essays included in this volume examine the case of india from various perspectives to demonstrate how the process of economic change in india might have a bearing on the indian ocean region as a whole

what is isis a quasi state a terrorist group a movement an ideology as isis has transformed and mutated gained and lost territory horrified the world and been its punch line media have been central to understanding it the changing yet constant relationship between isis and the media as well as its adversaries dependency on media to make sense of isis is central to this book more than just the images of mutilated bodies that garnered isis its initial infamy the book considers an isis media world that includes infographics administrative reports and various depictions of a post racial utopia in which justice is swift and candy is bought and sold with its own currency the book reveals that the efforts of isis and

its adversaries to communicate and make sense of this world share modes of visual aesthetic and journalistic practice and expression the short tumultuous history of isis does not allow for a single approach to understanding its relation to media thus the book's contributions are to be read as contrapuntal analyses that productively connect and disconnect providing a much needed complex account of the isis media relationship this book was originally published as a special issue of critical studies in media communication

a study tour to leipzig in the former east germany gdr raised new questions for roger newell about the long struggle of the protestant church with the german state in the twentieth century how was it possible that a church unable to stop the nazis helped bring a totalitarian government to its knees fifty years later how did an institution marginalized in every way possible by the state education system stripped of its traditional privileges ridiculed by the government and the media as a dinosaur become the catalyst for a

transformation that enabled a great but troubled nation to be peacefully reunited something unprecedented in german history what were the connecting relationships and theological struggles that joined the church's failed resistance to hitler with the peaceful revolution of 1989 the chapters that follow tell the backstory of the theological debates and personal acts of faith and courage leading to the moment when the church became the cradle for germany's only nonviolent revolution the themes that emerge remain relevant for our own era of seemingly endless conflict

as suggested by its title the purpose of this book is to examine developments in namibia in terms of the east west conflict rather than the illegal south african occupation the apartheid system and the right to self determination as such it is a representative example of a flourishing literature which depicts swapo as a communist especially east german puppet the author applauds prime minister p w botha for stating that south africa would never allow the red flag to be

hoisted in windhoek while the west german government is accused of being soft on communism and too eager to please swapo the author is research fellow at the forschungsinstitut fur politische wissenschaft und europaische fragen der universitat zu koln for a similar or even cruder approach see inter alia hans germani rettet sudwest berlin munchen herbig verlagsbuchhandlung 1982 188 p fritz sitte schicksalsfrage namibia graz wien koln verlag styria 1983 235 p and rudiger h tronje swapo die geissel sudwest afrikas berg am see vowinckel verlag 1983 158 p for a critique of the book by lowis of menar see an article by henning melber in informationsdienst sudliches afrika no 12 december 1983 the books by germani and sitte are reviewed in the same magazine in no 7 8 july august 1983 eriksen moorsom 1989
