when the united states government engineered the  
overthrow of the troublesome south vietnamese leader ngo

dinh diem in november 1963 it set in motion a tumultuous course of events deepening the vietnam war the year of the hare asks why president john f kennedy decided to depose his ally of nine years despite almost daily warnings from some cabinet officials that the most likely consequence of a coup would be chaos why did kennedy and his colleagues choose this perilous course in the midst of an uncertain civil war to answer this question the year of the hare takes us inside the kennedy administration where the state department largely supported the coup while the pentagon and the cia consistently resisted it francis x winters s research is based on in depth interviews with high ranking members of the kennedy administration including dean rusk mcgeorge bundy and george ball along with the newly issued multivolume compilation foreign relations and the united states 1961 1964 vietnam and the recently opened general records of the u s state department for 1963 the reasons for american support of the coup in vietnam winters asserts lie both in the ethos of the era with its dynamic confidence in the superiority of american ideals and in kennedy s political aspirations the year of the hare explores the synergy between the idealism and personal ambition that were at the

root of the war that haunts us still

offers a resource as health care organizations plan for managing emergencies this title helps them assess their own needs better prepare staff to respond to the events most likely to occur and develop a level of preparedness sufficient to address a range of emergencies

reality is made up of the absolute and causality the absolute most saliently philosophized about by georg hegel is where normative values inhere causality can be described as the measurable effects of the normative values of the absolute and the laws of physics also ostensibly a product of the absolute humans are special insofar as they access the higher aspects of the absolute altruism compassion love humor science engineering etc the absolute also contains what can be considered the less attractive values or impulses greed lust for power hate self centeredness conceit etc predicating society on what i deem the lower spirits aspects of the absolute most prominently greed results in personal social dysfunction and ultimately the end of civilization conversely a society based on justice is stable and vibrant justice is a classless society free of gender and ethnic biases

my argument is based on popular culture especially the star trek franchise one implication of my thesis is that capitalist values generate psychological neurosis and societal instability even catastrophe additionally the political values that dominate the current neoliberalist world system and especially the american government are the other the will to power resulting in war and global political instability popular culture is germane to philosophy and contemporary politics because television movie creators frequently try to attract viewers by conveying authentic philosophical and political motifs conversely viewers seek out authentic movies and television shows this is in contrast to opinion surveys for instance as the formation of the data begins with the surveyor seeking to directly solicit an opinion however impromptu or shallow

among the many changes that have occurred in our country in the last forty years few have been as significant as those heralded by the supreme court s decision in the brown vs board of education case in 1954 by declaring racially segregated public schools unconstitutional the court set in motion forces that resulted in the dismantling of the legal structure of jim crowism the impact of the brown decision was national in scope but in no other region was its impact more far reaching and traumatic than in the south in arkansas as in other southern states racial segregation was

not merely a well established way of life it was firmly imbedded in law while school desegregation generated much noise and some violence elsewhere in the south the city of fayetteville arkansas confronted the issue and resolved it with a good deal of dignity and grace becoming the first southern city to accommodate the brown decision through this fascinating collection of interviews with those who were involved in the desegregation process students teachers administrators civic leaders and members of local groups we learn of the determination of citizens to obey the law of the land and to see that freedom and equality took priority over their commitment to a school system that patently discriminated against one group of citizens in our continuing efforts to create a society in which all races and cultures can coexist civil obedience is a story worthy of our full attention

the us higher education system is on the verge of a revolution so some observers claim archibald and feldman leading analysts provide an incisive overview of the challenges facing and possibilities for america s universities and colleges in their training future generations and they demonstrate that our higher education system is resilient and adaptable enough to weather the internal external and technological threats without changing campuses beyond recognition the road ahead for america s colleges and universities examines the threats posed to the current health of higher education by rising tuition and falling government support as well as from new digital technologies rippling through the entire economy some predict disaster pointing to high costs exploding debt and a digital tsunami that supposedly will combine to disrupt and sweep away many of the nation s higher education institutions or change them beyond recognition archibald and feldman provide a more nuanced view they argue that the bundle of services that four year colleges and universities provide will retain its value for the traditional age range of college students less certain archibald and feldman argue is whether the system will

continue to be a force for social and economic opportunity the threats are most dire at schools that disproportionately serve america s most underprivileged students at the same time growing income inequality reduces the ability of many students and their families to pay for higher education archibald and feldman suggest a range of policy options at the state and federal level that will help america s higher education system continue to fulfill its promise

Charles Lemert is one of the most renowned critics of social theory and theorists today. The editors of this book have offered and contextualised many of his best essays and situated them against the backdrop of American sociology. The breadth of Lemert's work doesn't stop at an academic engagement with theoretical debates such as globalisation or postmodernism but cuts right to the heart of abiding social issues. His work is focused and continues to probe pressing questions such as the rise of vulnerabilities in an era of new capitalism by weaving together personal narrative, research, lucid explanations and a dynamic engagement with social theory of old and new. His unique prose renders accessible complex theoretical debates.

A prize-winning five-decade history of the evangelical movement in Southern California that explains a sweeping realignment of American politics from Bible Belt to Sun Belt. It tells the dramatic and largely unknown story of plain folk, religious migrants, hardworking men and women from

Oklahoma, Texas and Arkansas who fled the Depression and came to California for military jobs during World War II. Investigating this fiercely pious community at a grassroots level, Darren Dochuk uses the stories of religious leaders including Billy Graham as well as many colorful lesser-known figures to explain how evangelicals organized a powerful political machine. This machine made its mark with Barry Goldwater, inspired Richard Nixon's Southern Strategy and achieved its greatest triumph with the victories of Ronald Reagan. Based on entirely new research, the manuscript has already won the prestigious Allan Nevins Prize from the Society of American Historians. The judges wrote: Dochuk offers a rich and multidimensional perspective on the origins of one of the most far-ranging developments of the second half of the twentieth century: the rise of the New Right and modern conservatism.
