in 1980 and 1981 imprisoned irish nationalists embarked on a hunger strike to protest margaret thatcher s british government empowered by their belief that they were prisoners of war rather than convicted criminals the young men refused to wear prisoners uniforms and began a hunger strike to protest their status both in prison and in terror stricken northern ireland led by bobby sands who was elected to parliament while on strike in jail and supported by the firepower of the ira the prisoners endured a grueling test of faith and will some mother s son tells their story through the shared experience of two mothers one a strident nationalist the other a pacifist who must come to terms with the political beliefs that may take their sons lives

contemporary turkish politics have long been roiled by cultural and social debates rooted in the legacy of modernization initiated in the 1920s by mustafa kemal atati 1 2rk islamist challenges to ataturk s secularism to political corruption and economic inefficiency and debates over the meaning of human rights all remain open to argument in ankara as well as elsewhere undoubtedly they exert influence on turkey s position in world affairs and reinforce its double identity between the west and the

islamic world dangerous neighborhood examines turkish foreign policy problems both with its immediate neighbors in the caucasus and middle east and in its essential strategic relations with the european union and the united states how important is washington for turkey s strategic interests considering its controversial relations with the european union the kurdish problem has affected turkey s bid for eu membership and also its relations with the united states as the war on terrorism is pursued are turkish values and national interests based on the legacy of atati 1 2rk compatible with minority rights as defined by the european union and if not why not moreover is there any advantage to turkey in joining the european union or is the price too high relating to human rights concessions and legal issues these important questions are examined in this volume in the caucasus turkey is an important factor if for no other reason than its size and common borders turkey s role whether ankara likes it or not remains important for both russian ambitions and local ethnic groups seeking either autonomy or independence chechens abkhaz circassians among others ankara s dilemma is whether to support co nationals and co religionists or to seek normal relations with moscow the solution to this dilemma is debated in this volume in other parts of the world turkey also plays a central role for example ankara s close military and political relations with israel contribute to a different strategic and military balance in the middle east turkey s views are seldom made public and few turks have believed it is important to present their case this book with contributors from turkey as well as the west is

intended in part to broaden understanding of turkey s position dangerous neighborhood will be of interest to political scientists foreign policy analysts and middle east specialists

consent works moral magic things that would otherwise be wrong to do to someone are with that person s consent made morally permissible but what is consent and how does it work what can be taken for consent perhaps wrongly and with what consequences how does consent come into being and pass out of it how can consent be conferred invoked and revoked what is the role of social and legal norms in governing consent how contextually sensitive should those norms be in applying to diverse settings ranging from sexual encounters to prison hospitals to the poll booth those are the sorts of broad questions animating this book it aspires to provide a comprehensive account of the social practice of consent informed by deep reading in the history of ideas philosophy law political science and sociology consent matters thus serves at one and the same time as a guide for the perplexed social practitioner of consent and as a touchstone for philosophical attempts to theorize and to refine those existing practices

the book examines how exercises of power and processes of security exercised in the occupied palestinian territories have formed palestinian women as subjects to understand how women experience occupation this book examines the various ways in which the occupation is directed at making palestinian women into subjects of power the work argues that the exercises of power are focused on controlling

and disciplining women's bodies the objectives are to expose how the exclusions of women's daily lived experiences of conflict in the occupied Palestinian territories obscures how power operates to demonstrate how the elements of Israeli security practices make women insecure and to highlight how resistance to the occupation can be found embedded within daily life in the occupied territories ultimately all of these themes can be related more broadly to how women might experience conflict and resist subjectification by exposing different ways that subjectifications result in insecurities and resistance to those insecurities while the book is specific to women in the occupied Palestinian territories the exercises of power and enactments of resistance it exposes demonstrate how important it is to take seriously the feminist argument that the personal is international and the international is personal this book will be of much interest to students of gender politics critical security studies middle eastern politics sociology and IR in general

this book draws together the work of a new community of scholars with a growing interest in carceral geography the geographical study of practices of imprisonment and detention it combines work by geographers on mainstream penal establishments where people are incarcerated by the prevailing legal system with geographers recent work on migrant detention centres where irregular migrants and refused asylum seekers are detained ostensibly pending decisions on admittance or repatriation working in these contexts the book s contributors investigate the geographical location and spatialities of institutions the nature of spaces of incarceration and detention and experiences inside them governmentality and prisoner agency cultural geographies of

penal spaces and mobility in the carceral context in dialogue with emergent and topical agendas in geography around mobility space and agency and in relation to international policy challenges such as the dis functionality of imprisonment and the search for alternatives to detention this book presents a timely addition to emergent interdisciplinary scholarship that will prompt dialogue among those working in geography criminology and prison sociology

in this first comprehensive comparison of left wing violence in the united states and west germany jeremy varon focuses on america s weather underground and germany s red army faction to consider how and why young middle class radicals in prosperous democratic societies turned to armed struggle in efforts to overthrow their states based on a wealth of primary material ranging from interviews to fbi reports this book reconstructs the motivation and ideology of violent organizations active during the 1960s and 1970s varon conveys the intense passions of the era the heat of moral purpose the depth of utopian longing the sense of danger and despair and the exhilaration over temporary triumphs varon s compelling interpretation of the logic and limits of dissent in democratic societies provides striking insights into the role of militancy in contemporary protest movements and has wide implications for the united states current war on terrorism varon explores weatherman and raf s strong similarities and the reasons why radicals in different settings developed a shared set of values languages and strategies addressing the relationship of historical

memory to political action varon demonstrates how germany s fascist past influenced the brutal and escalating nature of the west german conflict in the 60s and 70s as well as the reasons why left wing violence dropped sharply in the united states during the 1970s bringing the war home is a fascinating account of why violence develops within social movements how states can respond to radical dissent and forms of terror how the rational and irrational can combine in political movements and finally how moral outrage and militancy can play both constructive and destructive roles in efforts at social change

this book disseminates current information pertaining to the modulatory effects of foods and other food substances on behavior and neurological pathways and importantly vice versa this ranges from the neuroendocrine control of eating to the effects of life threatening disease on eating behavior the importance of this contribution to the scientific literature lies in the fact that food and eating are an essential component of cultural heritage but the effects of perturbations in the food cognitive axis can be profound the complex interrelationship between neuropsychological processing diet and behavioral outcome is explored within the context of the most contemporary psychobiological research in the area this comprehensive psychobiology and pathology themed text examines the broad spectrum of diet behavioral and neuropsychological interactions from normative function to occurrences of severe and enduring psychopathological processes

the government led by syriza in greece elected in january 2015 at first seemed to be the most radical european government in recent history it proclaimed itself the government of hope and throughout the world symbolized the hope that radical change could be achieved through institutional politics the referendum of july 2015 rejected the austerity imposed by the banks

and the european union but was followed by a complete reversal of the government s position and its acceptance of that austerity the collapse of hope that accompanied the failure of the institutional left opened the way to the return of the right wing new democracy party with a more aggressive program than ever the essays collected in beyond crisis among other things form a case study of the greek experiment that points to deeper implications concerning the global upsurge of disillusioned anger that has spurred the rise of far right populism and support for strong leaders exclusion of ethnic minorities and greater racial purity the syriza government s dramatic crash showed the limits of institutional politics a lesson apparently overlooked by the enthusiastic followers of jeremy corbyn and bernie sanders but it also poses profound questions for those who reject state centered politics the anarchist or autonomist movement in greece has been one of the strongest in the world yet it has failed to have a significant impact in opening up alternative perspectives so how do we pick up the pieces what direction should we follow from now on how do we understand what happened and learn from it the essays in this collection do not point to a single conclusion or path forward but rather raise questions that remain open about how to move beyond the current crisis amid a darkening sky of seeming impossibility

this collection of previously published work on security and rights focuses on the appropriate relationship between rights and what we can think of as counterterrorism policy such a focus might seem both necessary because of 9 11 and unfortunate because there are other causes of

insecurity besides terrorism however the intensity of the war on terror has created an ongoing surge of scholarship on the relationship between security and human rights that either has indirect implications for debates about security where terrorism is not in issue or has directly led to an attempt to rethink more generally the idea of security and its relationship to rights

this book explores the representation of intra state conflicts it offers a distinctive approach by looking at narrative forms and strategies associated with civil war testimony historiography and memory the volume seeks to reflect current research in civil war in a number of disciplines and covers a range of geographical areas from the advent of modern forms of testimonies history writing and public remembering in the early modern period to the present day in focusing on narrative broadly defined the contributors not only explore civil war testimonies historiography and memory as separate fields of inquiry but also highlight the interplay between these areas which are shown to share porous boundaries chapters look at the ways in which various narrative forms feed off each other be they oral written or visual narratives personal or collective accounts or testimonies from victims or perpetrators

this book reconsiders the use of food metaphors and the relationship between law and food in an interdisciplinary perspective to examine how food related topics can be used to describe or identify rules norms or prescriptions of all kinds the links between law and food are as old as the concept of law many authors have been using such links in creative ways to express specific features of law this is because the language of food and cooking offers legal thinkers and teachers mouth watering metaphors comparing rules to recipes and their combination to culinary processes this collection focuses on this relationship between

law and food and takes us far beyond their mere interaction to explore different ways of using these two apparently so diverse elements to describe different phenomena of the legal reality the authors use the link between food and law to describe different aspects of the legal landscape in different areas and jurisdictions bringing together metaphors and indirect correlations between law and food the book explores different models of approaching legal issues and considering different legal challenges from a completely new perspective in line with the multidisciplinary approach that leads comparative legal studies today and to a certain extent revisiting and enriching it with contributions in english and french the book will be of interest to academics and researchers working in the areas of law and food law and language and comparative legal studies

the ashgate research companion to migration law theory and policy complements the already successful ashgate series law migration established in 2006 which now has a number of well regarded monographs to its credit the purpose of this companion is to augment that series by taking stock of the current state of literature on migration law theory and policy and to sketch out the contours of its future long term development in what is now a vastly expanded research agenda the companion provides readers with a definitive and dependable state of art review of current research in each of the chosen areas that is all embracing and all inclusive of its subject matter the chapters focus on the regional and the sub regional as well as the national and the global in so doing they aim to give a snap shot that is

contextual coherent and comprehensive the contributors are both world renowned scholars and newer voices and include scholars practitioners former judges and researchers and policy makers who are currently working for international organisations

the decision to emigrate has historically held differing promises and costs for women and for men exploring theories of difference in labor market participation network formation and the immigrant organising process on belonging and diaspora and a theory of vulnerability a global history of gender and migration looks critically at two centuries of the migration experience from the perspectives of women and men separately and together uniquely investigating the subject globally over time this book incorporates the history of migration in areas as far flung as yemen sudan the netherlands france belgium poland the soviet union the us and the uk an approach that allows for patterns to emerge over time a global history of gender and migration further shows that although there are various points on which migrant men and women differ and several theories exist to explain these differences this comprehensive guide offers a unifying thesis on the theories and practice of migration adding to our insight into the mechanisms underlying the creation of differences between migrant men and women

traditional democratic structures in the western world are coming under increasing pressure a combination of political corruption voter apathy and attacks on the rights of the citizen are being driven by authoritarian tendencies not seen for generations in turn this is being stoked by an artificial climate of fear choreographed as a narrative of external terrorist threats and war against yet another evil empire much of the decision making of government has been bought or hijacked by big business whilst a whole generation of citizens has become increasingly cynical about the probity and ethics of their politicians the current extent of public distrust and antagonism for the political elite is matched only by shocking levels of voter apathy throughout the democratic world this situation has created an unhealthy and perilous disconnection between the electorate and the political classes as in any evolving environment this gap is being filled in this case the

democratic deficit is being bypassed using various forms of civil rebellion as a substitute for a functioning parliamentary system nonviolent rebellion has a long history but since the industrial revolution the use of organised civil disobedience has become increasingly widespread and refined with the advent of the internet civil rebellion itself has been totally revolutionised the rules of the game have truly changed and control of the truth has to some extent finally been democratised these days the big beasts on the political landscape are no longer labour unions fighting a local cause but global movements representing hundreds of millions of activists across a borderless world and their armoury is formidable even the smallest local protest group has been immensely empowered by recent technological change here we present a practical guide to civil rebellion defining more than 300 separate ways in which citizens may effectively deliver a protest to an authority and the public either alone or in a group in comparison with the ballot box civil disobedience seems a rough way of dealing with authority but in the absence of a functioning democracy it is rapidly becoming the last resort of the citizen to defend their freedom from an increasingly reviled dysfunctional and autocratic political establishment this book is a practical guide it is designed to help in the routine planning and organisation of peaceful protest but the book also includes a history of civil rebellion and a moral and legal discussion of how civil disobedience may be used to achieve political objectives this practical information is supported by a description of the best techniques for use in the strategic planning of

protest actions and the management of protest organisations though based on a wealth of protest history the emphasis of this book is on contemporary protest and it focuses especially on the impact of internet and communications technology on current protest campaigns politically this guide pays particular attention to the techniques used by authorities to infiltrate and undermine legitimate civil protest movements and how these efforts can be detected and managed by a protest group the book also provides practical advice on using similar subversive techniques against unscrupulous authorities above all the objective of this guide is to facilitate responsible political activists in delivering powerful effective nonviolent protests to an authority and to do this in a way which positively reinforces the concepts of democracy and universal human rights at a time when both democracy and human rights are threatened by the constant attacks by political opportunists civil disobedience is beginning to move centre stage indeed it seems to be rapidly becoming the only show in town for the aggrieved citizen of liberal persuasions in a world drowning in political corruption popular apathy and short sighted populist political culture

china s student movement of 1989 ushered in an era of harsh political repression crushing the hopes of those who desired a more democratic future communist party elites sealed the fate of the movement but did ill considered choices by student leaders contribute to its tragic outcome to answer this question teresa wright centers on a critical source of information that has been largely overlooked by the dozens of works that

have appeared in the past decade on the democracy movement the students themselves drawing on interviews and little known first hand accounts wright offers the most complete and representative compilation of thoughts and opinions of the leaders of this student action she compares this closely studied movement with one that has received less attention taiwan s month of march movement of 1990 introducing for the first time in english a narrative of taiwan s largest student demonstration to date despite their different outcomes the taiwan action ended peacefully and resulted in the government addressing student demands both movements similarly maintained a strict separation between student and non student participants and were unstable and conflict ridden this comparison allows for a thorough assessment of the origins and impact of student behavior in 1989 and provides intriguing new insights into the growing literature on political protest in non democratic regimes

this book uses the strategic relational approach
to explain how the labour governments of tony
blair and gordon brown integrated the united
kingdom into the us ballistic missile defence
system in order to maintain national security
and to uphold the special relationship while at
the same time recognising that voters were in
general opposed to missile defence labour s
ballistic missile defence policy 1997 2010
examines how the labour administration was
tasked with navigating a domestic political
environment in which they had to appear tough
on defence in general in order to appeal to a
broader range of the electorate while
recognising that voters were opposed to missile
defence in particular this book seeks to answer
the question of why the centre left government
of tony blair and gordon brown elected on a
mandate of multi lateralism in international
relations and espousing an ethical dimension to
foreign policy committed the united kingdom to
us ballistic missile defence an internationally
divisive military project associated with the us
republican party and george w bush in
particular this book is essential for students
and researchers interested in british military
history international relations strategic studies
british politics labour politics and political
theory

people care a great deal about justice they
protest and engage in confrontations with

others when their sense of justice is affronted
or disturbed when they do this they don t
generally act in a strategic or calculating way
but use arguments that claim a general validity
disputes are commonly regulated by these
regimes of justice implicit in everyday social life
but justice is not the only regime that governs
action there are some actions that are selfless
and gratuitous and that belong to what might
be called a regime of peace or love in the
course of their everyday lives people constantly
move back and forth between these two
regimes that of justice and that of love and
everyone also has the capacity for violence
which arises when the regulation of action
within either of these regimes breaks down in
love and justice as competences boltanski lays
out this highly original framework for analysing
the action of individuals as they pursue their
day to day lives the framework outlined in this
important book is the basis for the path
breaking work that he has developed over the
last twenty years work that has examined the
moral foundations of society in and through the
forms of everyday conflict for anyone who
wants to understand what a critical sociology
might mean today this book is an essential text

this book provides a unique analysis of prisons
and the violence at work inside them it not only
addresses aspects such as racial discrimination
especially in us prisons but also gender
differences specific criminal groups operating
within prisons the reintegration processes and
its failures combining works by various authors
it presents diverse perspectives on prison
violence in countries ranging from the usa to
australia crossing european countries such as

portugal and spain among others but also specific aspects such as prohibitions on phone calls the economic crisis and the current challenges of mass incarceration as such it offers a broad overview of several problems relevant to all scholars interested in deepening their understanding of violence in prisons

providing a clear and accessible guide to medical law this work contains extracts from a wide variety of academic materials so that students can acquire a good understanding of a range of different perspectives

jails are the largest service providers of mental health in the united states unlike prisons where all incarcerated individuals have been convicted of a crime and are serving long sentences most individuals incarcerated in jails are waiting a disposition to their court case making this pretrial environment particularly chaotic jail detainees have higher prevalence rates of mental illness trauma suicide and substance use than individuals in the community or even in prisons adequate mental health interventions are essential to prevent suicide to mitigate acute psychopathology retraumatization and

stress and to reduce recidivism mental health practice and research in jails requires specialized knowledge but the vast majority of the literature on correctional mental health is derived from prison research the handbook of mental health assessment and treatment in jails draws upon existing research and the experiences of a range of correctional psychologists psychiatrists and researchers to provide guidance for working with people with mental health needs in jails the handbook both advances knowledge in correctional mental health in the jail setting and serves as a call to action for researchers to continue developing a scientific base for jail correctional mental health chapters include legal and ethical considerations in jails reentry issues that are specific to jails interventions for competency restoration in jail detainees assessment and treatment of neurodevelopmental and neurocognitive disorders special considerations for rural jails and special populations such as adolescents and women this book will serve as a go to guide for mental health professionals who provide clinical services in jails jail administrators and researchers
