the israeli peace movement has been in decline since the 2000s in particular the liberal zionist groups who call for peace for the sake of the security and continuity of israel have become paralysed and almost voiceless since the second intifada however despite the stagnation around the israeli palestinian peace process this book argues that other important groups have emerged that present new ways to challenge the status quo these are radical groups that act in solidarity with the palestinians and human rights organisations and whose aim is to reveal the realities of the occupation and hold the government to account leonie fleishmann

argues that these groups have been and remain the agenda setters pushing the more moderate groups to mobilise more quickly and encouraging them to take up more confrontational ideas using social movements theory and based on 50 interviews and participant observation this book sheds light on contemporary israeli peace activism

this book analyzes social movements across a range of countries in the non western world bosnia brazil egypt india iran palestine russia syria turkey and ukraine in the period 2008 to 2016 the individual case studies investigate how political and social goals are framed nationally and globally and the types of mobilization strategies used to pursue them the studies also assess how in the age of transnationalism the idea of participatory democracy produces new collective action frames and mass mobilization strategies the book challenges the view that most social movements unequivocally seek to achieve higher levels of democratization instead the authors argue that protesters across different movements advocate more involved forms of citizen participation since passive representation through liberal democratic institutions fails to address mass grievances and demands for accountability in many countries

why do some national movements use violent protest and others nonviolent protest wendy pearlman shows that much of the answer lies inside movements themselves nonviolent protest requires coordination and restraint which only a cohesive

movement can provide when by contrast a movement is fragmented factional competition generates new incentives for violence and authority structures are too weak to constrain escalation pearlman reveals these patterns across one hundred years in the palestinian national movement with comparisons to south africa and northern ireland to those who ask why there is no palestinian gandhi pearlman demonstrates that nonviolence is not simply a matter of leadership nor is violence attributable only to religion emotions or stark instrumentality instead a movement s organizational structure mediates the strategies that it employs by taking readers on a journey from civil disobedience to suicide bombings this book offers fresh insight into the dynamics of conflict and mobilization

negotiations between israel and the arab states have continued in one form or another for over a decade through three israeli administrations the death of a king of jordan and through countless riots and incidences of protest by palestinians and jews alike the agreements that have been reached and some situations established by defacto rule and force majeure have created possibly irreversible economic and political structures this collection presents a debate among eminent scholars and public officials over the power these structures engender in the region

written by a group of professors specializing in the palestinian issue and five senior hamas leaders the 704 page book is edited by dr mohsen saleh the book examines hamas s vision and experience in all its aspects the work sticks to two main commitments first adherence to academic research methods and the accuracy objectivity and extensive documentation necessary to them the second is the attempt to present hamas as it really is whether by the contributions of specialized researches who are well informed of hamas and its experience or by the contributions of hamas leaders who have addressed a number of issues and presented a more comprehensive picture of the movement particularly so when the available literature is insufficient to clarify all the issues being researched especially for western audiences interested in understanding the palestinian issue of which hamas has become a key component in the past decade the book falls in two parts the first is a collection of eleven studies on hamas and its experience in which chapter one presents an overview of the movement experience and history it discusses the background and inception and considers hamas a continuation of the work of the muslim brothers mb movement that began in the form of popular advocacy through a network of branches and offices beginning in 1945 interestingly this chapter examines events that reflect the extent of the mb movement s participation in armed resistance as well as preaching activities in addition to their links to the establishment of the fatah movement which was co founded by mb figures this chapter digs deeper in to the stages that hamas underwent especially between 1987 and 2005 the

second chapter gives the reader the chance to examine hamas s political vision addressing the wellsprings of hamas s political ideology its approach to religion and state law and constitution and its views on nationalism secularism and democracy finally it addresses the rights of minorities in hamas s political thought the chapter contains a plethora of answers to questions usually raised by those interested to learn about hamas s ideas bearing in mind that it is difficult to find material that expresses hamas s intellectual frameworks in such a comprehensive manner except through some of the interviews which still are no match for the topics covered by the book in the third chapter we delve into hamas conceptualization of the other meaning hamas s view of israel judaism jews zionism and zionists which is the basis for understanding the background and future of the conflict the book in the fourth and fifth chapters continues to analyze the relationship between hamas and the palestine liberation organization plo and its factions and hamas s position on islamic palestinian movements including the sufis and salafis hizb ut tahrir and the islamic jihad movement in palestine pij explaining the convergences and divergences with these factions this is based on analyzing both hamas s theoretical framework and policies drawing from primary sources the sixth chapter highlights an important issue namely the peace process naturally readers will wonder how hamas s actions and visions approach the peace process in this chapter the author examines the stages of evolution of hamas s political position on the peace process whether through the movement s theoretical and intellectual

frameworks or its practices on the ground the seventh chapter tackles in detail hamas's vision for political and social reform in palestine based on the set of principles the group has committed itself to including its insistence on political freedom for all and the rights of the palestinian people hamas's political reform project is not confined to internal palestinian matters but also cover foreign relations especially with arab and muslim countries in addition hamas's social reform platform focuses on combatting poverty as the entry point for comprehensive development and reform the eighth and ninth chapters overview at length hamas's arab and islamic relations by analyzing the determinants objectives and dimensions of hamas's relations an explaining its position towards the arab spring they also examine hamas's relations with turkey and iran and their evolution the tenth chapter deals with hamas's experience in government following the 2006 legislative elections this chapter explores the defects within the palestinian political system in order to determine the environment and challenges that hamas faced finally it assesses hamas performance in governance in the period 2006 2012 the eleventh chapter concludes the first part of the book by reviewing western academic literature on hamas with a view to answer the following fundamental question to what extent have these studies succeeded in understanding the true nature of hamas the second part of the book includes contributions by five senior hamas leaders attempting to answer a miscellany of questions regarding different issues appertaining to the movement these include a study by khalid mish al head of hamas political bureau which is entitled hamas milestones in

evolving nationalism examines how the idea of israel as a nation state has developed within zionist and israeli discourse over the past eight decades nadav g shelef focuses on the changing ways in which the main nationalist movements answered three distinct questions in their private and public ideological articulations between 1925 and 2005 where is the land of israel who ought to be israeli what should the zionist national mission be framed within broader debates about how and why changes in foundational definitions of the nation occur shelef s analysis centers on the mechanisms of ideological change and then subjects them to empirical scrutiny he thus moves beyond the common but problematic assumptions that such transformations must be either a rare rational adaptation to traumatic shock or a relatively

constant product of manipulation by power hungry elites he finds that nationalist movements including radical and religious fundamentalist ones can and do change cardinal components of their ideological beliefs in both moderating and radicalizing directions these changes have more to do with the unguided consequences of engagement in day to day politics than with strategic reaction to new realities the use of force or the changing incentives of leaders engaging with some of the most contentious debates about the nature of israeli nationalism and the geographic religious and ethnic definition of the state of israel shelef has made signal contributions to our understanding of middle east politics and of the ideological underpinnings of nationalism itself

the phenomenon of political islam continues to dominate the political and social map of the arab world with the increasingly open struggle between ruling elites and islamists becoming the main source of political instability in many states this volume offers an in depth analysis of the rise of islamic and fundamentalist movements in the middle east and north africa through detailed case studies the contributors examine the various manifestations of political islam highlighting differences across movements and evaluating the varying circumstances in which they arise they also assess the influence of such movements on the emerging post cold war order in the region and consider questions of a general nature such as islamic state theories and the impact of islamicism on international relations

why is it that some social movements engaged in contentious politics experience radicalization whereas others do not the

dynamics of radicalization offers an innovative reply by investigating how and when social movement organizations switch from a nonviolent mode of contention to a violent one moving beyond existing explanations that posit aggressive motivations grievances or violence prone ideologies this book demonstrates how these factors gain and lose salience in the context of relational dynamics among various parties and actors involved in episodes of contention drawing on a comparative historical analysis of al Qaeda the Red Brigades the Cypriot EOKA the authors develop a relational mechanism based theory that advances our understanding of political violence in several important ways by identifying turning points in the radicalization process similar mechanisms at work across each case and the factors that drive or impede radicalization the dynamics of radicalization offers a counterpoint to mainstream works on political violence which often presume that political violence and terrorism is rooted in qualities intrinsic to or developed by groups considered to be radical

violent non state actors have become almost endemic to political movements in the middle east and the horn of africa this book examines why they play such a key role and the different ways in which they have developed placing them in the context of the region separate chapters cover the organizations that are currently active including the muslim brotherhood the islamic state in iraq and syria jabhat al nusra hamas hizbullah the pkk al shabab and the huthis the book shows that while these groups are a new phenomenon they also relate to other key factors including the unfinished business of the colonial and postcolonial eras and tacit encouragement of the wahhabi salafi jihadi da wa by some regional powers their diversity means violent non state actors elude simple classification ranging from national and transnational to religious and political movements however by examining their origins their supporters and their motivations this book helps explain their ubiquity in the region
