Although the United States has prioritized its fight against militant groups for two decades, the transnational jihadist movement has proved surprisingly resilient and adaptable. Many analysts and practitioners have underestimated these militant organizations, viewing them as unsophisticated or unchanging. Despite the ongoing evolution of their tactics and strategies, in enemies near and far, two internationally recognized experts use newly available documents from al-Qaeda and ISIS to explain how

jihadist groups think, grow, and adapt. David Gartenstein-Ross and Thomas Joscelyn recast militant groups as learning organizations, detailing their embrace of strategic, tactical, and technological innovation. Drawing on theories of organizational learning, they provide a sweeping account of these groups' experimentation over time. Gartenstein-Ross and Joscelyn shed light on militant groups' most effective strategic and tactical moves, including attacks targeting aircraft and the use of the internet to inspire and direct lone attackers. They examine jihadists' ability to shift their strategy based on political context while militant groups' initial efforts to upgrade their capabilities often fail. These attempts should generally be understood not as failures but as experiments in service of a learning process, a process that continues until these groups achieve a breakthrough. Providing unprecedented historical and strategic perspective on how jihadist groups learn and evolve, enemies near and far also explores how to anticipate future threats, analyzing how militants are likely to deploy a range of emerging technologies.

in 2019 islamic state lost its last remaining sliver of territory in syria and its caliph abu bakr al baghdadi was killed these setbacks seemed to herald the caliphate s death knell and many now forecast its imminent demise yet its affiliates endure particularly in africa nearly all of islamic state s cells on the continent have reaffirmed their allegiance attacks have continued in its name many groups have been reinvigorated and a new province has emerged why in africa did the two major setbacks of 2019 have so little impact on support for islamic state the islamic state in africa suggests that this puzzle can be explained by the emergence and evolution of islamic state s provinces in africa which it calls sovereign subordinates by examining the rise and development of eight islamic state cells the authors show how having pledged allegiance to is central cells evolved mostly autonomously using the is brand as a means for accrual of power but in practice receiving relatively little if any direction or material support from central command given this pattern is central s relative decline has had little impact on its african affiliates who are likely to remain committed to the caliphate s cause for the foreseeable future

the works collected in the lure of

authoritarianism consider the normative appeal of authoritarianism in light of the 2011 popular uprisings in the middle east despite what seemed to be a popular revolution in favor of more democratic politics there has instead been a slide back toward authoritarian regimes that merely gesture toward notions of democracy in the chaos that followed the arab spring societies were lured by the prospect of strong leaders with firm guiding hands the shift toward normalizing these regimes seems sudden but the works collected in this volume document a gradual shift toward support for authoritarianism over democracy that stretches back decades in north africa contributors consider the ideological socioeconomic and security based justifications of authoritarianism as well as the surprising and vigorous reestablishment of authoritarianism in these regions with careful attention to local variations and differences in political strategies the volume provides a nuanced and sweeping consideration of the changes in the middle east in the past and what they mean for the future

jihadist narratives have evolved dramatically over the past five years driven by momentous events in the middle east and beyond the death of bin laden the rise and ultimate failure of the arab spring and most notably the rise of the so called islamic state for many years al qaeda pointed to an aspirational future caliphate as

their utopian end goal one which allowed them to justify their violent excesses in the here and now islamic state turned that aspiration into a dystopic reality and in the process hijacked the jihadist narrative breathing new life into the global salafi jihadi movement despite air strikes from above and local disillusionment from below the new caliphate has stubbornly persisted and has been at the heart of isis s growing global appeal this timely collection of essays examines how jihadist narratives have changed globally adapting to these turbulent circumstances area and thematic specialists consider transitions inside the middle east and north africa as well as in south asia sub saharan africa and europe as these analyses demonstrate the success of the isis narrative has been as much about resonance with local contexts as it has been about the appeal of the global idea of a tangible and realised caliphate

after saddam american foreign policy and the destruction of secularism in the middle east investigates the manner in which american foreign policy in iraq artificially shifted the balance of power in the region and brought religious identities to the foreground deposing saddam hussein resulted in a new regional order that diminished the strength of secular nationalism elevated iran and saudi arabia as regional rivals and by implication established a new ideological paradigm that privileged competing religious factions over secular ideals the trend first manifested itself in iraq during the american occupation with iranian backed shiites fighting saudi supported sunnis a similar

dynamic is evident in current regional wars in syria and yemen by elevating particular groups through rhetorical financial and military support civil conflicts in the middle east reflect the ideologies behind the saudi iranian rivalry this book therefore looks beyond popular narratives of intractable long standing sunni shia conflict to explain the source of current sectarian tension as a product of balance of power dynamics it

also helps to explain the fracturing of the region that created a ripe environment for groups like the islamic state to capitalize on sectarian grievances this book relies and builds on balance of power theorizing by looking at the way that traditional competition for power between states and nonstate actors shapes ideological competition for example during the cold war the two major world powers the u s and the soviet union helped to shape international conflicts so

that the narrative of capitalism vs communism played a prominent role in civil and international conflicts such as in korea nicaragua or angola by meddling in the internal affairs of states arming rebel groups and lending support to competing factions the u s and u s s r shaped not only outcomes but also the ideas underpinning conflicts today a similar dynamic can be discerned in the middle east
