awakening to china s rise provides the most comprehensive analysis to date of how europe s major powers have responded to the re emergence of china as a great power in world politics since the end of the cold war to do so it puts forward a unique cross regional comparison of how the major european powers france germany and the united kingdom have confronted chinese assertiveness both in the asia pacific and in europe firstly it analyses their response to china s increasingly muscular regional posture in the asia pacific through the development of diplomatic and security initiatives with partners in the region secondly it delineates how they have confronted china s inroads into europe looking at the measures that they have taken to tackle chinese investments in

and supply of technologies in strategic sectors such as critical national infrastructures dual use technologies and in the digital domain including huawei s 5g networks a longstanding assumption in the ir literature has been that european foreign policies toward the people s republic of china have been driven by a na ve and self interested focus on the economic opportunities presented by such a vast market overlooking security considerations this book challenges such common belief through a detailed examination of the policies of france germany and the united kingdom from 1989 to the present its central argument is that whereas this assessment aptly characterized the first two post cold war decades beijing s growing assertiveness after 2009 caused the three major european powers to awaken to china s rise in the 2010s heightened threat perceptions of china coupled with increasingly competitive bilateral economic relations with the prc have gradually and cumulatively caused the hardening of their policy goals which in turn translated into the formulation of new policy

instruments to confront such a challenge to substantiate this argument the book relies on a large body of previously undisclosed primary sources including 223 interviews conducted with senior officials in europe berlin brussels london paris in the united states washington dc and in asia beijing shanghai new delhi seoul declassified archival documents from france the uk and germany leaked us diplomatic cables and new data on european naval deployments

this book explores the foreign and security policies of germany france and the uk vis vis china despite the progress made by the lisbon treaty and notwithstanding the first eu global strategy the

european union does not have a strategy to address the rise of china since this strategic deficit does not automatically reflect the level of eu member states this book argues that the vacuum at eu level provides member states with an opportunity to fill this gap by assuming that an increase in national policies on china would eventually lead to a comprehensive european strategy for china the author focuses on the three biggest european countries and looks at the rise of china to understand the development of the eu s common foreign and security policy vis vis the prc while the cfsp depends on the contribution of eu member states their role in shaping the cfsp towards china has not been researched yet and this book fills the gap

by the year 2000 a balance was sought between security requirements and a respect for privacy as well as for individual and collective freedoms as we progress further into the 21st century however security is taking precedence within an increasingly controlled society this shift is due to advances in innovative technologies and the investments made by commercial companies to drive constant technological progress despite the implementation

of the general data protection regulation gdpr within the eu in 2018 or 2020 s california consumer privacy act ccpa regulatory bodies do not have the ability to fully manage the consequences presented by emerging technologies security and its challenges in the 21st century provides students and researchers with an international legal and geopolitical analysis it is also intended for those interested in societal development artificial intelligence smart cities and quantum cryptology

the book explains why and how the un security council authorizes international criminal investigations into mass atrocities in doing so it tackles head on the obvious double standards of global justice where few atrocities get investigated and most slip below the headlines the book argues that the council s decision making procedure is central to understanding the council s decisions this procedure is broken into three distinct steps namely the role of diplomats at the council the council s reliance on third parties and the council s resort to

precedent the volume documents that the council authorized international criminal investigations only into the handful of mass atrocities for which the council's deliberations successfully completed each of these three steps written for both scholars and practitioners the book combines insights from the fields of international relations international law and human rights through archival research and interviews with unsc diplomats who took part in deliberations on atrocities the volume presents evidence that supports its argument across cases and across time in doing so the book avoids the yes no or 0 vs 1 tendency of many social science projects thereby acknowledging that there is no silver bullet to explain the work of the council's five permanent and ten elected members chris kaoutzanis's procedure matters is a deep dive into how the un security council actually works in dealing with some of the world's worst atrocities showing that un procedure does matter kaoutzanis illuminates the limited accountability for international crimes that can be expected from that vital

institution as importantly he offers a road map for how to use un legitimating procedures to navigate the power politics of that august body this is a map no scholar of international institutions and no human rights activist should be without michael doyle columbia university this project recognizes what the scholarly literature has generally ignored or deemphasized the central role of the security council in responding to mass atrocity situations as much as international lawyers would hate to admit it the legal response to international crimes is initially controlled not by international judges and tribunals but rather by the security council and its geopolitical and diplomatic complications kaoutzanis has put the sun back at the center of our solar system jens david ohlin cornell law school

the issues that increasingly dominate the 21st century cannot be solved by any single country acting alone no matter how powerful to manage the global economy prevent runaway environmental destruction reign in nuclear proliferation or confront other global challenges we must cooperate but at the same time our tools for global policymaking

chiefly state to state negotiations over treaties and international institutions have broken down the result is gridlock which manifests across areas via a number of common mechanisms the rise of new powers representing a more diverse array of interests makes agreement more difficult the problems themselves have also grown harder as global policy issues penetrate ever more deeply into core domestic concerns existing institutions created for a different world also lock in pathological decision making procedures and render the field ever more complex all of these processes in part a function of previous successful efforts at cooperation have led global cooperation to fail us even as we need it most ranging over the main areas of global concern from security to the global economy and the environment this book examines these mechanisms of gridlock and pathways beyond them it is written in a highly accessible way making it relevant not only to students of politics and international relations but also to a wider general readership

multilateral approval channels of power offers a rationalist alternative to these standard legitimization arguments one based on the notion of strategic information transmission when state actions are endorsed by an independent organization this sends politically crucial information to the world community both leaders and their publics and results in greater international support

it gives us immense pleasure to get published book on one of the untouched topics of academic excellence a topic the ignificance of which in this continuously changing world of globalisation and urbanization cannot be denied we are pleased to roll out our book on global administrative law the scheme of the book starts from research paper contributed by the editor in chief dr mohammad hmad and mr harsh raj jaiswal on global administration of information communication technology need for convergence the theme of their paper rolls from giving an outlook to various horizons of convergence in older sense to throwing
