this is the first time in palestine that muslim women and pious women take part in the conflict on al haram al sharif since 1970 the muslim palestinian women participated in many political and social activities by hamas movement in universities and muslim palestinian associations in the past secular palestinian women took part in the conflict in national palestinian movement but now the pious palestinian women take a big role in the conflict and became political power and encourage the youth for intifada against jewish groups to prevent them from taking over al haram al sharif in short pious palestinian women became members in palestinian parliament and became members in political committee for islamic movements in addition pious palestinian women created many social and culture and methodology to educate girls and women inside the haram how to face and stop the jewish groups activities in the haram

the israeli palestinian conflict is more than a local or regional dispute its ongoing and escalating nature increases the risk that the violence will spill over its present borders and contribute to both extremism and terrorism while the intifada from 1987 to 1993 was largely a popular uprising and a political struggle the recent clash is a war with a steady escalation between conventional and unconventional forces it is in the interest of all major powers the international community and the united nations to press both sides to accept a realistic peace plan noted middle east expert

anthony cordesman details this continuing struggle by explaining the issues at stake for each side the various combatants both directly and indirectly engaged as well as the course of the war in its various incarnations the situation on the ground is complex and the quest for peace is ever more uncertain if the intifada was a struggle for recognition that a peace had to be reached that was just for both sides the israeli palestinian war has polarized both sides away from peace convincing them of the justice of their own cause and tactics and the fundamental injustice of the other side s tactics and goals each side has used human rights international law and civilian casualties as political weapons the history of a near century of conflict is used to justify war rather than a search for peace

this exhaustive work offers readers at multiple levels key insights into the military political social cultural and religious origins of the arab israeli conflict the encyclopedia of the arab israeli conflict a political social and military history is the first comprehensive general reference encompassing all aspects of the contentious arab israeli relationship from biblical times to the present with an emphasis on the era beginning with world war i the encyclopedia of the arab israeli conflict goes beyond simply recapping military engagements in four volumes with more than 750 alphabetically organized entries plus a separate documents volume it provides a wide ranging introduction to the distinct yet

inextricably linked arab and israeli worlds and worldviews exploring all aspects of the conflict the objective analysis will help readers understand the dramatic events that have impacted the entire world from the founding of modern israel to the building of the suez canal from the six day war to the camp david accords from the assassinations of anwar sadat and yitzhak rabin to the rise and fall of yasser arafat the 2006 palestinian elections and the israeli hezbollah war in lebanon

it is claimed that zionism as a meta narrative has been formed through contradiction to two alternative models the canaanite and crusader narratives these narratives are the most daring and heretical assaults on israeli jewish identity the israelis according to the canaanite narrative are from this place and belong only here according to the crusader narrative they are from another place and belong there the mythological construction of zionism as a modern crusade describes israel as a western colonial enterprise planted in the heart of the east and alien to the area its logic and its peoples the nativist construction of israel as neo canaanism demands breaking away from the chain of historical continuity these are the greatest anxieties that zionism and israel needed to encounter and answer forcefully the origins of israeli mythology seeks to examine the intellectual archaeology of israeli mythology as it reveals itself through the canaanite and crusader narratives

this book offers a unique perspective on the state of israel based on classical liberalism both on a historical and theoretical level specifically it makes a classical liberal and libertarian analysis based upon homesteading and private property rights to defend the state of israel as such this work explores the history of the jewish state both to provide a positive case for its right to exist and to clarify the myths surrounding its origin and development at the same time it deals with other relevant related subjects such as the complex situation between israel and the palestinian arabs the military campaigns against the jewish state the connection between anti zionism and anti semitism and israel s economic miracle the thorough analysis presented in this work intends to show not only why the voices and movements against israel are wrong including the boycott divestment and sanctions movement bds but more importantly why israel is an example of human flourishing and freedom that every advocate for liberty should celebrate the classical liberal case for israel makes the practical and moral case for israel it is based on truths and facts that need to be repeated over and over block futerman understand that the only way to defeat a big lie is with a big truth benjamin netanyahu prime minister of the state of israel jerusalem israel classical liberalism often associated with the spread west from northern europe in creating free nations is argued here as applying to israel with ancient roots in the

since its establishment in the late 1970s  
israel s islamic movement has grown from a  
small religious revivalist organization focused  
on strengthening the faith of muslim  
palestinian citizens of israel to a countrywide  
sociopolitical movement with representation  
in the israeli legislature but how did it get  
here how does it differ from other islamic

although a rich literature combining international relations and domestic political developments has recently emerged most works specializing in state minority relations nationalism citizenship and human rights have not integrated insights from the field of international relations and security affairs into their analysis this absence is nowhere more visible than in the study of relations between the israeli state and its arab palestinian minority this book aims to bring back international relations and international security perspectives into the analysis of relations between the israeli state and its arab minority drawing on international relations theory it argues that the relationship between the israeli state and the predominant community as in many other

In 2003 after two years of negotiations a group of prominent Israelis and Palestinians signed a model peace treaty the document popularly called the Geneva Initiative contained detailed provisions resolving all outstanding issues between Israel and the Palestinian people including drawing a border between Israel and Palestine dividing Jerusalem and determining the status of the Palestinian refugees the negotiators presented this citizens initiative to the Israeli and Palestinian peoples and urged them to accept it one of the Israeli negotiators was Menachem Klein a political scientist who has written extensively about the Jerusalem issue in the context of peace negotiations although the Geneva Initiative was not endorsed by the governments of either side it became a fundamental term of reference for solving the Middle East conflict in this firsthand account Klein explains how and why these groups were able to achieve agreement he directly addresses the formation of the Israeli and Palestinian teams how they managed their negotiations and their communications with both governments he also discusses the role of third party facilitators and the strategy behind marketing the Geneva Initiative to the public a scholar

and participant in the Geneva negotiations Klein is able to provide both an inside perspective and an impartial analysis of the diplomatic efforts behind this historic compromise he compares the negotiations to previous Israeli-Palestinian talks both formal and informal and the resolution of conflicts in South Africa and Algeria Klein hopes that by treating the event as a case study we can learn a tremendous amount about the needs and approaches of both parties and the necessary shape peace must take between them

Turkey's contemporary defense and military strategy can be best understood as a result of the historical process the country has experienced this historical process has significantly altered the security environment surrounding Turkey while transforming her alliance relations ultimately producing a new political vision for the country and a defense and military strategy that serves this vision firstly although the end of the Cold War and the ensuing dissolution of the Soviet Union has ameliorated international security Turkey was faced with both conventional and asymmetric threats on multiple fronts this situation kept defense spending of the country at record levels despite military expenditures within NATO showing a rapid decline on the other hand the emerging political geography led to a series of new conflicts erupting in several hotspots from the Balkans through to the Caucasus and the Middle East emerging conflicts were thought to require a common response which

precipitated nato's evolution from a collective defense organization to a collective security organization concurrently it meant that turkey would actively join nato's new missions ranging from the peaceful resolution of disputes to stability operations with expeditionary forces featured by mobility jointness and readiness secondly the 9 11 terrorist attacks against the u s created profound ramifications for turkey's regional security and her alliance relations in particular the american military occupation of iraq jeopardized turkey's national security by effectively removing the political authority of that country and dismantling the iraqi army while the emerging political vacuum was filled by sectarian politics the scarcity of security was exploited by the pkk consolidating its presence in northern iraqi territories divided iraq has also transformed into a breeding ground for international terrorism which resulted in the rise of various extremist armed organizations including isis thirdly since the so called arab spring started in the early 2010s the political and security landscape of the middle east and north africa has undergone significant changes while the overthrow of dictators led to intra state conflicts in several places it was particularly the civil war in syria that alarmed turkish decision makers due to its transformation into a safe haven for various terrorist groups operating at turkey's southern frontiers bereft of concrete ally support turkey unilaterally launched military operations into northern syria in order to

eliminate isis elements as well as curbing the long term territorial ambitions of the pkk the arab spring has also aggravated previous tensions and engendered various factions that facilitated new alignments which is the case for today's eastern mediterranean and arab israeli relations against the backdrop of these considerations turkey's contemporary defense and military strategy has been formed in general this strategy lays down the principles of using military force to support the political aims of the country it operates as a bridge between policy and operation in a classical sense and that strategy is now not just informed by protecting the territorial integrity of the nation but has wider objectives including enhancing the country's international standing as well as achieving strategic autonomy this in turn has necessitated new tools that extend beyond a sole deterrent force namely military activism and defense industry investments along with the contribution to international security and commitments to the nato alliance the summer issue of insight turkey aims to explain the changing dynamics of turkey's military and defense strategy by taking into consideration current foreign and security policy practices of turkey in the middle east and north africa region more specifically this issue is an attempt to develop a new framework to understand turkey's revolution in its military and defense strategies hulusi akar the minister of national defense of turkey in his commentary sheds light on the

global and regional developments that threaten turkey's peace and stability and which contributed to shaping its defense strategy a strategy that targets finding common solutions to international problems in a collaborative way akar gives special attention to the contribution of the distinguished deterrent efficient motivated well trained and disciplined armed forces that are equipped with high level weaponry produced domestically using national resources within the context of the turkish defense industry's strong historical background □ small transformation and rationality of the turkish defense industry he emphasizes the necessity of addressing the recent rise of the turkish defense industry in two different but interrelated periods the first provided the defense industry with strong support with an extremely decisive and long term projection the second represents the transformation of the expectations from the defense industry in coordination with the changing position and function of the defense industry in bureaucratic mechanisms michael tanchuk commentary is a coherent and rigorous analysis of the logical result of turkey's post cold war strategic reorientation presented in its new expeditionary capability of enhanced naval capacity and new forward bases michael examines ankara's calibrating the use of its hard power instruments to serve its post lausanne strategic orientation toward establishing turkey centered inter regional connectivity in

the middle of the covid 19 global pandemic minister of health of the republic of turkey fahrettin koca underscores the role of turkey in the management of covid 19 his commentary asserts that turkey has successfully contained the covid 19 pandemic and prevented devastating consequences due to its idiosyncratic approach to the crisis and the robustness of its healthcare system after 85 years as a museum Hagia Sophia welcomes muslim worshippers a decision that has drawn intense criticism in turkey and worldwide however deputy minister of foreign affairs of the republic of turkey yavuz hese selim koran argues that the change of Hagia Sophia will not affect turkey's centuries old tradition of promoting tolerance harmony and diversity the final off topic commentary of this issue underlines the challenges to Pakistan's nuclear threshold Muhammad Haris Bilal Malik and Muhammad Abbas Hassan explain why Pakistan has been further threatened by India's aggressive policies and provocative military modernization the commentary concludes that Pakistan may be compelled to further revisit its nuclear threshold level to overcome India's aggression besides the commentaries this issue comprises five articles that focus on the turkish defense industry past present and future and underline the factors that led to its remarkable evolution the first article by Murat Yetiltepe presents a general framework of turkey's military and defense strategy by taking into account the main drivers primary

objectives and essential pillars as well as its tangible repercussions on the military mindset the author explains how the change in turkey s defense and military strategy stems both from turkey s changing security landscape and its quest to be an assertive regional player can k a s a article covers two interrelated strategic topics regarding turkey s national military capacity in the 21st century its defense technological and industrial base and its military policy both currently characterized by a burgeoning assertiveness in light of the rapid advances in technology that are continually shaping developments in the aerospace and defense sector notably the evolution of airpower arda mevlito lu provides us with an understanding of the features of the next generation of air warfare while presenting the status of the turkish air force and offering suggestions on several challenges and opportunities as a reply to the critics that turkey is caught between a rock and a hard place due to the adamant opposition of its nato allies mustafa kibaro lu tries to make sense of turkey s 400 choice by assessing the impact of the s 400 deal on turkey s defense industries on one hand he presents his conception of the current international political non order as an underlying factor behind the deal on the other he suggests that the deal must be approached from a wider perspective to grasp the extent of the service it has done in bolstering turkey s military industrial complex the last article related to the main

theme of this issue focuses on turkey s defense spending merve seren attempts to show that prioritization of defense spending during the ak party era is specifically the outcome of a political preference in other words the shift in the political landscape from idealism to realism associated with pragmatism our initial off topic article highlights how trump s peace plan optimistically called the deal of the century adopts the zionist discourse regarding al aqsa and its effects on undermining the muslim sovereignty over the mosque which will be a clear violation of the international law and status quo khalid el awaisi and cuma yavuz investigate the results of the implementation of trump s plan which they assert will lead to three main changes that would undo the centuries old status quo of masjid al aqsa completely and give israel full control over this important historic and religious site ahmad alshwawra and ahmad almuhtady s off topic article completes the dossier of this issue the authors examine the potential implications of jordan s decision to import mediterranean gas through israel on jordanian energy security with special attention to how this decision will impact jordanian foreign policy regarding the palestinian cause through a wide range of articles and commentaries this issue aims to bring to its readers a comprehensive framework on the transformation of turkey s defense industry and changing patterns of its military strategy trump s america the latest issue of insight

Judaism in the twenty first century has seen the rise of the messianic third temple movement as religious activists based in Israel have worked to realize biblical prophecies including the restoration of a Jewish theocracy and the construction of the third and final temple on Jerusalem's Temple Mount through groundbreaking ethnographic research. Messianic Zionism in the digital age details how third temple visions have gained considerable momentum and political support in Israel and abroad. The role of technology in this movement's globalization has been critical. Feldman skillfully highlights the ways in which the internet and social media have contributed to the movement's growth beyond the streets of Jerusalem into communities of former Christians around the world who now identify as the children of Noah. Bnei Noah she charts a path for future research while documenting the intimate effects of political theologies in motion and the birth of a new transnational Judaic faith.
