what is the future of the oil and gas sector in lebanon following the recent discovery of these valuable resources in the southern mediterranean including in the cypriot and israeli offshore reserves the possibility of lebanon also becoming a petroleum producing country has been raised this collection of essays addresses the major challenges and opportunities that accompany the country's hope to join the petroleum club covering the key policy issues from lebanon's susceptibility to the oil curse to the environmental risks of production this

book brings together expert analysis to offer answers at the institutional level of central importance the contributors argue is that for lebanon to benefit from the discovery of petroleum it must first reform its institutions with the full support of the voting public and civil society combining rigorous quantitative and qualitative research the lebanese center for policy studies has produced here an essential book that puts petroleum in lebanon and the important questions that come with it within a global perspective

key issues context the economy is being severely tested by the syria crisis the refugee influx has reached one quarter of the population fueling already high unemployment and poverty the political impasse from the presidential elections following months of negotiations over a new government adds to the uncertainty the economy is meanwhile suffering from a broad based deterioration with subdued growth and

widening fiscal imbalances public debt is on the rise progress on structural reforms has been limited on the positive side deposit inflows have held up and foreign exchange reserves are sizeable and security conditions have significantly improved lifting tourism prospects key challenges there is an urgent need for fiscal adjustment to achieve a sustainable debt reduction and structural reforms to boost growth and address social inequities key policy recommendations fiscal policy the immediate priority is to stop the fiscal deterioration and return to primary surpluses to avoid a possible loss of market confidence and put debt on a sustainable path the consolidation strategy should minimize the impact of a planned salary increase for the public sector include broad based and non distortionary revenue measures and rebalance expenditure away from electricity transfers toward capital and social spending to promote inclusive growth

passing a budget for 2014 would help anchor confidence fiscal management should be strengthened and anchored in a medium term perspective monetary policy the banque du liban bdl should continue to maintain high foreign exchange reserves as a buffer and signal of commitment to macro financial stability it should gradually withdraw from t bill auctions and adopt a strategy to improve its balance sheet over time financial sector capital buffers should be strengthened and the loan classification and restructuring rules and the aml cft regime further enhanced structural reforms reforms in the electricity sector and the labor market are imperative to address current competitiveness pressures lay the foundations for higher productivity growth and improve social conditions refugee crisis lebanon cannot shoulder the costs of the massive inflow of syrian refugees alone and international budget support is needed strong government commitment to

adjustment and reforms along with a concerted policy framework to deal with the refugee crisis would bolster credibility and help mobilize support

world energy resources is an explanatory energy survey of the countries and major regions of the world their geographic and economic settings and significant inter relationships this book attempts to combine several interacting energy themes that encompass a historical development energy issues and forecasts economic geography environmental programs and world energy use the main thrust of this book world energy resources is based on principles of energy science applied geology geophysics and other environmental sciences as they relate to the exploration exploitation and production of resources in this country and throughout the world this work is an analysis of the united states usa and world oil gas coal and alternative energy resources and their

associated issues forecasts and related policy this book could not have been attempted without a broad geological exposure and international ge ographic awareness much information is scattered among federal and state agencies schools and other institutions and this book has attempted to com bine some of the vast information base this attempt can only skim the infor mation surface at best but its regional and topical coverage is broad in scope part i introduces conventional energy resources and their historical develop ments and includes chapters 1 to 7 the basic concepts and supporting facts on energy sources are presented here for the general education of energy analysts policy makers and scientists that desire a brief review of advanced technologies and history

how much is a cleaner environment worth for policy makers that question used to go largely unanswered many economic activities cause environmental degradation entailing real costs to the economy and to people s welfare knowing the extent of these costs is crucial for identifying a country s main environmental

priorities and allocating appropriate funds for environmental protection over the past decade the world bank has initiated a systematic effort to measure the costs of environmental degradation in the middle east and north africa shedding new light on their magnitude and on the need for policy changes in many cases these costs were found to be surprisingly large the cost of environmental degradation case studies from the middle east and north africa brings together the best case studies of this program and summarizes their policy impacts at the national and regional levels the case studies quantify monetarily the annual damage due to environmental degradation and express these estimates as percentages of the countries gross domestic product the studies use the most recent environmental valuation methods to estimate the economic costs resulting from air pollution water degradation deforestation and land degradation uniquely

the book dedicates a case study to value the costs of environmental degradation resulting from an oil spill and demolition waste in times of conflict the studies then illuminate the concrete implications on policy investments and institutions for the respective nations this book will be of interest to policy makers nongovernmental organizations and academic and research institutions

this publication summarises the results of a capacity building process which started in 2003 to integrate environmental social and economic considerations in public policies a particular focus is on promoting sustainable trade and poverty reduction nine countries participated in the process brazil chile colombia the czech republic indonesia kenya lebanon russia and uganda policies subject to integrated assessment ranged from a sustainable development plan for the paving of highway in the brazilian amazon to kenya s national energy policy governments and

in spoils of truce reinoud leenders documents

the extensive corruption that accompanied the reconstruction of lebanon after the end of a decade and a half of civil war with the signing of the ta if peace accord in 1989 the rebuilding of the country s shattered physical infrastructure and the establishment of a functioning state apparatus became critical demands despite the urgent needs of its citizens however graft was rampant leenders describes the extent and nature of this corruption in key sectors of the lebanese economy and government including transportation health care energy natural resources construction and social assistance programs exploring in detail how corruption implicated senior policymakers and high ranking public servants leenders offers a clear eyed perspective on state institutions in the developing world he also addresses the overriding role of the syrian leadership s interests in lebanon and in particular its manipulation of the country s internal

differences his qualitative and disaggregated approach to dissecting the politics of creating and reshaping state institutions complements the more typical quantitative methods used in the study of corruption more broadly spoils of truce will be uncomfortable reading for those who insist that power sharing strategies in conflict management and resolution provide some sort of panacea for divided societies hoping to recover from armed conflict

this book examines the internal and external implications of israel's natural gas discoveries in the eastern mediterranean the nation's changed status from being an importer of coal and oil to that of an exporter of natural gas has consequences not only for the energy sector but also for the fragile geopolitics of the region the book explores the challenges and issues of energy economics and governance analyses israel's gas diplomacy with its neighbours in the middle east and north africa and its potential positive impact on the

amelioration of the arab israeli conflict studies how israel can avoid the deleterious impact of the dutch disease once the government's share of the export revenues start flowing the author traces a consummate picture of history politics and conflicts that shape the economics of energy in israel and its future trajectories a major intervention in middle east studies this volume will be of great interest to scholars and researchers of energy studies development studies strategic studies politics diplomacy and international relations it will also be of interest to government agencies think tanks and risk management firms

a wide reaching analysis of post world war ii u s policy in lebanon posits that the politics of oil and pipelines figured far more significantly in u s relations with lebanon than previously believed by reevaluating u s lebanese relations within the context of america's collaborative intervention with the lebanese
