throughout the twentieth century local control of school districts was one of the most contentious issues in american politics as state and federal regulation attempted to standardize public schools conservatives defended local prerogative as a bulwark of democratic values yet their commitment to those values was shifting and selective in the fight for local control campbell f scribner demonstrates how in the decades after world war ii suburban communities appropriated legacies of rural education to assert their political autonomy and in the process radically changed educational law scribner s account unfolds on the metropolitan fringe where rapid suburbanization overlapped with the consolidation of thousands of small rural schools rural residents initially clashed with their new neighbors but by the 1960s the groups had rallied to resist government oversight what began as residual opposition to school consolidation would transform into campaigns against race based busing unionized teachers tax equalization and secular curriculum in case after case suburban conservatives carved out new rights for local autonomy stifling equal educational opportunity yet scribner also provides insight into why many conservatives have since abandoned localism for policies that stress school choice and federal accountability in the 1970s as new battles arose over unions textbooks and taxes districts on the rural suburban fringe became the first to assert individual choice in the form of school vouchers religious exemptions and a marketplace model of education at the same time they began to embrace tax limitation and standardized testing policies that checked educational bureaucracy but bypassed local school boards the effect scribner concludes has been to reinforce inequalities between districts while weakening participatory government within them keeping the worst aspects of local control in place while forfeiting its virtues

the affordable care act aca contained a threat that any state refusing to set up a health insurance exchange would lose control to the federal government republicans had supported the concept before it became part of obamacare and so virtually every state was expected to cooperate and implement this core part of the law through which millions would receive financial assistance to buy health insurance however 34 states refused to participate using their flexibility as an opportunity to try to bring down the entire law this is a stunning miscalculation by the obama administration this book tells the story of what happened in the final two states to choose state control idaho and new mexico and the two that came the closest but did not michigan and mississippi contrary to how it is typically described in the media the most intense split was not between republicans and democrats but within the republican party governors were the most important people in the fight over exchanges but did not always get their way the tea party was amazingly successful at defeating the most powerful interest groups state level and national conservative think tanks were important allies to the tea party the relative power of these groups was shaped by differences in institutional design and procedures such as whether a state has term limits and the length of legislative sessions opposition was more easily overcome in states whose conditions

facilitated the development of legislative pockets of expertise this is a dramatic example of opponents using federalism to block national reform and serves as a warning of the challenge of inducing state cooperation in other policy domains such as the environment and education
