a militarized interstate dispute mid refers to international conflict short of war the mid dataset from the correlates of war project catalogs summary data on all threats displays and uses of force between two or more states these dispute data are essential in quantitative analyses of international conflict and other issues such as diplomatic efforts

and security policy the problem however is that they offer little information barring a brief summary of the conflict event this work remedies it by providing original detailed narrative descriptions of what occurred in each case organized by rivalry and within geographic regions these case descriptions written specifically for this work will be an essential resource for those interested in the causes histories and consequences of international conflicts

an unprecedented analysis of the crucial but underexplored roles the united states and other nations have played in shaping syria s ongoing civil war one of the best informed and non partisan accounts of the syrian tragedy yet published patrick cockburn independent syria s brutal long lasting civil war is widely viewed as a domestic contest that began in 2011 and only later drew foreign nations into the fray but in this book christopher phillips shows the crucial roles that were played by the united states russia iran saudi arabia turkey and qatar in syria s war right from the start phillips untangles the international influences on the tragic conflict and illuminates the west s strategy against isis the decline of u s power in the region and much more originally published in 2016 the book has been

updated with two new chapters

when the syrian regime used sarin and other chemical weapons against dissidents in august 2013 an estimated 1729 people were killed including 400 children president barack obama warned that the use of chemical weapons would constitute a red line but he refused to take military action trump s approach has been even more disengaged and lacking in clarity frontline syria highlights america s failure to prevent conflict escalation in syria based on interviews with us officials involved in syria policy as well as un personnel the book draws conclusions about america s role in world affairs and its potential to prevent deadly conflict it also highlights the role of front line states in syria and other countries who engaged in the syrian conflict to advance their national interests covering key turning points in the syrian civil war including the impact of recent decisions by the trump administration frontline syria critically evaluates america s global power and provides a diplomatic and military history of the conflict based on this analysis the book offers policy recommendations and makes a case for america s future role addressing peace and conflict

in 2011 the diplomatic and expert consensus was

that bashar al asads regime would fail causing syria to disintegrate into several ethnic enclaves or mini states a decade later and bashar is still in control having defeated the rebels and gained the support of russia the years of internal warfare have brought about changes in the spectrum of parties involved in the syrian state and the final outcome is inevitably going to be shaped by geo politics the alawi minority still in large measure controls the sunni muslim arab majority the other players are a gallery of ever changing allegiances isis jabhat al nusra and many other radical islamic groups the muslim kurdis and christian arab communities as well as shii lebanese hizballah external horizon players are iran sunni turkey and saudi arabia jewish israel the united states and russia this study aims to analyze the agendas actions and interrelations of these various actors from 2011 until the present it will discuss their ongoing politics and assess forthcoming developments both iran and russia continue to support bashar but compete for political military and economic influence the us has greatly reduced involvement keeping only 900 troops in northeastern syria to protect its kurdis allies and fight against isis turkey still occupies parts of northern syria with the aim of eliminating the kurdis

forces syrian and russian military attempts to conquer this area continue sporadically the israeli air force has attacked iranian and hizballah positions with the tacit approval of russia however russia s war on ukraine in february 2022 may result in restricting israeli interdictions and instead enhance cooperation with tehran in order to counter the us and nato both russia and iran have been incapable of reconstructing the massively destroyed syrian infrastructure the us and europe are reluctant to contribute due to bashar s continued alawi minority based autocratic and corrupt rule

this book explores the large and controversial subject of the use of force in international law it examines not only the use of force by states but also the role of the un in peacekeeping and enforcement action and the increasing role of regional organizations in the maintenance of international peace and security the un charter framework is under challenge russia s invasion of georgia and intervention in ukraine the usa s military operations in syria and saudi arabia s campaign to restore the government of yemen by force all raise questions about the law on intervention the war on terror that began after the 9 11 terrorist attacks on the usa has

not been won it has spread far beyond afghanistan it has led to targeted killings in pakistan somalia and yemen and to intervention against isis in iraq and syria is there an expanding right of self defence against non state actors is the use of force effective the development of nuclear weapons by north korea has reignited discussion about the legality of pre-emptive self defence the nato led operation in libya increased hopes for the implementation of responsibility to protect but it also provoked criticism for exceeding the security council s authorization of force because its outcome was regime change un peacekeeping faces new challenges especially with regard to the protection of civilians and un forces have been given revolutionary mandates in several african states but the 2015 report uniting our strengths reaffirmed that un peacekeeping is not suited to counter terrorism or enforcement operations the un should turn to regional organizations such as the african union as first responders in situations of ongoing armed conflict

the united states faces major challenges in dealing with iran the threat of terrorism and the tide of political instability in the arabian peninsula the presence of some of the world's largest reserves of oil and natural gas vital shipping lanes and shia populations throughout the region have made the peninsula the focal point of us and iranian strategic competition moreover large youth populations high unemployment rates and political systems with highly centralized power bases have posed other economic political and security challenges that the gulf states must address and that the united states must take into consideration when forming strategy and policy

iraq is a nation in crisis bordering on civil war the country now faces growing violence a steady rise in sunni islamist extremism an increasingly authoritarian leader that favors iraq's sunnis and growing ethnic tension between arabs and kurds the recent iraqi election offers little promise that it can correct the corruption the weaknesses in its security forces and the critical failures in governance economic development and leadership the problems iraq faces in 2014 are a legacy of mistakes made during and after the u s led invasion in 2003 but increasingly the nation is dealing with the self inflicted wounds of its leaders who abuse human rights repress opposing factions and misuse the iraqi police and security forces to their own end
