egyptians in revolt investigates the political economy of the egyptian labor and student movements using elements of social movement theory within a broad political economy framework it assesses labor and student mobilizations in four eras of contemporary egyptian history the pre 1952 era the nasser era the sadat era and the mubarak era egyptians in revolt examines how both student and labor groups responded to the

political economy pressures of the respective eras within the context of social movement theory the book argues that political opportunities and threats have had a significant impact on both student and labor mobilizations in addition the book explores how the movements have at times been able to affect government policies however the argument is made that the inability of both groups to sustain momentum in the long term is due to cooptation efforts by established political forces and the absence of viable and enduring organizational structures that are autonomous of state control by combining analysis to include both labor and student movements egyptians in revolt is a valuable resource for understanding the egyptian political economy and its impact on mobilizations it will therefore be of interest to students and scholars of middle east studies as well as those interested in social movement more broadly

this book addresses some of the main themes of the study of egypt during the nineteenth and twentieth centuries in a combination of case studies and discursive chapters the status of egypt as an important example of traditional asian scholarship and as an ancient model of imperialism itself is examined contributions range from studies of nineteenth century antiquarianism and the collecting of egyptian antiquities as an extension of the territorial ambitions and rivalries of the european powers to explorations of how egypt is understood and interpreted in contemporary societies views of ancient egypt also considers the way in which ancient egypt has been adopted by less privileged members of some societies as a cultural icon of past greatness

if we were asked to name the most interesting country in the world i suppose that most

people would say palestine not because there is anything so very wonderful in the land itself but because of all the great things that have happened there and above all because of its having been the home of our lord but after palestine i think that egypt would come next for one thing it is linked very closely to palestine by all those beautiful stories of the old testament which tell us of joseph the slave boy who became viceroy of egypt of mooses the hebrew child who became a prince of pharaoh s household and of the wonderful exodus of the children of israel

muslim arab sudanese in cairo have played a fundamental role in egyptian history and society during many centuries of close relations between egypt and sudan although the government and official press describes them as brothers in a united Nile valley recent political developments in egypt have underscored the precarious legal status of sudanese in cairo neither citizens nor foreigners they are in an uncertain position created in part through an unusual ethnic discourse which does not draw principally on obvious characteristics of difference this rich ethnographic study shows instead that sudanese ethnic identity is created from deeply held social values especially those concerning gender and propriety shared by sudanese and egyptian communities the resulting ethnic identity is ambiguous and flexible allowing sudanese to voice their frustrations and make claims for their own uniqueness while acknowledging the identity that they share with the dominant egyptian community
