nanowires are attracting wide scientific interest due to the unique properties associated with their one dimensional geometry

developments in the understanding of the fundamental principles of the nanowire growth mechanisms and mastering functionalization provide tools to control crystal structure morphology and the interactions at the material interface and create characteristics that are superior to those of planar geometries this book provides a comprehensive overview of the most important developments in the field of nanowires starting from their synthesis discussing properties and finalizing with nanowire applications the book consists of two parts the first is devoted to the synthesis of nanowires and characterization and the second investigates the properties of nanowires and their applications in future devices

i m born from dinka tribes where polygamy is predominantly pride of cultural values in southern sudan eastern africa my mother is the last of the eleven wives of my father and im the last born of the fifty siblings i am not exactly sure of my birth date because of no written records from my parents however based on the date that was given to me by the united nation i was born in 1984 and grew up in a traditional cattle herding from pakeer ciir in jongeli state in the late 1980s i was only four years old child amongst the fifty siblings living an incredible life of illiteracy the nomadic cattle life valves a lot more than education so education was not something i ever dream of my peers and i played different games that dont exist in the western countries when we were at our sweet village where there was no electricity or clean waters those games such as gugura molding cows from clay and the dinka games of kids playing marrying your wife and built toggles and slept in it while looking after calves was the best game we enjoyed the most as kids we were very much happy like the rest of the kids before the sudanese government troops began bombarded our village from the sky with helicopters and russians made airstrikes antinovels in arabic in 1987 when civil war reaches its climax and sudanese government keeps sending troops south and burned down our villages to ashes and obliterated the entire villages i fled into the bush with my brothers and cousins when we were looking after cattle to escape the bullets and not to be captured and made slaves the chaos and violence that happened forced me to fled into the bush when bullets were whizzing in the air and burning smoke at nearby village rise up high into the sky this led to uprooting and drifting through horrendous lives i never imagined my first nights ever in the bush were horrible which led to unknown journey of which none of my great grand parents or parents ever had been before we then became orphaned and began to walked thousands miles on foot to ethiopia guided by army rebels known as sudan peoples liberation army spla not to be killed or kidnapped by murle militiamen on the way on our way i witnessed the deaths of cousins friends and colleagues besides i witness the born and sculpture of humans remains on the way that i had never seen before during the journey i starved to death and got thirsty to the point were i drank my own urines to quenched my thirsty for the survival through my entire time i had lived in refugees camps for fourteen years before coming to america i passed through hunger violence and fatigues and became malnourish child living on one cup

of maize and one cup of beans of which to last for six days the violence and suffering i went through had left very many people dead from sudan to ethiopian and then sudan to kenya but not sure of what kept me a live i am very happy that with god grace i am who i am today in april 3 2001 i came to rochester new york and later joined by my close friend peter agok i had lived in rochester for the past ten years on my arrival to the united states i had often faced with cultural shocks and shaken by f and b words an americans favor expressions while adapting to americans life both at work and school i had been chasing americans dreams and the dreams are too far yet to be reach during the course of stays at u s a i went to high school for a year before enrolled at community college to improved my english after two years at community college i transferred to university of rochester and graduated in may 2007 with major in biology and minor in chemistry i work at xerox webster new york and looking forward to go back to school and pursuit field in medicine specially pharmacy to return back to sudan to alleviate the suffering my people are experiencing

the book offers a new and complex perspective on the fabrication and use of electrodeposited nanowires for the design of efficient and competitive applications while not pretending to be comprehensive the book is addressing not only to researchers specialized in this field but also to ph d students postdocs and experienced technical professionals

advances in nanofabrication characterization tools and the drive to commercialize nanotechnology products have contributed to the significant increase in research on inorganic nanowires inws yet few if any books provide the necessary comprehensive and coherent account of this important evolution presenting essential information on both popular and emerging varieties inorganic nanowires applications properties and characterization addresses the growth characterization and properties of nanowires author meyyappan is the director and senior scientist at ames center for nanotechnology and a renowned leader in nanoscience and technology and sunkara is also a major contributor to nanowire literature their cutting edge work is the basis for much of the current understanding in the area of nanowires and this book offers an in depth overview of various types of nanowires including semiconducting metallic and oxide varieties it also includes extensive coverage of applications that use inws and those with great potential in electronics optoelectronics field emission thermoelectric devices and sensors this invaluable reference traces the evolution of nanotechnology and classifies nanomaterials describes nanowires and their potential applications to illustrate connectivity and continuity discusses growth techniques at both laboratory and commercial scales evaluates the most important aspects of classical thermodynamics associated with the nucleation and growth of nanowires details the development of silicon germanium gallium arsenide and other materials in the form of nanowires used in electronics applications explores the physical electronic and other properties of nanowires the explosion of nanotechnology research activities for various applications is due in large part to the advances in the growth of nanowires continued

development of novel nanostructured materials is essential to the success of so many economic sectors ranging from computing and communications to transportation and medicine this volume discusses how and why nanowires are ideal candidates to replace bulk and thin film materials it covers the principles behind device operation and then adds a detailed assessment of nanowire fabrication performance results and future prospects and challenges making this book a valuable resource for scientists and engineers in just about any field co author meyya meyyappan will receive the pioneer award in nanotechnology from the ieee nanotechnology council at the ieee nano conference in portland oregon in august 2011

nanotechnology has attracted billions of dollars in venture capital from research institutes governments and industries in recent years traditional nanofabrication techniques such as cvd sol gel and self assembly have been intensively studied however the electrochemical nanofabrication technique which offers huge benefits for manufacturing nanomaterials as well as broad applications in industries has not been given much attention compared with the traditional nanofabrication methods this book fits the niche of such technology because it summarizes various electrochemical nanofabrication methods and shows their various essential applications in areas such as batteries sensors and many future technologies with the development of nanotechnology and nanomaterials the arena of electrochemical nanofabrication has expanded significantly the first edition of this book was drafted in 2009 in 2010 the nobel prize in physics was awarded to prof konstantin novoselov and prof andre geim from the university of manchester for their groundbreaking experiments on the two dimensional material graphene three years later the european commission launched the european union s biggest ever research initiative the graphene flagship with a budget of 1 billion euros in light of these developments this new edition of the book is enriched with the synthesis of graphene based materials through electrochemical methods the applications of graphene in lithium ion and sodium ion batteries and the use of graphene composites in various sensing platforms it will be of immense interest to a broad audience in nanotechnology and electrochemistry
