### **Ecology - Definition, Types and Examples | Biology Dictionary**

1. Introduction. The term “ecology” was coined by the German zoologist, Ernst Haeckel, in 1866 to describe the “economies” of living forms. [ ] The theoretical practice of ecology consists, by and large, of the construction of models of the interaction of living systems with their environment (including other living systems). [ ] These models are then tested in the laboratory and the field.
