the gothic version of the new testament is the oldest extant writing in a germanic language and one of the earliest translations from the greek this volume offers a re-examination of fundamental questions concerning the historical and cultural context in which the version was prepared the codicology of the manuscripts and the value of the gothic text for the reconstruction of the underlying greek together with a history of text critical research and a new evaluation of the significance of the gothic text in the light of current new testament textual criticism

this book analyses how the early greek whole bible manuscripts

change and preserve the text dormandy refutes the method based on singular readings and so investigates all the ways in which each pandect differs from the initial text both changes introduced by its own scribe and by the scribes of earlier manuscripts he surveys sample chapters in john romans revelation sirach and judges including discussing the new finds of sinaiticus dormandy's observations of codex ephraemi challenge accepted transcriptions dormandy argues that sinaiticus and vaticanus may plausibly have been made in response to commissions by constantine and constans dormandy concludes that generally across all the biblical books considered the pandects preserve the initial text well transcriptional and linguistic variations are more common than harmonisations or changes of content the

more precise profiles of each manuscript vary between biblical books the pandects thus create bibliographic unity from textual diversity this shows their significance in the history of the christian bible they reflect in bibliographic form the hermeneutical move to consider all the books of the christian bible as one corpus

klaus wachtel has pioneered the creation of major editions of the greek new testament through a blend of traditional philological approaches and innovative digital tools in this volume an international range of new testament scholars and editors honour his achievements with thirty one original studies many of the themes mirror wachtel's own publications on the history of the byzantine text the identification of manuscript families and groups detailed analysis

of individual witnesses and the development of software and databases to support the editorial process other contributions draw on the production of the editio critica maior with reference to the gospels of mark and john the acts of the apostles the pauline epistles and the apocalypse several chapters consider the application of the coherence based genealogical method a wide selection of material is considered from papyri to printed editions the greek text is analysed from multiple perspectives including exegesis grammar and orthography alongside evidence from versions in latin syriac coptic and gothic this collection provides new insights into the history of the biblical text and the creation development analysis and application of modern editions

the famous codex

vaticanus is currently regarded as one of the most essential sources for reconstructing the greek new testament text although it had already been used by textual critics in the sixteenth century the manuscript only rose to the prominent status it now holds during the nineteenth century in this volume yi writes an extensive scholarly history of codex vaticanus and describes its changing perceptions among scholars beginning from desiderius erasmus until its editio princeps prepared by angelus maius by examining critical editions analysing monographs and articles considering book reviews and pamphlets and delving into archive collections yi delineates the stages of the manuscript's progression from an ancient manuscript held at the vatican library to its designation as the codex vaticanus it is a study of the many individuals and

their stories surrounding this very manuscript stories about accessibility and the dissemination of knowledge authority and head on collisions between the most learned critics and of continuity and changing paradigms in scholarship all in all this book sets out how codex vaticanus became the manuscript par excellence in the history of new testament textual scholarship

as the principal greek witness of the so called western tradition of the gospels and acts codex bezae s enigmatic text in parallel greek and latin columns presents a persistent problem of new testament textual criticism the present study challenges the traditional view that this text represents a vivid retelling of the canonical narratives cited by ancient writers from justin martyr to marcion and translated early into syriac and latin

he current political climate of confrontation between islamist regimes and western governments has resulted in the proliferation of essentialist perceptions of iran and iranians in the west such perceptions do not reflect the complex evolution of iranian identity that occurred in the years following the constitutional revolution 1906 11 and the anti imperialist islamic revolution of 1979 despite the iranian government s determined pursuance of anti western policies and strict conformity to religious principles the film and literature of iran reflect the clash between a nostalgic pride in persian tradition and an apparent infatuation with a more eurocentric modernity in familiar and foreign mannani and thompson set out to explore the tensions surrounding the ongoing formulation of iranian identity by bringing together essays on poetry

novels memoir and films these include both canonical and less widely theorized texts as well as works of literature written in english by authors living in diaspora challenging neocolonialist stereotypes these critical excursions into iranian literature and film reveal the limitations of collective identity as it has been configured within and outside of iran through the examination of works by among others the iconic female poet forugh farrokhzad the expatriate author goli taraqqi the controversial memoirist azar nafisi and the graphic novelist marjane satrapi author of persepolis this volume engages with the complex and contested discourses of religion patriarchy and politics that are the contemporary product of iran s long and revolutionary history
