*during president barack obama s first term in office the united states expanded its military presence in
afghanistan and increased drone missile strikes across pakistan yemen and somalia the administration
also deployed the military to combat piracy in the indian ocean engaged in a sustained bombing

been supported by a group of senators and representatives who for political reasons that stem from
constant campaigning seek to avoid responsibility for military action abroad in this revealing book
ryan c hendrickson examines president obama s use of force in his first term with four major case
studies he demonstrates that much like his predecessors obama has protected the executive branch s
right not only to command but also to determine when and where american forces are deployed he
also considers the voting records of democrat john kerry and republican john mccain in the senate
detailing how both men have played leading roles in empowering the commander in chief while
limiting congress s influence on military decision making obama at war establishes that the imperial

canada's indian act is infamously sexist through many iterations of the legislation a woman's status
 rights flowed from her husband and even once it was amended to reinstate rights lost through
 marriage or widowhood first nations women could not necessarily pass status on to their descendants
 that injustice has rightly been subject to much scrutiny but what has it meant for first nations men
 martin j cannon challenges the decades long assumption of case law and politics that the act has
 affected indigenous people as either women or indians but not both he argues that sexism and
 racialization within the law must instead be understood as interlocking forms of discrimination that
 have also undercut the identities of indigenous men through their female forebears by restorying
 historically patriarchal legislation and indigenous masculinity men masculinity and the indian act
 makes a significant contribution to a transformative discussion of indigenous nationhood citizenship
 and reconciliation

making choices making do is a comparative study of black and white working class women's survival
 strategies during the great depression based primarily on analysis of employment histories and
 depression era interviews of 1 340 women in chicago cleveland philadelphia and south bend lois
 helmbold discovered that while going through the depression both black and white women lost work
 fairly equally but the benefits that white women accrued because of structural racism meant that they
 avoided utter destitution that more commonly swallowed their black peers for example when let go
 from a job a white woman was more successful in securing a less prestigious job which allowed her
 continuous employment while black women especially older black women were pushed out of the labor
 force entirely helmbold found other ways that black and white working class women's lives
 intertwined sometimes positively sometimes not she found that overall working class women were less
 racially segregated than men in their jobs making choices making do strives to fill the gap in the labor
 history of women both black and white during the depression the book will challenge the limits of
 segregated histories and encourage more comparative analysis
