## How To Focus On Stars - SLR Photography Guide

Then, use manual focus. To tell if the star is in focus, pay attention to its size — when the star is as small as possible, it will be in focus. Also, you can use your lens's longitudinal chromatic aberration to your advantage. This is the effect I described earlier — out-of-focus regions of your image take on a green or magenta tint.

Pay attention to details. Dreams become far more vivid when you allow yourself to focus in on details in the dream. Without reining in on details, the memory of the dream becomes clouded, and large chunks of information are lost. If you're in a room with a clock for example, try to look in on the clock and check the time.
